# Major Changes This Year

(For additional details as well as previous years' changes, see Appendix C)

---

**Dependent interviewing**—Dependent interviewing was greatly expanded in 1999. For a discussion of dependent interviewing and a list of data items affected, see the same topic in Appendix C.

**Income**—Income was collected for all people in the household 16 years and older. In previous surveys, income was collected for all household members 14 years and older.

**Items dropped**—Three items were dropped in the 1999 survey: adequate inside maintenance, buildings and grounds properly maintained, and reverse mortgages.

**Lodgers**—Lodger questions were no longer asked of adult relatives. In addition, the age cutoff was changed from 14 years or older to 16 years or older.

**Main house heating fuel**—A correction was made for vacant housing units to the item “Main house heating fuel.” See same topic in Appendix C.

**New items**—A number of new items were introduced in the 1999 survey. For detailed definitions of these items, see Appendix A. The items are: renter maintenance quality, building and ground maintenance, building neighbor noise, bodies of water within 300 feet, reason extra unit owned, location of extra unit, nights owner spent at extra unit, and nights owner rented extra unit.

**Other housing costs per month**—Several processing errors were discovered and corrected for the category “homeowner association fee paid.” The 1997 and 1998 data for this category are incorrect. The 1999 data are correct.

**Public Elementary Schools**—In 1998 and earlier years, the question on type of school attended was asked of

households with children ages 4 to 16. In 1999, the question was asked of households with children ages 5 to 15. The answer category “does not attend school” was replaced with “schooled at home.” However, instructions to the field representative defined both answer categories as the same, meaning children who did not attend school were counted in the “schooled at home” category.

**Rent reductions**—The item “Rent reductions” is tabulated differently from how it was in earlier years. See same topic in Appendix C.

**Rooms in unit**—In 1999, the collection of room counts by floor was eliminated. Room counts of each type were collected for the housing units as a whole. Also, a probe was modified to ensure that one-room units were not underreported. These changes resulted in higher estimates of one-room units and units with no bedrooms. For a complete discussion of the 1999 procedural change, see same topic in Appendix C.

**Rooms used for business**—As a result of a data collection error, data for this item in 1997 and 1998 were not published. In 1999, the previously suppressed items were corrected and published.

**Year householder moved into unit**—In 1999, a change was made in the way these data were processed. The change allows the year the householder moved in to be earlier than the year the structure was built for mobile homes. The change was made in order to accommodate mobile home householders who purchased a new mobile home but were still living on the same site, making the year their structure was built later than the year they moved in.

# Explanations and Cautions

## EXPLANATIONS

**Survey authority and confidentiality.** The U.S. Census Bureau conducts the American Housing Survey (AHS) to obtain up-to-date housing statistics for the Department of Housing and Urban Development (HUD). Title 12, Sections 1701Z-1 and 1701Z-2g of the U.S. Code authorize the Secretary of HUD to collect data from public and private agencies and protect the confidentiality of the data. Title 12, Section 1701Z-10 mandates the collection of the data for the AHS. The guarantee of confidentiality made to respondents is provided by the Census Bureau. Title 13, Section 9a, of the U.S. Code provides that all information that would permit identification of individuals will be held in strict confidence. Such information may be seen only by sworn Census Bureau employees and may be used only for statistical purposes. Section 214 of Title 13 sets penalties for disclosing confidential information. Unauthorized disclosure of individual information by a sworn Census Bureau employee is punishable by a fine of up to \$5,000 or imprisonment of up to 5 years, or both. The Census Bureau is authorized under Title 31, Section 1535 of the U.S. Code, to perform special work or services for other Federal agencies.

**Contents of book.** This book presents data on apartments; single-family homes; mobile homes; vacant housing units; age, sex, and race of householders; income; housing and neighborhood quality; housing costs; equipment and fuels; and size of the housing units. The book also presents data on mortgages, rent control, rent subsidies, previous unit of recent movers, and reasons for moving.

**Scope of the survey.** The AHS is conducted by field representatives who obtain information from occupants of homes. They get information on vacant homes from informed people such as landlords, rental agents, or knowledgeable neighbors. The time periods involved varied among the metropolitan areas, although the majority of the interviewing occurred in the second half of the year. The 1999 national survey is a sample of about 58,400 interviews conducted every other year. From 1973, when it started, to 1981, the AHS collected national data every year, instead of every other year, and was called the Annual Housing Survey.

## CAUTIONS

Source: These errors were computed based on a formula in Table Y with high error. This table represents a conservative example.

Table A shows the magnitude of these errors from sampling. Nonsampling errors can be even bigger.

As an example of how to use Table A, suppose this book shows 1,000,000 homes of a certain type. The table shows the range of error is 112,000 homes. This means that there is a 90-percent likelihood that the true value is between 888,000 and 1,112,000 homes of this type. More precision cannot be obtained from this survey because the sample size is not larger.

Appendix D gives more detailed formulas to calculate errors for a wide range of items. Appendix D also gives some estimates of nonsampling errors.

**Undercoverage and nonresponse.** Each home in the AHS sample represents a large number of other homes. However, because of incomplete sampling lists (i.e., undercoverage) and nonresponse, the homes in the survey do not represent all homes in the country. Therefore, the raw numbers from the survey are raised proportionally so that the published numbers match independent estimates of the total number of homes. These independent estimates are based on the 1990 Census of Population and Housing, plus changes since then. Housing unit undercoverage and household nonresponse is about 7 percent. Compared to the level derived from the adjusted 1990 decennial census counts, housing unit undercoverage alone is about 1.9 percent.

The weighting procedures used for AHS-National partially correct for the bias due to nonresponse and housing unit undercoverage, but not for within-household undercoverage. The procedures assume the housing units

---

missed by the survey are like those included, which is not entirely accurate. Housing unit undercoverage varies by age, ethnicity, and race of householder, and type of household. For some groups, such as Blacks, the undercoverage is at least 9 percent. Some AHS-National estimates are affected by missed persons within sample households. These are persons per room, square feet per person, some household composition items (for example, persons per household), and income characteristics. We do not know the effect of this within-household undercoverage on these characteristics. Appendix D shows how complete the answers were for each question, before adjustments. Appendix B explains how the numbers were proportionally adjusted.

**Income and poverty.** Historically, the AHS underestimates income and overestimates poverty when compared to the Current Population Survey (CPS). The AHS mentions fewer sources of income than the March CPS. The poverty data in the AHS are not published as an official count of households in poverty, but to show the housing characteristics of low-income households. For a discussion of income and poverty, see Appendix C.

A detailed discussion of AHS income data is presented in the Census Bureau memorandum for the record, "Comparison of 1989 AHS and CPS Income Reporting." The

memorandum for the record, "AHS Poverty Data, 1985 to 1993," presents a detailed discussion of AHS poverty data. Copies of both memoranda can be obtained by writing to the Housing and Household Economic Statistics Division (HHES), at the address given in Table B.

## **DATA AVAILABILITY**

The AHS data are presented nationally as well as for major selected metropolitan areas (see Table B). Table B shows the sources for obtaining AHS data, the product available, and the pricing for each product. Each source or organization sets its own charges, so prices may vary among the sources. For the data user whose needs are not met by the book tabulations (printed books), microdata are available on tapes through 1995 and on CD-ROMs so that data can be tabulated in any way desired. Microdata are also available on the Internet for 1997 and beyond. National data tables are on the Internet for 1993 and beyond. Contact HHES for more details. To protect the confidentiality of the respondent, names, addresses, and areas smaller than 100,000 people are not identified. The sample design generally will not support analysis for areas smaller than those shown in the books.
