FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1975 ..... App-10

AREA CLASSIFICATIONS

Counties

The primary divisions of most of the States are termed counties; in Louisiana the corresponding units are termed parishes. Alaska has no counties; in this State, areas designated census divisions have been defined, for general statistical puroses, by the State in cooperation with the Census Bureau and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes, these independent cities are treated as county equivalents.

Standard Metropolitan Statistical Areas

The definitions of standard metropolitan statistical areas used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's as defined and named in the Bureau of the Budget publication, **Standard Metropolitan Statistical Areas: 1967,** U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968 and an additional 13 were defined in February 1971 on the basis of the results of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited in the preceding paragraph.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries. For a few central cities, the figures include some housing units in parts of the city classified as rural in the 1970 census.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introductory text of this report, the 1975-1976 Annual Housing Survey was conducted by direct interview. The survey enumerators were instructed to read the questions directly from the questionnaire. The definitions and explanations given below for each subject are to a considerable extent drawn from various technical and procedural materials used in the collection of the data. This material helped the enumerative personnel to understand more fully the intent of each question and thus to resolve problem or unusual cases. Additional explanatory information has been added to this portion of the text to

assist the user in the proper utilization of the statistics.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units.—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters.—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated to him, or if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Rules for mobile homes, hotels, rooming houses, etc.—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the head, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the head or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions.—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Occupancy Characteristics

Occupied housing units.—A housing unit is classified as occupied if a person or group of persons is living in it at the time of enumeration, or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Race.—The classification by race shown here refers to the race of the head of the household occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The enumerator was to report the race of the head of the household in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black household heads; units with household heads of other races are included in the total in table 1 of part A, Series H-170, and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black household head are presented in separate tables. The classification of race in the Annual Housing Survey was made by the enumerator based on his own observation. In the 1970 census, race was essentially a self-classification by people according to the race with which they identified themselves.

Spanish origin.—The classification by Spanish origin here refers to the origin of the head of the household occupying the housing unit. Detailed characteristics of units with head of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a "flash card." Persons of Spanish origin were those who indicated that their origin was either Mexican-American,

Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish.

In the 1970 census and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the Annual Housing Survey and other surveys.

Tenure.—A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Duration of occupancy.—Data on duration of occupancy are based on information for the head of household; the data refer to the period when present occupancy began. Statistics are shown on whether the head lived in the unit "less than 3 months" or "3 months or longer." To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1975; however, if enumeration took place in February or March of 1976, the household head must have moved into the unit prior to February 1976.

Utilization Characteristics

Persons.—All persons occupying the housing unit are counted. These persons include not only occupants related to the head of the household but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the household head. The data on "persons" show the number of housing units occupied by the specified number of persons.

A person is enumerated at his usual place of residence. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile.

Rooms.—The statistics on "rooms" refer to the number of housing units with specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodger's rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one unit, the room is included with the unit from which it is most easily reached.

Bedrooms.—The number of bedrooms in the unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified, by definition, as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criterion is applied only to units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

In addition, statistics are shown for households with bedrooms used by three or more persons of all ages, and separately for such households when one or more of these persons is 13 years of age or older. Not included are bedrooms used for sleeping by three or more persons only on an occasional basis, such as by visitors.

Structural Characteristics

Complete kitchen facilities.—A unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit, all equipment located inside the structure is classified, by definition, for exclusive use.

Condition of kitchen facilities.—Units with complete kitchen facilities were classified as to whether all the kitchen facilities were in usable condition. If one or more of the kitchen facilities (sink, range or cookstove, and refrigerator) could not be used for its intended purpose, the unit was classified as having "1 or more not usable." Kitchen facilities that normally function properly, but which were temporarily out of use (two weeks or less) because of a breakdown, were classified as usable.

Basement.—Statistics on basements are presented in terms of the number of housing units located in structures built with a basement. A structure has a

basement if there is enclosed space in which persons can walk upright under all or part of the building.

Basements in structures with occupied units are further classified by signs of water leakage. The category "with water leakage" consists of units in which the basement shows signs of water having leaked in from the outside, even if the signs only appear when it rains or during other similar situations. "No water leakage" means that the basement shows no signs of water leakage, or that the signs of water leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no water leakage.

Units in structure.—All housing units, both occupied and vacant, were counted to determine the number of units in a structure. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof.

Stories between main and apartment entrances.—This item is restricted to two or more unit structures and is concerned with the number of floors from the main entrance of the apartment building to the main entrance of the apartment. The number of stories is determined from ground level if there is no main building entrance and the apartment has its own private entrance, either from the ground level of the building or from an area that is *not located inside* the building; or if there is a main building entrance, but the entrance to the apartment cannot be reached by using the main building entrance.

Roof.—Units "with water leakage" are those in which the roof shows signs of water having leaked in from the outside or where the roof leaks when it rains. "No water leakage" means that the roof shows no signs of water having leaked in from the outside, or that the roof shows signs of water leakage but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure, such as faulty plumbing, the unit was classified as having no water leakage.

Interior ceilings and walls.—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior ceilings or walls of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. "Hairline cracks" or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted in and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors.—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Selected structural deficiencies and wish to move.—The category "household would like to move" consists of housing units in which the respondent considers one or more of the following structural deficiencies so objectionable that he would like to move from his unit: (1) Water leakage in basement, (2) water leakage from roof, (3) open cracks or holes in the interior walls or ceiling, (4) holes in the floor, and (5) broken plaster or peeling paint on the ceiling or inside walls.

Overall opinion of structure.—The data presented are based on the respondent's overall opinion of his house or building as a place to live. The respondent was asked to rate the structure as excellent, good, fair, or poor.

Common stairways.—The statistics on common stairways are presented for housing units in structure of two or more units with common stairways. The figures reflect the physical condition of the stairway; i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants of more than one unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls.—The statistics on light fixtures in public halls refer to the number of housing units in structures of two or more units with public halls which have light fixtures and whether the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one unit or by the general public.

Electric wiring.—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the wiring is outside the walls but enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets.—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall outlet or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuse blowouts.—These statistics are presented for occupied housing units which had had an electrical circuit fuse blown or breaker switch tripped during the three months prior to enumeration. The data are restricted to households that

had been at their present address for at least three months prior to the date of enumeration. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as "fuse or switch blowouts."

Plumbing Characteristics

Plumbing facilities.—The category "with all plumbing facilities" consists of units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. "Lacking some or all plumbing facilities" means that the unit does not have all three specified plumbing facilities (hot and cold piped water, as well as flush toilet and bathtub or shower inside the structure), or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms.—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet and bathtub or shower and a washbasin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

"Also used by another household" refers to units with bathroom facilities which are also for the use of the occupants of other housing units. "None" refers to units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Water supply.—"A public system or private company" refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Individual wells are further classified as to whether they were originally "drilled" or "dug." Drilled wells are machine dug. Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

Data on breakdowns or failures of water supply are shown if the housing unit was occupied by the head of the household at least 3 months prior to enumeration and if the breakdown or failure lasted 6 consecutive hours or longer during the 3 months prior to enumeration. Questions concerning breakdowns or failures in the water supply were asked when the unit had piped water inside the structure. The water may be available from sources such as a sink, washbasin, bathtub, or shower. In the 1974 Annual Housing Survey (SMSA sample) statistics on breakdowns or failures in water supply were presented for units when the source of water was from a public system, private company, or individual well.

A unit is classified as having no piped water inside structure if the unit has no piped water or if the only piped water available is outside the structure; for example, on an open porch or in another building. A breakdown or failure in the water supply means that the unit was completely without running water from its regular source. A unit was considered to be completely without running water if (1) the water system servicing the unit supplied no water at all, or (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i.e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen sink was broken but the one in the bathtub was working, the unit was not classified as being completely without water.

Units with a breakdown or failure in the water supply are classified according to the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such problems as broken pipes in the unit (or building) or turning the water off in the unit (or building) for maintenance and repairs. "Problems outside the building" refer to such problems as power failures, breaks in the main water line, or shutdown by the water company for maintenance and repairs.

Sewage disposal.—A "public sewer" is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A "septic tank or cesspool" is an underground tank or pit used for disposal of sewage. Small sewage treatment plants which in some localities are called neighborhood septic tanks are classified as public sewers. A chemical toilet uses chemicals to breakdown or dissolve garbage, a privy refers to an "outhouse" or other small shelter outside the unit which contains a toilet. Units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns or failures in the means of sewage disposal are limited to units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc. Data on breakdowns are shown if the housing unit was occupied by the head of the household at least 3 months prior to enumeration and if the breakdown or failure lasted 6 consecutive hours or longer during the 3 months prior to enumeration.

Flush toilet.—The statistics on breakdowns or failures of flush toilet are limited to units that had all plumbing facilities with only one flush toilet; that is, one complete bathroom or one complete bathroom plus a half bath without flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Units with breakdown or failure in flush toilet are classified according to the number of breakdowns or failures and to

the most common source of the problem "Problems inside the building" refer to such breakdowns or failures as broken pipes in the unit (or building), a cracked or broken bowl, or faulty flushing mechanism "Problems outside the building" refer to such breakdowns or failures as breaks in the main water or sewer line or shutdowns by the water company for maintenance or repairs.

Data on breakdowns or failures of flush toilet are shown if the housing unit was occupied by the head of household at least 3 months prior to enumeration, and if the breakdown or failure lasted 6 consecutive hours or more during the 3 months prior to enumeration.

Equipment and Fuels

Heating equipment.—"Warm-air furnace" refers to a central system which provides warm air through ducts leading to various rooms; central heat pumps are included in this category. "Steam or hot water" refers to a central heating system in which heat from steam or hot water is delivered through radiator or other outlets. "Built-in electric units are permanently installed in floors, walls, ceilings, or baseboards. A "floor, wall, or pipeless furnace" delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed. "Room heaters with flue" include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and which are connected to a flue, vent, or chimney to remove smoke and fumes. "Room heaters without flue" include any room heater (not portable) that burns gas, oil, or kerosene which is not connected to a flue, vent, or chimney. "Fireplaces, stoves, or portable heaters" also include room heaters that burn coal or wood.

For breakdowns or failures of heating equipment, data are shown for units occupied by the household head during the winter prior to enumeration if the equipment was unusable for 6 consecutive hours or longer during that time. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1975; however, if enumeration took place in February or March of 1976, the household head must have moved into the unit prior to February 1976.

Heating equipment is considered unusable if it cannot be used for the purposes intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat.—The statistics presented refer to housing units in which the household head occupied the unit during the winter prior to the date of enumeration. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1975; however, if enumeration took place in February or March of 1976, the household head must have moved into the unit prior to February 1976.

Separate data are shown for units with additional heat source, rooms which lacked specified heat source, and units with closed rooms. The term "specified heating equipment" includes warm-air furnace; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplaces, stoves, and portable heaters.

The data on additional heat source refer to units with "specified heating equipment" which *had* to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

"Rooms lacking specified heat source" include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in units with "specified heating equipment" which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

Separate data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for seven consecutive days or longer during the previous winter, and the unit must have "specified heating equipment." For this item, also, the kitchen was not considered a room.

Services and Neighborhood Conditions

Garbage collection service.—A housing unit is classified as having garbage collection service if either a private or public company collects the trash or garbage on a regular basis and carries it to public disposal areas. In some areas where the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, data are obtained only for the garbage collection service.

If the household does not have garbage collection service, the means of garbage disposal is classified as follows:

Incinerator, trash chute, or compactor.—An incinerator is a large unit on the property designed to burn all trash and garbage. Trash chutes and compactors were marked as the means of garbage disposal when the final means of disposal was not known; i.e., if the respondent knew only that he put his garbage down a trash chute or that his garbage goes into compactor. A compactor is a unit which packs trash and garbage into smaller units for disposal.

Garbage disposal unit.—A garbage disposal unit is connected to the kitchen sink and grinds up the garbage which is disposed of through the sewage system.

Other means.—If the method of disposal does not fall into any of the classifications specified above, it is classified as "other means."

Exterminator service.—The statistics on exterminator service refer to households that have been at their present address for at least 3 months prior to the date of enumeration and who reported that they had seen mice or rats or signs or traces of their presence *inside* the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the

wall, or ripped or torn food containers. "Regular extermination service" refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill pests and rodents. The regular service interval may be once a month, four times a year, or any other such interval. "Irregular extermination service" includes visits by an exterminator who is called only when needed by the household or building manager, or where it is known that a building is serviced but it is not known whether the service is regular or irregular. "No extermination service" includes units in a house or building that has not been serviced during the 12 months prior to enumeration and where it is not known if there is any exterminator service.

Neighborhood conditions and services.—The statistics presented are based on the respondent's assessment of the neighborhood in which he lives. Thus, the respondent's answer may or may not reflect the "actual" description of the neighborhood. Furthermore, the respondent may not have the same assessment as his neighbor about the neighborhood conditions and/or services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate while his neighbor may not.

Neighborhood conditions.—The respondent was asked whether or not certain conditions were present in his neighborhood. The following is the list of conditions:

1. Airplane noise—This category refers to the respondent's opinion concerning noise made by airplanes in landing or taking off or sonic booms from nearby airports or military bases.

2. Street noise—Street noise refers to noise made by children playing outdoors, noise from a factory or business, or any other sound that the respondent considers street noise.

3. Heavy traffic—This category refers to the presence of cars and/or trucks which the respondent classifies as heavy traffic.

4. Odors.—This category refers to fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc., which the respondent considers objectionable.

5. Litter.—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on empty lots, or on properties on the street which the respondent considers litter.

6. Abandoned buildings.—Abandoned buildings refer to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.

7. Deteriorating housing—Deteriorating housing refers to occupied housing units which, in the respondent's opinion, are in rundown condition.

8. Commercial or industrial.—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores, that the respondent considers to be nonresidential.

9. Streets need repair.—The data are based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.

10. Roads impassable.—This category refers to roads that the respondent reported to be neglected by State, county, or city crews during snow storms, heavy rain storms, or other such conditions that make a road impassable.

11. Poor street lighting.—Poor street lighting includes areas which, in the opinion of the respondent, have no street lighting, insufficient street lighting, and street lighting that does not work adequately.

12. Crime.—This category refers to all forms of neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.

Neighborhood conditions and wish to move.—The category, "would like to move," consists of housing units in which the respondent considers one or more neighborhood conditions (such as street noise) disturbing, harmful, or dangerous and so objectionable that he would like to move from the neighborhood.

Neighborhood services.—The data shown are based on the respondent's opinion of the adequacy of the following neighborhood services:

1. Public transportation.—The data are based on the respondent's opinion of the availability of public transportation such as bus, subway, or taxicab service.

2. Schools.—The statistics are based on the respondent's opinion about the schools in his neighborhood, such as the proximity of the school, population of the student body, etc.

3. Neighborhood shopping.—This category refers to the respondent's opinion regarding stores such as grocery or drug stores and their merchandise, prices, or services in his vicinity.

4. Police protection.—This category refers to the presence, quality, quantity, and response time of services that, in the respondent's opinion, should be provided by the police.

5. Fire protection.—The data are based on the respondent's opinion regarding the presence and response time of the local fire protection services.

6. Hospitals and health clinics.—This category refers to the quality and proximity of health facilities, etc., serving the local community in the opinion of the respondent.

Neighborhood services and wish to move.—The category, "household would like to move," consists of housing units in which the respondent considers one or more of the specified

neighborhood services (such as public transportation) so inadequate or unsatisfactory that he would like to move from the neighborhood.

Overall opinion of neighborhood.—The data presented are based on the respondent's overall opinion of the neighborhood according to the neighborhood conditions and services available (described in preceding paragraphs). The respondennt was asked to rate the neighborhood as excellent, good, fair, or poor. Data are also shown for wish to move because of undesirable neighborhood conditions cross-classified by the respondent's overall opinion of his neighborhood.

Financial Characteristics

Value.—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

Gross rent.—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.), if these items are paid for by the renter (or paid for him by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuel as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-family houses on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Household Characteristics

Household.—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Head of household.—One person in each household is designated as the "head"; that is, the person who is regarded as the head by the members of the household. However, if a married woman living with her husband is reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Family or primary individual.—Housing units are occupied by either "families" or "primary individuals." The term "family" refers to the head of a household and all (one or more) other persons living in the same household who are related to the head by blood, marriage, or adoption. If the head lives alone or with nonrelatives only, then the head is considered a "primary individual."

Married couples related to the head of a family are included in the family and are not considered as separate families. A lodger, servant, or other person unrelated to the head is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as "other male head" or "female head." Primary individuals living alone are always tabulated as "one-person households."

Income.—The statistics on income in the Annnual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to enumeration and is the sum of the amounts reported for wage and salary income, net self-employment income. Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit; that is, the sum of the income of the head of the family and all other members of the family 14 years old and over or the income of the primary individual. Incomes of persons living in the unit but not related to the head of the household are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to enumeration. It includes wages, salary, piece rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was engaged on his own account.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipt of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs such as the Area Redevelopment Act and

the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind" such as free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on "uncashed" savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1975, the income data refer to the 12 months prior to enumeration (April 1975 through March 1976), whereas the household characteristics refer to the date of enumeration. Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of enumeration. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income period but who were members of the family at the time of enumeration. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

CHECK ITEM A

Mark all 3 parts (See cc 21)
(1) Household head lived here last 90 days . . . . . (045) 1 ☐ Yes 2 ☐ No
(2) Household head lived here last winter . . . . . (046) 1 ☐ Yes 2 ☐ No
(3) Household head moved here during the last 12 months . . . . . (047) 1 ☐ Yes 2 ☐ No

35. How many bedrooms do you have in your house (apartment)? Count rooms used mainly for sleeping even if used for other purposes.
(048) _____ Bedrooms
OR
0 ☐ None – *Skip to 38*

36a. Is it necessary to pass through anyone's bedroom to get from one room to another – excluding bathrooms?
(049) 1 ☐ Yes – *Skip to Check Item B*
2 ☐ No

b. Is it necessary to pass through anyone's bedroom to get to the bathroom?
(050) 1 ☐ Yes
2 ☐ No

CHECK ITEM B

(See cc 11c) Do not count persons with usual residence elsewhere unless entire household is URE.
☐ Household has 1 or 2 persons – *Skip to 38*
☐ Household has 3 or more persons – *Ask 37a*

37a. Are any bedrooms used for sleeping by 3 or more persons?
☐ Yes – **How many bedrooms are used for sleeping by 3 or more persons?**
(051) 1 ☐ 1 bedroom
2 ☐ 2 or more bedrooms
3 ☐ No – *Skip to 38*

b. Are any of the persons who use this bedroom (these bedrooms) 13 years of age or older?
(052) 1 ☐ Yes
2 ☐ No

38. Do you have complete kitchen facilities in this house (building); that is, a kitchen sink with piped water, a refrigerator and a range or a cookstove?
(053) 1 ☐ Yes – Used for this household only
2 ☐ Yes – Also used by another household
3 ☐ No – *Skip to 40*

39a. Are the kitchen sink, refrigerator, and range or cookstove all in usable condition?
(054) 1 ☐ Yes – *Skip to 41*
2 ☐ No

b. Which of the items are not in usable condition?
(Mark all that apply)
(055) 1 ☐ Kitchen sink
* 2 ☐ Refrigerator
3 ☐ Range or cookstove
} *Skip to 41*

Do you have piped water –
40a. In this building?
(056) 1 ☐ Yes – *Skip to 41*
2 ☐ No

b. Available within 1/4 mile?
(057) 1 ☐ Yes
2 ☐ No
} *Skip to 45b*

Section II – OCCUPIED UNITS *(Include URE's)* – Continued

41. INTERVIEWER *(Mark one)* — Household head lived here last 90 days *(See Check Item A (1), page 8)*
☐ Yes
☐ No – *Skip to 42*

a. At any time in the last 90 days were you **COMPLETELY** without running water?
(058) 1 ☐ Yes
2 ☐ No – *Skip to 42*

b. Were you completely without running water for 6 consecutive hours or more?
(059) 1 ☐ Yes
2 ☐ No . . . . . } *Skip to 42*
3 ☐ Don't know

c. How many times?
(060) 1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

d. What was the (most common) reason you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?
(061) 1 ☐ Inside – *Specify problem* ↘
2 ☐ Outside – *Specify problem* ↘

42. Do you have complete plumbing facilities in this house (building); that is, hot and cold piped water, a flush toilet and a bathtub or shower?
(062) 1 ☐ Yes – For this household only
2 ☐ Yes – Also used by another household } *Skip to 45a*
3 ☐ No . . . . . }

43. How many bathrooms do you have?
A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water.
A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.
(Mark only one box)
(063) 1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
One complete bathroom plus half bath(s)
3 ☐ Half bath does NOT have flush toilet
4 ☐ Half bath has flush toilet
5 ☐ 2 complete bathrooms . . . . . } *Skip to 45a*
6 ☐ More than 2 complete bathrooms

44. INTERVIEWER *(Mark one)* — Household head lived here last 90 days *(See Check Item A(1), page 8)*
☐ Yes
☐ No – *Skip to 45a*

a. At any time in the last 90 days was there a breakdown in your flush toilet; that is, was it completely unusable?
(064) 1 ☐ Yes
2 ☐ No – *Skip to 45a*

b. Did any of these breakdowns last 6 consecutive hours or more?
(065) 1 ☐ Yes
2 ☐ No – *Skip to 45a*

c. How many of these breakdowns were there?
(066) 1 ☐ 1
2 ☐ 2
3 ☐ 3
4 ☐ 4 or more

d. What was the (most common) reason you were completely without the use of your flush toilet for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?
(067) 1 ☐ Inside – *Specify problem* ↘
2 ☐ Outside – *Specify problem* ↘

FORM AHS-52 (11-6-74)

- 0 None – Skip to 11

10a. Is it necessary to pass through a bedroom to get from one room to another, excluding bathrooms? (049)
- 1 Yes – Skip to 11
- 2 No

b. Is it necessary to pass through a bedroom to get to the bathroom? (050)
- 1 Yes
- 2 No

11. Does this house (building) have complete kitchen facilities; that is, a kitchen sink with piped water, a refrigerator, and a range or a cookstove? (053)
- Yes – Are these facilities only for the use of the intended occupants?
  - 1 Yes – Used for this household only
  - 2 No – Also used by another household
- 3 No

12. Does this house (building) have complete plumbing facilities; that is, hot and cold piped water, a flush toilet and a bathtub or shower? (062)
- Yes – Are these facilities only for the use of the intended occupants?
  - 1 Yes – Used for this household only – Ask 13
  - 2 No – Also used by another household – Skip to 14a
- 3 No – Skip to 14a

13. How many bathrooms does this house (apartment) have?
A complete bathroom is a room with a flush toilet, a bathtub or shower, and a washbasin with piped water.
A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

(Mark only one box) (063)
- 1 Complete plumbing facilities but not in one room
- 2 1 complete bathroom

One complete bathroom plus half bath(s)
- 3 Half bath does NOT have flush toilet
- 4 Half bath has flush toilet
- 5 2 complete bathrooms
- 6 More than 2 complete bathrooms

Section IV – VACANT UNITS – Continued

14a. Is this house (building) connected to a public sewer? (068)
- 1 Yes – Skip to 15
- 2 No

b. What means of sewage disposal does it have? (069)
- 1 Septic tank or cesspool
- 2 Chemical toilet
- 3 Privy
- 4 Use facilities in another structure
- 5 Other – Specify

15. What type of heating equipment does this house (apartment) have?
(If more than one, mark MAIN type of heating equipment) (074)
- 1 A central warm-air furnace with ducts in individual rooms, or a heat pump
- 2 Steam or hot water system
- 3 Built-in electric units (permanently installed in wall, ceiling, or baseboard)
- 4 Floor, wall, or pipeless furnace
- 5 Room heaters with flue or vent burning gas, oil, or kerosene
- 6 Room heaters without flue or vent burning gas, oil, or kerosene
- 7 Fireplaces, stoves, or portable room heaters
- } Skip to 17a
- 8 Unit has no heating equipment

16. How many rooms are there without hot air ducts or registers, radiators, or room heaters?
(Exclude kitchen and bathrooms) (076)
- 1 None
- 2 1 room
- 3 2 rooms
- 4 3 rooms or more

17a. Does this house (apartment) have air conditioning? (081)
- 1 Yes
- 2 No – Skip to 18

b. Does it have a central air-conditioning system or individual room units? (082)
- 1 Central – Skip to 18
- 2 Room units

c. How many room units? (083)
- 1 1
- 2 2 or more

18. Is there a basement in this house (building)?
(A basement is an enclosed space in which persons can walk upright under all or part of the building) (089)
- 1 Yes
- 2 No

CHECK ITEM A

VACANCY STATUS *(See item 7b)*

FOR SALE ONLY *(See Control Card item 27a)*
- One-unit structure – Ask 19
- Two-or-more-unit structure, or a mobile home or trailer – Skip to 21

FOR RENT *(See Control Card item 27a)*
- One-unit structure – Ask 19
- Two-or-more-unit structure, or a mobile home or trailer – Skip to 22

ALL OTHERS (Other vacants, units rented or sold, units held for occasional use and similar units) – Skip to Check Item C

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IV – VACANT UNITS – Continued

(If rural transcribe from cc item 37b. If urban ask or fill by observation.)

19. **Does this place have 10 acres or more?**

(099) 1 ☐ Yes, 10 acres or more
2 ☐ No, less than 10 acres

CHECK ITEM B

VACANT FOR SALE ONLY

If this is a –

☐ One-unit structure on **less** than 10 acres and there is **no** commercial establishment or medical or dental office on the property *(Control Card items 27c and d)* – *Ask 20*

☐ All others – *Skip to 27a*

VACANT FOR RENT

If this is a –

☐ One-unit structure on **less** than 10 acres – *Skip to 22*

☐ One-unit structure on 10 acres or more – *Skip to 27a*

20. **What is the sale price asked for this property?**

SHOW FLASHCARD B

(100)
1 ☐ Less than $2,500
2 ☐ $ 2,500 – $ 4,999
3 ☐ 5,000 – 7,499
4 ☐ 7,500 – 9,999
5 ☐ 10,000 – 12,499
6 ☐ 12,500 – 14,999
7 ☐ 15,000 – 17,499
8 ☐ 17,500 – 19,999
9 ☐ 20,000 – 24,999
10 ☐ 25,000 – 29,999
11 ☐ 30,000 – 34,999
12 ☐ 35,000 – 39,999
13 ☐ 40,000 – 49,999
14 ☐ 50,000 – 59,999
15 ☐ 60,000 or more

21. **Is there a garage or carport on this property which is available for the use of occupants?**

(043) 1 ☐ Yes
2 ☐ No } *Skip to 27a*

22. **What is the MONTHLY rent?**

(If rent is not to be paid by the month, mark the time period covered, compute the monthly rent in the "Notes" space, and enter the monthly rent on the line provided.)

(Include site rent for mobile homes if it is to be paid separately.)

(135) $_____ . 00 Per month

(136) 1 ☐ More frequently than once a month
2 ☐ Less frequently than once a month
3 ☐ Once a month

Notes

23. **Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other public agency?**

(140) 1 ☐ Yes
2 ☐ No

24. **In addition to rent, does the renter also pay for –**

a. **Electricity?**

(142) 1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, electricity not used

b. **Gas?**

(144) 1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, gas not used

c. **Water?**

(146) 1 ☐ Yes
2 ☐ No, included in rent or no charge

d. **Oil, coal, kerosene, wood, etc.?**

(148) 1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, these fuels not used or obtained free

Section IV – VACANT UNITS – Continued

25. **In addition to rent, does the renter also pay for garbage and trash collection?**

(150) 1 ☐ Yes
2 ☐ No

CHECK ITEM C

(See Control Card item 27a)

☐ One-unit structure, or a mobile home or trailer – *Skip to 27a*

☐ Two-or-more-unit structure – *Ask 26a*

26a. **Does the owner of this building/Do you (if speaking to the owner) live on this property?**

(161) 1 ☐ Yes – *Skip to 27a*
2 ☐ No
3 ☐ Don't know

b. **Is there a resident manager, superintendent or janitor who lives on this property?**

(162) 1 ☐ Yes
2 ☐ No
3 ☐ Don't know

OBSERVATION

27a. **Is the unit boarded-up?**

(233) 1 ☐ Yes
2 ☐ No

OBSERVATION

b. **Are there any buildings (other than this building) that appear to be abandoned and/or are there any buildings with windows broken or boarded-up on this street?**

(234) 1 ☐ Yes
2 ☐ No

CHECK ITEM D

(See Control Card item 27a)

☐ One-unit structure, or a mobile home or trailer – ***End AHS-52 Interview and go to Control Card item 38a***

☐ Two-or-more-unit structure – *Ask 28a*

OBSERVATION

28a. **Do the public halls in this building have light fixtures?**

(236) 1 ☐ Yes
2 ☐ No
3 ☐ No public halls } *Skip to 29a*

b. **Are the light fixtures in working order?**

(237) 1 ☐ All in working order
2 ☐ Some in working order
3 ☐ None in working order

29a. **Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building?**

(238) 1 ☐ Yes
2 ☐ No
3 ☐ No common stairways – ***End AHS-52 Interview and go to Control Card item 38a***

b. **Are all stair railings firmly attached?**

(239) 1 ☐ Yes
2 ☐ No
3 ☐ No stair railings } ***End AHS-52 Interview and go to Control Card item 38a***

Notes

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIIC – OCCUPIED UNITS – Continued

NOTE – Ask 111a for all categories before asking 111b.

(Obtain family income for head and all persons 14+ in household related to head by blood, marriage, or adoption.)

111a. In the past 12 months, did any member of this family receive any money from –

NOTE – Ask 111b only for those categories in 111a which were answered "Yes."

111b. How much was received from (source of income)?

(1) Social Security or Railroad Retirement payments?	(262) 1 ☐ Yes 2 ☐ No	(263) $ _____.00
(2) Estates, trusts or dividends?	(264) 1 ☐ Yes 2 ☐ No	(265) $ _____.00
(3) Interest on savings accounts or bonds?	(266) 1 ☐ Yes 2 ☐ No	(267) $ _____.00
(4) Net rental income?	(268) 1 ☐ Yes 2 ☐ No	(269) $ _____.00
(5) Welfare payments or other public assistance?	(270) 1 ☐ Yes 2 ☐ No	(271) $ _____.00
(6) Unemployment compensation?	(272) 1 ☐ Yes 2 ☐ No	(273) $ _____.00
(7) Workmen's compensation?	(274) 1 ☐ Yes 2 ☐ No	(275) $ _____.00
(8) Government employee pensions?	(276) 1 ☐ Yes 2 ☐ No	(277) $ _____.00
(9) Veterans payments?	(278) 1 ☐ Yes 2 ☐ No	(279) $ _____.00
(10) Private pensions or annuities?	(280) 1 ☐ Yes 2 ☐ No	(281) $ _____.00
(11) Alimony or child support?	(282) 1 ☐ Yes 2 ☐ No	(283) $ _____.00
(12) Regular contributions from persons not living in this household?	(284) 1 ☐ Yes 2 ☐ No	(285) $ _____.00
(13) Anything else?	(286) 1 ☐ Yes 2 ☐ No	(287) $ _____.00

NOTE – If "Yes" was answered for one or more of the categories in 111a, ask 111b.

OBSERVATION – Fill for mobile home in group of 6 or more.

112. How many mobile homes are in this group? (288) 1 ☐ 6–99 2 ☐ 100 or more

OBSERVATION – Fill for 2 or more unit structures

113. How many stories (floors) are there from the main entrance of the building to the main entrance of the apartment? (289) 1 ☐ None, on same floor 2 ☐ One (up or down) 3 ☐ Two or more (up or down)

CHECK ITEM V

(See Control Card item 11b)

☐ Household contains only family members – *Skip to Check Item W, page 35*

☐ Household contains persons 14+ NOT RELATED TO THE HEAD by blood, marriage or adoption – *Ask 114*

FORM AHS-2 (4-17-75) Page 33

Section IIIC – OCCUPIED UNITS – Continued

114. In the last 12 months, how much did . . . earn in wages, salaries, tips and commissions (before taxes and deductions)?

(Obtain income for persons 14+ in household NOT RELATED TO HEAD by blood, marriage or adoption.)

115a. In the past 12 months, how much did . . . earn in net income from his/her own business, professional practice or partnership? . . . . . .

b. In the past 12 months, how much did . . . earn in net income from his/her own farm or ranch? . . . . . .

NOTE – Ask 116b for each "Yes" response in 116a. Ask 116a (and 116b, as appropriate) for all categories before asking 116c.

116a. In the past 12 months did . . . (names of persons 14+ NOT RELATED TO HEAD by blood, marriage or adoption) receive any money from –

116b. Who received this type of income? (Enter line numbers)

(1) Social Security or Railroad Retirement payments?	(290) 1 ☐ Yes 2 ☐ No	
(2) Estates, trusts or dividends?	(291) 1 ☐ Yes 2 ☐ No	
(3) Interest on savings accounts or bonds?	(292) 1 ☐ Yes 2 ☐ No	
(4) Net rental income?	(293) 1 ☐ Yes 2 ☐ No	
(5) Welfare payments or other public assistance?	(294) 1 ☐ Yes 2 ☐ No	
(6) Unemployment compensation?	(295) 1 ☐ Yes 2 ☐ No	
(7) Workmen's compensation?	(296) 1 ☐ Yes 2 ☐ No	
(8) Government employee pensions?	(297) 1 ☐ Yes 2 ☐ No	
(9) Veterans payments?	(298) 1 ☐ Yes 2 ☐ No	
(10) Private pensions or annuities?	(299) 1 ☐ Yes 2 ☐ No	
(11) Alimony or child support?	(300) 1 ☐ Yes 2 ☐ No	
(12) Regular contributions from persons not living in this household?	(301) 1 ☐ Yes 2 ☐ No	
(13) Anything else?	(302) 1 ☐ Yes 2 ☐ No

CHECK ITEM W (See Control Card item 27a.)

☐ One-unit structure, detached, except mobile home or trailer — *Skip to Section IV, page 36*

☐ All others — *Skip to Section V, page 37*

Section IV — ENERGY CONSERVATION

INTRODUCTION I have some questions about insulation you might have added or installed to your house during the past 12 months.

CHECK ITEM A (Control Card item 34a)

☐ "Yes, all windows" or "Yes, some windows" in 34a — *Ask 1*

☐ "No" marked in item 34a — *Skip to Check item B*

1. During the past 12 months were any storm windows, double-glazed glass, or other protective covering, such as closeable shutters, plastic, etc., installed over the window openings on this house. (380) 1 ☐ Yes 2 ☐ No

CHECK ITEM B (See Control Card item 34b)

☐ "Yes, all doors" or "Yes, some doors" in 34b — *Ask 2*

☐ "No" marked in item 34b — *Skip to 3*

2. During the past 12 months were any storm doors installed on this house? (381) 1 ☐ Yes 2 ☐ No

3. During the past 12 months was any insulation added or installed in this house? (382) 1 ☐ Yes 2 ☐ No — *Skip to 5*

CHECK ITEM C (See Control Card item 34c)

☐ "Yes" marked in 34c — *Ask 4a*

☐ "No" or "Don't know" in 34c — *Skip to 4c*

4a. During the past 12 months was attic or roof insulation installed? (383) 1 ☐ Yes 2 ☐ No — *Skip to c*

b. How much insulation was ADDED to the attic or roof — was it less than 3 inches, 3 up to 6 inches, or 6 inches or more? (384) 1 ☐ Less than 3 inches 2 ☐ 3 up to 6 inches 3 ☐ 6 inches or more 4 ☐ Don't know

c. During the past 12 months was any insulation added or installed in the exterior walls? (385) 1 ☐ Yes 2 ☐ No

5. During the past 12 months have you added caulking or weatherstripping to the exterior doors or windows? (386) 1 ☐ Yes 2 ☐ No

CHECK ITEM D (See Control Card item 25a)

☐ Owned or being bought

☐ "Yes" marked in any of 1, 2, 4a, 4c, or 5 above — *Ask 6*

☐ "No" marked in 1, 2, 4a, 4c, and 5 above — *Skip to Section V, page 37*

(See Control Card item 25a)

☐ Rented or rent free — *Skip to Section V, page 37*

6. What was the total cost of the (storm windows, storm doors, additional attic or roof insulation, additional wall insulation, or caulking or weatherstripping) which was added or installed during the past 12 months? (387) 1 ☐ $1–99 2 ☐ 100–199 3 ☐ 200–399 4 ☐ 400 or more 5 ☐ Don't know 6 ☐ No charge, or none

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section V – TRAVEL TO WORK

Interviewer note: Fill item 1 after completing Section V

1. Section V – Interview status
   - 1 ☐ Interview
   - NONINTERVIEW
   - 2 ☐ Refusal
   - 3 ☐ Other

2. *Enter line number and name of each household member 14+ and then ask item 2c for each.*

Line number (a)	Name (b)	2c. Did . . . have a job last week? (Include if temporarily absent from work due to illness, vacation, layoff, etc.) (Mark one box for each line No.) Yes [1]	No [2]
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐

[1] *Transcribe the line number for each "Yes" answer in question 2c above to the top of a separate page and ask the appropriate questions.*

[2] *All "No" go to Control Card Item 38e*

INTRODUCTION The following questions are concerned with how persons in your household usually get to work.

FORM AHS-2 (4-17-75) Page 37

~ PGM 5

Line number of person (386) | Line number of respondent (389)

If last worker in this household, mark this box ☐

3a. What is . . .'s principal means of transportation to work? (390)
- 1 ☐ Truck . . . . .
- 2 ☐ Car or carpool → ▼

(391)
- 1 ☐ Drives alone – *Skip to 4a*
- 2 ☐ Shares driving . . . . . } *Skip to 3c*
- 3 ☐ Drives others . . . . . } *Skip to 3c*
- 4 ☐ Rides with someone else } *Skip to 3c*
- 5 ☐ Walks only – *Skip to 4a*
- 6 ☐ Works at home – *Skip to 8a*
- 7 ☐ Railroad
- 8 ☐ Subway or elevated
- 9 ☐ Bus or streetcar
- 10 ☐ Taxicab
- 11 ☐ Motorcycle
- 13 ☐ Bicycle
- 12 ☐ Other means – *Specify* _____

b. Does . . . usually ALSO use a car for part of the trip to work? (392) 1 ☐ Yes 2 ☐ No – *Skip to 4a*

c. How many people, including . . . , usually ride in the car to work? (393) _____ Number

4a. Does . . . usually WORK at the same location each day? (394) 1 ☐ Yes – *Skip to 4c* 2 ☐ No

b. Does . . . usually REPORT to the same location to begin work each day? (395) 3 ☐ Yes 4 ☐ No – *Skip to 8a*

c. Where is . . .'s usual place of work?

(1) Company or business establishment name

(2) Address *(Number and street)*
Note – If address (number and street name) are not known, enter building name, shopping center name, or other physical location description.

(3) Names of nearest intersecting streets

(4) Name of city, town, village, borough, etc. Place type →

(5) County

State ZIP code

4d. Is . . .'s place of work inside the incorporated (legal) limits of (name of city, town, village, etc., listed in 4c(4)? (396) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know

5. What time does . . . usually leave for work?
(397) _____ Time
(398) 1 ☐ a.m. 2 ☐ p.m.

6. How long does it usually take . . . to get from home to work? (399) _____ Minutes

7. What is . . .'s ONE-WAY distance from home to work? (400) _____ Miles OR 0 ☐ Less than 1 mile

8a. In the last year, has . . . changed his principal means of transportation to work? (401) 1 ☐ Yes 2 ☐ No – *Skip to 9*

b. What was . . .'s principal means of transportation to work (prior to the change)? (402)
- 1 ☐ Truck . . . . .
- 2 ☐ Car or carpool → ▼

(403)
- 1 ☐ Drove alone
- 2 ☐ Shared driving
- 3 ☐ Drove others
- 4 ☐ Rode with someone else
- 5 ☐ Walked only
- 6 ☐ Worked at home
- 7 ☐ Railroad
- 8 ☐ Subway or elevated
- 9 ☐ Bus or streetcar
- 10 ☐ Taxicab
- 11 ☐ Motorcycle
- 13 ☐ Bicycle
- 12 ☐ Other means – *Specify* _____

9. If "Yes" marked in 8a – *ASK* **Compared to . . .'s previous means of transportation to work (Given in 8b), how satisfied is . . . with his present means of transportation to work – much more, more, about the same, less or much less satisfied?**

If "No" marked in 8a – *ASK* **Compared to a year ago, how satisfied is . . . now with his principal means of transportation to work – much more, more, about the same, less or much less satisfied?**

(404)
- 1 ☐ Much more satisfied
- 2 ☐ More satisfied
- 3 ☐ About the same satisfaction
- 4 ☐ Less satisfied
- 5 ☐ Much less satisfied
- 6 ☐ Don't know
- 7 ☐ Did not work last year

INTERVIEWER Be sure to transcribe items 2c, 3a, 3b, 6 and 7 for head of household to items 82a–e on page 13 of AHS-2 questionnaire.

Ask Question 10, page 39, for the HEAD

FORM AHS-2 (4-17-75) Page 38

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

CHECK ITEM A

(Mark all 3 parts)

(1) Head had job last week. ("Yes" in item 2c)	☐ Yes*	☐ No
(2) Head reports to same location each day. ("Yes" in item 4a or 4b)	☐ Yes*	☐ No
(3) Head works 5 miles or more from home. (Item 7 is 5 miles or more. If item 7 is blank, mark the "No" box.)	☐ Yes*	☐ No

*** All "Yes," go to item 10. Any other combination, go to the next worker.**

10a. Does . . . (head) have any objections to the distance (he/she) travels to get to work? (405) 1 ☐ Yes → Skip to c 2 ☐ No → Ask b

b. What would you say your reasons are for living 5 or more miles from . . .'s (head) place of work?

Is it because –

(1) You like the neighbors in your present neighborhood?	(406)	3 ☐ Yes	4 ☐ No
(2) You like your house (apartment)?	(407)	1 ☐ Yes	2 ☐ No
(3) Your present home is close to good schools, or church?	(408)	3 ☐ Yes	4 ☐ No
(4) Your present home is convenient to shops, recreation, and similar facilities?	(409)	1 ☐ Yes	2 ☐ No
(5) Your present home is close to the jobs of others (besides the head) in your family?	(410)	3 ☐ Yes	4 ☐ No
(6) You can afford your present home?	(411)	1 ☐ Yes	2 ☐ No
(7) You're used to your present home, you're comfortable, you've always lived here?	(412)	3 ☐ Yes	4 ☐ No
(8) Some other reason I have not already mentioned? *If "Yes," specify reason(s) –* _____	(413)	1 ☐ Yes →	2 ☐ No → (Skip to Note above item 11)

c. What are the reasons you don't live closer to . . .'s (head) place of work?

Is it because –

(9) You don't like any houses which are closer to work?	(414)	3 ☐ Yes	4 ☐ No
(10) You would not like to live among the type of people in the neighborhoods which are closer to work?	(415)	1 ☐ Yes	2 ☐ No
(11) The neighborhoods closer to work have poor schools or lack churches?	(416)	3 ☐ Yes	4 ☐ No
(12) The neighborhoods closer to work are inconvenient to shops, recreation, or other similar facilities?	(417)	1 ☐ Yes	2 ☐ No
(13) The neighborhoods closer to . . .'s (head) work are too far from other family members' jobs?	(418)	3 ☐ Yes	4 ☐ No
(14) You cannot afford housing in neighborhoods closer to work?	(419)	1 ☐ Yes	2 ☐ No
(15) There is no closer housing available?	(420)	3 ☐ Yes	4 ☐ No
(16) You don't like change; it's trouble to move?	(421)	1 ☐ Yes	2 ☐ No
(17) . . . (head's) present job is temporary, or . . . (head) expects to change jobs?	(422)	3 ☐ Yes	4 ☐ No
(18) Some other reason I have not already mentioned? *If "Yes," specify reason(s) –* _____	(423)	1 ☐ Yes	2 ☐ No

NOTE *If 2 or more "Yes" answers in categories 1–18, ask item 11. If one "Yes" or all "No," go to next worker.*

11. You have told me that the reasons you live 5 or more miles from work are (Specify "Yes" answers mentioned in 1–18 above). Which reason would you say is the most important reason you live 5 or more miles from . . .'s (head) work? (424) _____ Reason number *(Go to next worker)*

SAMPLE DESIGN

Annual Housing Survey—The estimates for each of the 21 SMSA's are based on data collected from the 1975 Annual Housing Survey (AHS) which was conducted by the Bureau of the Census acting as collection agent for the Department of Housing and Urban Development. In each of the 21 SMSA's, the data were collected for the 12-month period from April 1975 through March 1976 with one-twelfth of the sample units being visited each month.

Data for the first group of 19 SMSA's were collected for the AHS from April 1974 through March 1975, and data for a third group of 20 SMSA's were collected from April 1976 through March 1977. The sample housing units for each group of SMSA's will be enumerated for the AHS every three years on a rotating basis.

For each group of SMSA's, the largest SMSA from each of the four geographic regions is represented by a sample of about 15,000 designated housing units evenly divided between the central city and the balance of the respective SMSA. All remaining SMSA's are each represented by a sample of about 5,000 designated housing units distributed proportionately between the central city and the balance of the respective SMSA based on the distribution of total housing units in each sector.

The largest SMSA's in the second group (Year II SMSA's) are: Atlanta, Ga., Chicago, Ill., Philadelphia, Pa.-N.J., and San Francisco-Oakland, Calif.

The remaining SMSA's in the second group are: Cincinnati, Ohio-Ky.-Ind., Colorado Springs, Colo., Columbus, Ohio, Hartford, Conn., Kansas City, Mo.-Kan., Miami, Fla., Milwaukee, Wis., New Orleans, La., Newport News-Hampton, Va., Paterson-Clifton-Passaic, N.J., Portland, Oreg.-Wash., Rochester, N.Y., San Antonio, Tex., San Bernardino-Riverside-Ontario, Calif., San Diego, Calif., Springfield-Chicopee-Holyoke, Mass.-Conn., and Madison, Wis. Table I provides a description of some aspects of the sample design for each of these SMSA's.

Selection of the sample.—The sample for the SMSA's which are 100-percent permit-issuing was selected from two sample frames—units enumerated in the 1970 Census of Housing and Population in areas under the jurisdiction of permit-issuing offices (the permit-issuing universe) and units constructed in permit-issuing areas since the 1970 census (the new construction universe). In addition, the sample for those SMSA's which are *not* 100-percent permit-issuing included a sample selected from a third frame—those units located in areas not under the jurisdiction of permit-issuing offices (the nonpermit universe). The following table indicates which SMSA's are 100-percent permit-issuing and which contain a sample from the non-permit universe.

100-percent permit-issuing SMSA's	SMSA's with a sample from the nonpermit universe
Hartford, Conn.	Atlanta, Ga.
Miami, Fla.	Chicago, Ill.
Newport News-Hampton, Va.	Cincinnati, Ohio-Ky.-Ind.
Paterson-Clifton-Passaic, N.J.	Colorado Springs, Colo.
San Bernardino-Riverside-Ontario, Calif.	Columbus, Ohio
San Diego, Calif.	Kansas City, Mo.-Kan.
San Francisco-Oakland, Calif.	Madison, Wis.
	Milwaukee, Wis.
	New Orleans, La.
	Philadelphia, Pa.-N.J.
	Portland, Oreg.-Wash.
	Rochester, N.Y.
	San Antonio, Tex.
	Springfield-Chicopee-Holyoke, Mass.-Conn.

Sampling operations, described in the following paragraphs, were performed separately within the central city and the balance of the SMSA for each of the sample frames. The overall sampling rate used to select the sample for each SMSA was determined by the size of the sample. Thus, for the four largest SMSA's, the overall sampling rate differed by central city and balance of the SMSA since the sample was divided equally between the central city and the balance of the SMSA. The remaining SMSA's had an overall sampling rate about the same for the sample selected from both the central city and balance of the SMSA, since the sample was distributed proportionately between the central city and balance of the SMSA according to the distribution of total units in each sector.

The major portion of the sample was selected from a file which represented the 20-percent sample of units enumerated in permit-issuing areas of the SMSA during the 1970 Census of Housing and Population. This file contained records for occupied housing units, vacant housing units, and units in certain special places or group quarters. Sampling operations were done separately for the special place and group quarters' records and for the occupied and vacant housing unit records. Before the sample was

selected from the occupied and vacant records, the occupied housing unit records were stratified by race of head (non-Black/Black) and the vacant records were stratified into four categories pertaining to the value or rent associated with the vacant housing units. The occupied housing unit records were further stratified so that each unit was assigned to 1 of 50 strata according to its tenure/family size/household income category as illustrated by the following table:

Household income	Tenure	
	Owner—family size	Renter—family size
	1 2 3 4 5+	1 2 3 4 5+
Under $3,000 . . .		
$3,000–$5,999 . .		
$6,000–$9,999 . .		
$10,000–$14,999		
$15,000 and over .		

Thus, for each SMSA, the occupied housing unit records from this universe were assigned to 1 of 100 strata for either the central city or for the balance, and the vacant housing unit records were assigned to 1 of the 4 vacant strata for either the central city or for the balance of the SMSA. A sample of housing unit records was then selected to produce one-half of the desired sample size. The housing unit record adjacent to each of the above sample housing unit records was also selected to be in sample, thereby insuring the necessary designated sample size.

Before the sample was selected from the group quarters and special place records, the records were stratified by census tract and census enumeration district (ED) within the central city and within the balance of the SMSA. A sample of special place records was then selected to produce one-quarter of the desired sample size. However, at the time of enumeration, the units at each of the sample special places were listed and subsampled at a rate to produce an expected four sample units thereby insuring the necessary designated sample size.

The second frame from which the SMSA sample was selected was a list of new construction building permits issued since 1970 (i.e., the new construction universe). The sample selection from the list of new construction building permits was an independent operation within each SMSA. Prior to sample selection, the list of permits was chronologically stratified, by the date the permits were issued, and clusters of an expected four (usually adjacent) housing units were formed. These clusters were then sampled for inclusion at the overall sampling rate.

For those SMSA's which are not 100-percent permit-issuing, the remainder of the AHS sample was selected from a frame consisting of areas not under the jurisdiction of permit-issuing offices (i.e., the nonpermit universe). The first step in the sampling operation for the universe was the selection, using the overall sampling rate, of a sample of census enumeration districts within these areas. Prior to this sample selection, the ED's were stratified by census tract within the central city and within the balance of the SMSA. The probability of selection of an ED was proportionate to the following measure of size:

TABLE I. Description of the Annual Housing Survey-SMSA Sample

[1]Sample units that were visited but occupants were not at home after repeated visits or were unavailable for some other reason; or, for vacant housing units, no informed respondent could be found.

[2]Sample units that were visited but were found not to provide information relevant to the housing inventory.

$$\frac{\text{Number of housing units in 1970 census ED} + \frac{\text{Group quarters population in 1970 census ED}}{3}}{4}$$

The sample ED's were then divided into segments; i.e., small land areas with well-defined boundaries having an expected size of four, or a multiple of four housing units. At the time of enumeration, those segments that did not have an expected size of four were subdivided to produce an expected four sample housing units.

The next step was the selection of one of these segments within each sample ED. In the sample segments, all units in existence at the time of interview are in sample. Thus, units enumerated in the 1970 census as well as units built since the 1970 census are included.

ESTIMATION

The AHS sample produced estimates pertaining to characteristics of the housing inventory at the enumeration time of the AHS (i.e., the 1975 housing inventory) for each SMSA. Estimation procedures that were employed are described in the following paragraphs.

1975 housing inventory—The AHS estimates of characteristics of the 1975 housing inventory employed a three-stage ratio estimation procedure. However, the third-stage ratio estimation procedure was employed in only three SMSA's (Colorado Springs, Colo.; Miami, Fla.; San Diego, Calif.). Prior to the implementation of the ratio estimation procedure, the basic weight (i.e.; the inverse of the probability of selection) for each interviewed sample housing unit was adjusted to account for noninterviews. The noninterview adjustment factor was equal to the following ratio:

$$\frac{\text{Weighted count of interviewed housing units} + \text{Weighted count of noninterviewed housing units}}{\text{Weighted count of interviewed housing units}}$$

Within each sector of each SMSA, a noninterview factor was computed separately for 54 noninterview cells for sample housing units from the permit-issuing universe (where the cells consisted of one or more of the different strata used in the stratification of the universe as previously illustrated), 1 noninterview cell for new construction sample housing units, and 1 noninterview cell for the nonpermit universe (if applicable). Sample housing units from the nonpermit universe, identified as being built April 1, 1970, or later, were considered as new construction units for the purpose of the noninterview adjustment.

The first-stage ratio estimation procedure was employed for all sample housing units from the permit-issuing universe. This factor was computed separately for all sample housing units within each permit-issuing universe noninterview cell mentioned above. The ratio estimate factor for each cell was equal to the following:

$$\frac{\text{1970 census count of housing units from permit-issuing universe in a cell}}{\text{AHS sample estimate of 1970 housing units from the cell}}$$

For each SMSA, the numerators of the ratios were obtained from the 1970 Census of Population and Housing 20-percent file of units enumerated in areas under the jurisdiction of permit-issuing offices. The denominators of the ratios were obtained from weighted estimates of all AHS sample units within the corresponding ratio estimate categories using the existing weight (i.e., the basic weight times the noninterview factor). The computed first-stage ratio estimation factor was then applied to the existing weight for each sample unit within the corresponding first-stage ratio estimation category.

The effect of this ratio estimation procedure was to reduce the variation in sample size for strata used in the sample selection of the permit-issuing universe. Ordinarily, this would have been controlled by sampling within the strata during the sample selection process. However, prior to the AHS sample selection within each SMSA, units already selected for other Census Bureau surveys were deleted from the permit-issuing universe. Thus, some variation in sample size was introduced during the AHS sample selection process.

The second-stage ratio estimation procedure was employed for all sample units that were conventional new construction units (i.e., conventional units built after April 1970), new mobile homes (i.e., mobile homes built after April 1970), or "other addition" units (i.e., units added by conversion of 1970 units or by other sources). This procedure was designed to adjust the AHS sample estimates of these types of units to independently derived current estimates. These independent estimates were considered to be the best estimates available. The adjustment was necessary to correct known deficiencies in the AHS sample in the representation of these units (see the section on nonsampling error). The second-stage ratio estimation factors were computed separately for each of the cells in the table below using the following formula:

$$\frac{\text{October 1975 independent estimate of housing units in that cell for the SMSA}}{\text{AHS sample estimates of housing units in that cell for the SMSA}}$$

Second-Stage Ratio Estimation Cells

Conventional new construction units.	
New mobile homes	
"Other additions".	

The numerators of the ratios were derived by applying the following factors:

1. For the "conventional new construction units" cell, either a national trend for missed conventional new construction was applied to the 1968 and 1969 building permits issued in the SMSA or the missed conventional new construction was estimated from the Survey of Construction (SOC). (The table that follows indicates the procedure used to estimate the missing conventional new construction for each SMSA.)
2. For the "new mobile homes" cell, a 1970 census relationship between

total new construction and new mobile homes that existed in this SMSA for the 1965-1970 period was applied.

3. For the "other additions" cell, the "other additions" rate from SCARF[1] was applied.

SMSA's employing the SOC estimate of missed conventional new construction	SMSA's employing the national trend for missed conventional new construction
Atlanta, Ga.	Colorado Springs, Colo.
Chicago, Ill.	Hartford, Conn.
Cincinnati, Ohio-Ky.-Ind.	Madison Wis.
Columbus, Ohio	New Orleans, La.
Kansas City, Mo.-Kan.	Newport News-Hampton, Va.
Miami, Fla.	Paterson-Clifton-Passaic, N.J.
Milwaukee, Wis.	Rochester, N.Y.
Philadelphia, Pa.-N.J.	San Antonio, Tex.
Portland, Oreg.-Wash.	San Bernardino-Riverside-Ontario, Calif.
San Diego, Calif.	Springfield-Chicopee-Holyoke, Mass.-Conn.
San Francisco-Oakland, Calif.	

The denominators of the ratios were obtained from the weighted estimates for the AHS sample units within each cell, using the existing weight after the first-stage ratio estimation procedure. The computed second-stage ratio estimation factor was then applied to the existing weight for each sample unit in the corresponding second-stage ratio estimation category.

For some Year II SMSA's (i.e., Colorado Springs, Colo.; Miami, Fla.; and San Diego, Calif.) a third-stage ratio estimation procedure was also employed. This procedure involved the ratio estimation of the AHS weighted sample estimate of the October 1975 housing inventory to an independent estimate of the SMSA's October 1975 housing inventory. This ratio estimate factor equaled the following:

$$\frac{\text{Independent estimate of the October 1975 housing inventory for the SMSA}}{\text{AHS sample estimate of the housing inventory}}$$

The numerator of the ratio was derived by using the 1970 census estimate of total housing units for the SMSA in conjunction with the estimate of the change in the housing inventory since the census. The estimate of change was based on either administrative records from utility companies or, when utility data were not available, on estimates of new construction permits and post-census demolition data. The denominator of that ratio was obtained from the weighted estimate of AHS sample units, using the existing weight after the second-stage ratio estimation procedure. The computed third-stage ratio estimation factor was then applied to the existing weight for each sample unit and the resulting product was used as the final weight for tabulation purposes.

The effect of the third-stage ratio estimation procedure, as well as the overall estimation procedure, was to reduce the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. Since the housing population of the sample differed somewhat by chance from the SMSA as a whole, it can be expected that the sample estimates will be improved when the sample housing population or different portions of it, are brought into agreement with known estimates of the SMSA housing population.

The third-stage ratio estimation procedure was not employed in all Year II SMSA's since the reliability of the independent estimate varied by SMSA, depending on the completeness of the utility data or the permit-demolition data. The independent estimates were only employed in SMSA's where the estimated relative bias was thought to be low enough (i.e., 3 percent or less over a 10-year period) to preclude the possibility of doing more harm than good to the survey results. A measure of the relative bias of the independent estimate was available based on a comparison between the 1970 census estimate of the April 1970 housing inventory and the April 1970 independent estimate of the housing inventory generated from the procedure used to produce the October 1975 independent estimates. In some SMSA's, the measure of the relative bias of the independent estimate was less than 3 percent, but the independent estimate was not employed, since there was evidence which suggested that the procedure for generating the independent estimates was producing substantial overestimates for these SMSA's.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys—sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-SMSA sample.

Nonsampling errors.—Nonsampling errors can be attributed to many sources: Inability to obtain information about all cases; definitional difficulties; differences in the interpretation of questions; inability or unwillingness to provide correct information on the part of respondents; mistakes in recording or coding the data; and other errors of collection, response, processing, coverage, and estimation for missing data. Nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult because of the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for the 1975 AHS-SMSA sample.

Reinterview program.—A reinterview program was conducted for a sample of the AHS households. These households were revisited and answers to some of the

[1]SCARF denotes the Survey of Components of Change and Residential Finance, a survey conducted in 1957-1959 by the Census Bureau.

questions on the AHS questionnaire were obtained again. The original interview and the reinterview were assumed to be two independent readings and, thus, were the basis for the measurement of the accuracy of the AHS data collected from enumerated households.

As part of the reinterview, a check was made at each of these households to determine if the following was done during the original interview:

1. The correct unit was visited.
2. The correct number of housing units were interviewed at that address.
3. The correct information on "Year Built" was obtained.
4. The correct information on "Tenure" was obtained.
5. The correct information on "Household Composition" was obtained.
6. The correct information on "Type of Housing Unit" was obtained.
7. The correct information on "Occupancy Status" was obtained.

This check was made for interviewer evaluation and control. That is, tolerance limits were derived to determine which interviewers passed or failed this reinterview with regard to the above items. The results of the Year II AHS-SMSA reinterview study were presented in the Census Bureau memorandum, "Response Error in the Annual Housing Survey Data-Year II SMSA Sample."

Some of the results of this study are (these results are based on the reinterviews across all the SMSA's that were part of the 1975-76 sample and not specifically for any SMSA):

1. "The results indicate that the interviewers are doing a good job. From a total of 207 interviewers checked, 10 failed in classification checks, 7 in household composition, and 2 in content reinterview."
2. "Of the non-attitudinal items which had enough data to compute reliable measures of response error, approximately 55 percent of these items had low levels of inconsistency in responses and about 45 percent had moderate levels of inconsistency in responses."
3. "For the attitudinal items, approximately 60 percent of the indices showed low levels of inconsistency when reconciled; i.e., after the question is answered in the reinterview, the enumerator presents the previous response and then asks the respondent to decide upon the best answer. The remaining items showed moderate levels of inconsistent response."
4. "When no reconciliation was done for these six attitudinal items, about half of the items showed moderate levels of inconsistency, 30 percent were in the low level and 20 percent were in the high inconsistency level."

The range for evaluating inconsistency is from 0-100. "The rule of thumb is that indices below 20 are low; indices from 20-50 are moderate, indicating that there is some problem with inconsistent reporting; those over 50 are high, indicating that improvements are needed in the method used to collect these data or that the category concepts themselves are ambiguous."

The results of this study were based on sample data so there is sampling error associated with these estimates of nonsampling error. Therefore, the possibility of such errors should be taken into account when considering the results.

Coverage errors.—It is believed that the AHS new construction sample had deficiencies in the representation of both conventional new construction and new mobile homes and trailers in permit-issuing areas. During the sampling of building permits, only those issued January 1, 1970, or later were eligible to be sampled to represent conventional new construction in permit-issuing areas of the SMSA. It had been assumed that units with permits issued prior to 1970 would have been completed by the time of the 1970 census (i.e., April 1970), and, therefore, would have been represented in the sample selected from 1970 census units. However, it has been estimated that, nationally, there were about 600,000 conventional new construction units built after April 1970 whose permits were issued prior to January 1970 (most of which were issued in 1968 and 1969). Table II contains, for each SMSA, an estimate of the number of conventional new construction units that had permits issued prior to January 1970, and, therefore, were missed by the 1975 AHS-SMSA survey.

In addition, unlike the procedure for conventional new construction, there is no sampling procedure specifically for new mobile homes (and trailers) in permit-issuing areas. However, new mobile homes in permit-issuing areas do come into sample if the mobile homes are located in mobile home parks identified as such in the 1970 census. Nonetheless, new mobile homes, in permit-issuing areas that are located in mobile home parks not in existence at the time of the 1970 census or not identified as such in the 1970 census, have no chance of coming into the AHS sample. For each SMSA, an estimate of the number of new mobile homes in permit-issuing areas that were missed by the 1975 AHS-SMSA survey can be found in table II. The second-stage ratio estimation was employed to reduce the effect of both these deficiencies, although some bias in the AHS data still exists.

Rounding errors.—The rounding of estimates introduces another source of error in the data, the severity of which depends on the statistic being measured. The effect of rounding is significant relative to the sampling error only for small percentages and medians derived from relatively large bases (e.g., median number of persons and median number of rooms). This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.

Sampling errors for the AHS-SMSA sample.—The particular sample used for this survey is one of a large number of possible samples of the same size that could have been selected using the same sample design. Even if the same schedules, instructions, and enumerators were used, estimates from each of the different samples would differ from each other.

TABLE II. Estimated Number of New Construction Units Missed by the 1975 AHS-SMSA Survey

SMSA	Missed units		SMSA	Missed units	
	Conventional new construction	New mobile homes		Conventional new construction	New mobile homes
Atlanta, Ga.	10,100	5,200	Milwaukee, Wis.	4,000	1,000

Colorado Springs, Colo.	1,800	1,900	Rochester, N.Y.	2,800	700
Columbus, Ohio	3,700	1,800	San Antonio, Tex.	2,900	400
Hartford, Conn.	4,700	300	San Bernardino-Riverside-Ontario, Calif.	3,100	10,300
Kansas City, Mo.-Kans.	4,700	1,200	San Diego, Calif.	8,900	13,400
Madison, Wis.	1,500	500	Springfield-Chicopee-Holyoke, Mass.-Conn.	1,500	300
Miami, Fla.	17,100	5,300			

The deviation of a sample estimate from the average of all possible samples is defined as the sampling error. The standard error of a survey estimate attempts to provide a measure of this variation among the estimates from the possible samples and, thus, is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

As calculated for this report, the standard error also partially measures the variation in the estimates due to response and enumerator errors (nonsampling errors), but it does not measure, as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the sampling and nonsampling errors, measured by the standard error, biases, and some additional nonsampling errors not measured by the standard error.

The sample estimate and its estimated standard error enable one to construct interval estimates in which the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples may or may not be contained in any particular computed interval. (However, for a particular sample, one can say with specified confidence that the average result of all possible samples is included in the constructed interval.)

The figures presented in the following tables are approximations to the standard errors of various estimates shown in this report for these SMSA's. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than precise standard errors for any specific item.

Tables IV through XII present the standard errors applicable to estimates of characteristics of the 1975 housing inventory. An index to these tables can be found in table III. Linear interpolation should be used to determine the standard errors for estimates not specifically shown in these tables.

For ratios, 100 x/y, where x is not a subclass of y, tables VI through XII underestimate the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\left(\frac{x}{y}\right)\sqrt{\left(\frac{\sigma_x}{x}\right)^2+\left(\frac{\sigma_y}{y}\right)^2}$$

where: x = the numerator of the ratio
y = the denominator of the ratio
σ_x = the standard error of the numerator
σ_y = the standard error of the denominator

Illustration of the use of the standard error tables.—Table A-1 for the Atlanta,

TABLE III. Index for SMSA Percentage Tables

Ga., SMSA (Total), shows that in 1975 there were 69,900 owner-occupied housing units with garbage collection service once a week. Interpolation in table IV of this appendix shows that the standard error of an estimate of this size is approximately 1,800. Consequently, the 68-percent confidence interval, as shown by these data, is from 68,100 to 71,700 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1975 owner-occupied housing units lying within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate derived from all possible samples, lies within the

1,500,000..	-	-	-	15,030	-	-	11,300	-	-	-	-	-
2,000,000..	-	-	-	16,440	-	-	-	-	-	-	-	-

interval from 67,020 to 72,780 housing units with 90 percent confidence; and that the average estimate lies within the interval from 66,300 to 73,500 housing units with 95 percent confidence.

Table A-1 for the Atlanta Ga., SMSA (Total), also shows that of the 69,900 owner-occupied housing units with garbage collection service once a week, 4,900, or 7.0 percent, had a family and primary individual income between $5,000 and $6,999. Interpolation in table VII of the appendix shows that the standard error of the 7.0 percent is approximately 0.7 percentage points.

Consequently, the 68-percent confidence interval, as shown by these data, is from 6.3 to 7.7 percent; the 90-percent confidence interval is from 5.9 to 8.1 percent; and the 95-percent confidence interval is from 5.6 to 8.4 percent.

Differences.—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard error of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristic in two different SMSA's or the difference between separate and uncorrelated characteristics in the same SMSA. However, if there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error; and if there is a high negative correlation, the formula will underestimate the true standard error.

Illustration of the computation of the standard error of a difference.—Table A-1 for the Atlanta Ga., SMSA (Total), shows that in 1975 there were 14,500 owner-occupied housing units with garbage collection once a week that had a family and primary individual income between $10,000 and $14,999. Thus, the apparent difference, as shown by these data, between the number of owner-occupied housing units with garbage collection service once a week that had a family and primary individual income between $5,000 and $6,999 and the number that had a family and primary individual income between $10,000 and $14,999 is 9,600. Table IV shows the standard error of 4,900 is approximately 490 and the standard error of 14,500 is approximately 830. Therefore, the standard error of the estimated difference of 9,600 is about

$$960 = \sqrt{(490)^2 + (830)^2}$$

Consequently, the 68-percent confidence interval for the difference is from 8,640 to 10,560 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of this difference lying within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 8,060 to 11,140 housing units, and the 95-percent confidence interval is from 7,680 to 11,520. Thus, we can conclude with 95-percent confidence that of the number of 1975 owner-occupied housing units with garbage collection service once a week, the number with an income between $10,000 and $14,999 is greater than the number with an income between $5,000 and $6,999 since the 95-percent confidence interval does not include zero or negative values.

Medians.—For medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median so that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From the appropriate standard error table (tables VI through XII) determine the standard error of a 50-percent characteristic on the base of the median.

2. add to and subtract from 50 percent, the standard error determined in step 1, and
3. using the distribution of the characteristic, read off the confidence interval corresponding to the two points established in step 2.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval for a median.—Table A-1 for the Atlanta, Ga., SMSA (Total), shows the median income of owner-occupied housing units with garbage collection service once a week is $13,900. The base of the distribution from which this median was determined is 69,900 housing units.

1. Interpolation in table VII shows that the standard error of 50 percent on a base of 69,900 is approximately 1.4 percentage points.

2. To obtain a 95-percent confidence interval on the estimated median, initially add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 47.2 and 52.8.

3. From table A-1 for the Atlanta, Ga., SMSA (Total), it can be seen by cumulating the frequencies for the first 4 categories that 23,800 owner-occupied housing units, or 34.0 percent, had a family and primary individual income less than $10,000 and that an additional 14,500, or 20.7 percent, had a family and primary individual income between $10,000 and $14,999.

By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about:

$$\$9{,}999 + (\$14{,}999 - \$9{,}999)\left(\frac{47.2 - 34.0}{20.7}\right) = \$13{,}190$$

Similarly, the upper limit of the 95-percent confidence interval is found to be about:

$$\$9{,}999 + (\$14{,}999 - \$9{,}999)\left(\frac{52.8 - 34.0}{20.7}\right) = \$14{,}540$$

Thus, the 95-percent confidence interval ranges from $13,190 to $14,540.

WORLD DEMOGRAPHIC MAPS

These three maps provide specific data on the fertility, population growth, and mortality patterns of the world. They were developed by the International Statistical Programs Center of the Census Bureau for the Office of Population, Agency for International Development. Each map measures 10½ x 16 inches and is printed in color.

World Fertility Pattern, 1972. (ISP-WCF-72) Births per 1,000 population are indicated for each country. Four separate tones of red and yellow show levels of fertility.

World Population Growth Patterns, 1972. (ISP-WCG-72) Annual rate of population growth is shown by percent for the countries of the world. Four separate tones of blue and yellow show levels of growth.

World Mortality Pattern, 1972. (ISP-WCM-72) Deaths per 1,000 population are indicated for each country. Three separate tones of brown and yellow show levels of mortality.

Each map is priced at 25 cents.
