16. Abstracts  This document is one of a series comprising documentation for the PTI/APWA Equipment Management Information System; a system tailored to the special needs of local governments, developed by Public Technology, Inc. and the American Public Works Association.  The Computer Program Testing Instructions document is for use in conjunction with the Equipment Management Information System Implementation Handbook. It documents the computer tape containing the Equipment Management System computer programs and the system test data for testing these programs. It also describes the procedures for compiling the programs and performing benchmark testing.

INTRODUCTION

These Equipment Management Information System: Testing Instructions are for use in conjunction with the Equipment Management Information System Implementation Handbook. (See Task 1 of the Implementation Handbook).

These Instructions are for use in benchmark testing the Equipment Management System computer programs as compiled in the receiving jurisdiction and in determining that the job streams have been properly developed.

These Testing Instructions document the computer tape containing the Equipment Management System computer programs and the system test data for testing these programs. They also describe the procedures for compiling the programs and performing the benchmark testing.

The system file assignments as established in the programs provided on the test tape are presented in these Instructions. These file assignments will be helpful in those jurisdictions wishing to change these assignments.

TEST TAPE CONTENTS

EQUIPMENT MANAGEMENT INFORMATION SYSTEM

TAPE CONTENTS

- 1 - All records are 80 characters in length (including VOL and HDR labels)
- 2 - Δ indicates a space
- 3 - Items underlined or circled change for each step

TAPE MARK

Programs are in the following sequence:

File Number or Tape	Program Number	Program Name
1	EMIP01	Equipment Inventory Edit
2	EMIP02	Equipment Inventory Update
3	EMIP03	Equipment Inventory Change
4	EMIP04	Equipment Inventory Select
5	EMIP05	Equipment Inventory Summary/ Detail
6	EMIP06	Fleet Assignment Summary
7	EMFP01	Fuel Edit
8	EMFP02	Pump Reconciliation
9	EMFP03	Fuel Consolidation
10	EMFP04	Monthly Fuel Delete
11	EMFP05	Vehicle/Pump Fuel Detail
12	EMRP01	Repair Order Edit
13	EMRP02	Repair Month-To-Date Update
14	EMRP03	Repair Year-To-Date Update
15	EMRP07	Maintenance Detail Report
16	EMRP11	Shop Performance Report
17	EMRP12	Shop Performance Analysis by Type of Repair
18	EMRP13	Cause of Repair
19	EMMP01	Preventive Maintenance Select
20	EMMP02	Preventive Maintenance Report
21	EMBP01	Billing Edit
22	EMBP02	Departmental Billing
23	EMBP03	Monthly Meter Repair
24	EMGP01	Fleet Summary
25	EMGP02	Class Performance Comparison
26	EMGP03	Equipment/Organization Report
27	EMGP04	Cost-Billed Report
28	EMGP05	Exception Condition Report
29	EMGP06	Monthly Update
30	EMGP07	General File Maintenance
31	EMGP08	Class Operating and Maintenance Characteristics
32	TEST DATA	Test Data

DATA PROCESSING CONVERSION PROCEDURES

EQUIPMENT MANAGEMENT INFORMATION SYSTEM  
DATA PROCESSING CONVERSION PROCEDURES

1. Compile All Programs - Correct any serious compilation errors. Some warnings may remain due to differences between compilers.
2. Dump Test Data - It is necessary to separate the different test decks. The easiest way may be to punch this file to cards.
3. Separate Test Data - Label each test file as indicated on the accompanying listing.
4. Set Up JCL's or Equivalent - Set up JCL's or equivalent for all job steps. Use job flows which are shown in the program documentation.
5. Run First Equipment Inventory Job Stream - Using file EMIF01 - Test 1, run job stream (EMIJ01) for building or updating the master file. This first run will have no master file (EMIF04) as input. Therefore it is necessary to either create a dummy input file with no records, or ignore the file in the job stream if possible.
6. Compare Results of 1st Job Stream - Compare your results with sample reports 1, 2, and 3 (EMSR01, EMSR02, EMSR03).
7. Run First Equipment Inventory Job Stream Again - Using file EMIF01 - Test 2, run the job stream for building or updating the master file (EMIJ01). For this second run you will have an old master file (EMIF04) as input with an updated master file (EMIF04 + 01) as output.  
  
(Always use the most recent equipment master as input to any runs requiring a master file.  
Note: there are four programs in the system which can create an updated

master file. They are as follows:

Program	File #
EMIP02	EMIF04
EMGP06	EMGF05
EMGP07	--
EMBP01	EMBF03).

- 8. Compare Results of Step 7 - Compare your results with sample reports 4, 5, and 6 (EMSR04, EMSR05, EMSR06).
- 9. Run Second Equipment Inventory Job Stream - Using the newly created master file EMIF04, the APWA/ORGANIZATION table (EMGF03) and the following select cards (EMIJ07) run the second job stream (EMIJ02).

Select Cards:

Cols.	0									1									2		
	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0	1
S	A	L	L																		
D	0	0	0	7	1	1															
D							2	L	A	2	F	C	2	A							
D							1	B	A	4	F	C	3	B							
D																0	1	2	2	1	8
D	A	L	L																		
D	9	8	7	6	5	4															

- 10. Compare Results of 2nd Job Stream - Compare your results with sample reports 7, and 8 (EMSR07, EMSR08).
- 11. Run Third Equipment Inventory Job Stream - Using the master file from the 1st run (EMIF04) and the APWA/ORGANIZATION table (EMGF03) as input run the third job stream (EMIJ03).
- 12. Compare Results of 3rd Job Stream - Compare your results with sample report 9 (EMSR09).
- 13. Run First Fuel Job Stream - Using the fuel ticket file test deck (EMFF01), the Fuel Cost Cards (EMFF05), the Pump Number Cards (EMFF04), and the Equipment Inventory Master File (EMIF04) as input along with the following date card (EMFF03) run the first fuel Job Stream (EMFJ01).

Date card (start in column 1)  
EMFP01 b 08/31/76  
(b - indicates a space).

14. Compare Results of 1st Fuel Job Stream

- Compare your results with sample report 10 (EMSR10).

15. Run Second Fuel Job Stream

- Using the Pump Reading Cards (EMFF08), Pump Number Cards (EMFF04), Fuel Cost Cards (EMFF05), Weekly/Month-to-Date Fuel File (EMFF07 - created by edit), and the date card (EMFF09) shown below, run the second fuel job stream.  
Date Card (start in column 1)  
EMFP02 b 08/31/76  
(b - indicates a space).

16. Compare Results of Second Job Stream

- Compare your results with sample report 11 (EMSR11).

17. Run Third Fuel Job Stream

- Using the reconciled fuel file (EMFF10) from the second fuel job stream and date cards (EMFF12 and EMFF15) shown below, run the monthly consolidation program. This first run will not have a fuel history file (EMFF13) as input so you will either have to create a dummy file with no records or ignore the input in the job stream. The reconciled fuel file is then used again used with a second date card (EMFF15) as input to the fuel delete program.

Date Cards (start in column 1)  
EMFP03 b 08/31/76  
EMFP04 b 08/31/76  
(b - indicates a space).

18. Compare Results of Third Job Stream

- Compare your results with sample reports 12 and 13 (EMSR12, EMSR13).

19. Run Fourth Fuel Job Stream

- Using the Month-to-Date fuel file (EMFF10) created by the second fuel program (EMFP02), the APWA/

ORGANIZATION file (EMGF03) and the date card (EMFF13) and select cards (EMFF19) shown below, as input, run the fourth job stream.

Date Card (start in column 1)  
EMFP05 b V b 08/01/76 - 08/31/76.  
Select Card (start in column 1)  
210038b002050b140024b000940.  
(b - indicates a space).

20. Compare Results of Fourth Job Stream - Compare your results with sample report 14 (EMSRL4).
21. Run Fourth Fuel Job Stream Second Time - Using the same files as in step 19 but with the new date and select cards shown below, run the job again.
- Date Card (start in column 1)  
EMFP05 b V b 08/01/76 - 08/31/76.  
Select Card  
ALL.  
(b - indicates a space).
22. Compare Results of 2nd Run - Compare your results with sample report 15 (EMSRL5).
23. Run First Repair Job Stream - Using the Employee Labor Rate Card file (EMRF03), and the Repair file (EMRF01 - Test 1) as input, along with the Equipment Inventory Master File (EMIF04), run the first repair job stream. This first run there will be no month-to-date repair file (EMRF06) as input so the control card (EMRF05) should contain NO in the first two positions.
24. Compare Results of 1st Repair Job Stream - Compare your results with sample reports 16 and 17 (EMSRL6, EMSRL7).
25. Run First Repair Job Stream Again - Using the Employee Labor Rate Card file (EMRF03), the Repair file (EMRF01 - Test 2), the Equipment Inventory Master File (EMIF04) and

the newly created month-to-date repair file (EMRF06) as input along with the control card with YES in the 1st 3 positions run this job over again.

26. Compare Results of This Run - Compare your results with sample reports 18 and 19 (EMSR18, EMSR19).
27. Run Second Repair Job Stream - Using the newest month-to-date file (EMRF06 + 01) as input run the history update program.
- There will be no repair history as input on this initial run so it will be necessary to either create a dummy file or ignore the file in the job stream.
28. Compare Results of the 2nd Repair Job Stream - Compare your results with sample report 20 (EMSR20).

Note: The next three job streams will not have a report history file as input. A dummy file or an ignore for these files will be needed in the job stream.

29. Run Third Repair Job Stream - Using the Month-to-Date file (EMRF06 + 01), and the following control card (EMRF10) and shop employee count file (EMRF11) as input, run the 3rd job stream.
- Control Card (start in column 1)  
EMRF11 b 07/27/76.  
Shop Employee Counts  
1115031000105000002050.  
(b - indicates a space).
30. Compare Results of 3rd Repair Job Stream - Compare your results with sample report 21 (EMSR21).
31. Run Fourth Repair Job Stream - Using the Month-to-Date file (EMRF06 + 01), the following control card (EMRF15), and the APWA/ ORGANIZATION table (EMGF03) as input, run the fifth job stream.
- Control Card (start in column 1)  
EMRF12 b 07/26/76.  
(b - indicates a space).

32. Compare Results of 4th Job Stream - Compare your results with sample report 22 (EMSR22).
33. Run Fifth Repair Job Stream - Using the Month-to-Date file EMFF06 + 01), the following control card (EMRF15), and the APWA/ ORGANIZATION table (EMGF03) as input, run the fifth job stream.  
Control Card (start in column 1)  
EMRP13 b 07/26/76.  
(b - indicates a space).
34. Compare Results of 5th Job Steam - Compare your results with sample report 23 (EMSR23).
35. Run Sixth Repair Job Stream - Using the History Repair file (EMRF07 + 01) created by the 2nd job stream, the Equipment Inventory Master File (EMIF04) and the following control card (EMRF19) and select card (EMRF20) as input, run the sixth job stream.  
Control Card (start in column 1)  
EMRP07 b 06/01/76 b 07/26/76.  
Select Card (start in column 1)  
ALL.  
(b - indicates a space).
36. Compare Results of 6th Job Stream - Compare your results with sample report 24 (EMSR24).
37. Run Monthly Update Job Stream (EMGJ01) - Using the most recent Equipment Inventory Master File (EMIF04), the Month-to-Date repair file (EMRF06), the consolidated fuel file (EMFF14), control card (EMGF02) and insurance card (EMGF24), run the monthly update program.
38. Compare Results of Monthly Update - Compare your results with sample report 25 (EMSR25).
39. Run First Billing Job Stream - Using the new Equipment Inventory Master File (EMGF05), and the

- billing test file (EMBF02) as input, run the 1st billing job stream.
40. Compare Results of 1st Billing Job - Compare your results with sample report 26 (EMSR26).
  41. Run Second Billing Job Steam - Using the most recent Equipment Inventory Master File (from EMBP01 - file EMBF03) the MTD Repair file (EMRF06), the sorted billing transactions (EMBF05), the APWA/ ORGANIZATION file (EMGF03) and the following control cards (EMBF06 and EMBF09), run the second billing job stream.  
Control Cards (start in column 1)  
EMBP02 b 08/31/76  
EMBP03 b B  
(b - indicates a space).
  42. Compare Results of 2nd Billing Job - Compare your results with sample reports 27 and 28 (EMSR27, EMSR28).
  43. Run PM Job Stream - Using the most recent Equipment Inventory Master File (EMBF03), and the APWA/ORGANIZATION file (EMGF03) run the PM job stream.
  44. Compare Results of PM Job - Compare your results with sample report 29 (EMSR29).
  45. Run General Module Job I - Job stream is (EMGJ03). Using the following files and date/control cards run the first general module job.  
Files  
Equipment Inventory Master File (EMBF03)  
MTD repair (EMRF06)  
APWA/ORGANIZATION (EMGF03).  
Control Cards (start in column 1)  
EMGP01 b 08/31/76 bbb 0005000 b 00006600 b 00025  
EMGP02 b 08/31/76  
EMGP03 b 08/31/76  
(b - indicates a space).

46. Compare Results of 1st General Job
- Compare your results with sample reports 30, 31, and 32 (EMSR30, EMSR31, EMSR32).
47. Run 2nd General Job
- Using the Equipment Inventory Master File (EMBF03), the APWA/ORGANIZATION file (EMGF03) and the following date card, run the 2nd general job.
- Date Card (start in column 1)  
EMGP04 b 08/31/76.  
(b - indicates a space).
48. Compare Results of 2nd General Job
- Compare your results with sample report 33 (EMSR33).
49. Run 3rd General Job
- Using the following files and date/control cards, run the 3rd general module job.
- Files  
Equipment Inventory Master File (EMBF03)  
APWA/ORGANIZATION (EMGF03)  
MTD Repair file (EMRF06)
- Control Cards (start in column 1)  
EMGP05 b 08/31/76.
- Exception Condition Cards (EMGF18)  
from test data on tape.
50. Compare Results of 3rd General Job
- Compare your results with sample report 34 (EMSR34) and 35 (EMSR35).
51. Run the 4th General Job
- Using this file maintenance cards (EMGF21) and the newest Equipment Inventory Master file, run the job (EMGJ02) to update the master.
52. Compare Results of 4th General Job
- Compare your results with sample report 36 (EMSR36).
