

Guidelines for Preparing a Report for Publication

Prepared for

U.S. Department of Housing and Urban Development
Office of Policy Development and Research

July 2020

Introduction

During fiscal year 2019, those interested in the U.S. Department of Housing and Urban Development's (HUD's) research accessed more than 12 million downloadable files from huduser.gov, the Office of Policy Development and Research's (PD&R's) website.

The HUD USER Clearinghouse, PD&R's research information service, continued to experience demand for printed copies of products and, during that same year, distributed approximately 75,000 studies and reports to interested constituents through its Web Store, via subscription, and by other means.

This guide was prepared initially in 2001 in response to numerous inquiries received by PD&R's Research Utilization Division (RUD) from HUD staff and contractors about publication standards and guidelines and how to prepare reports for publication. Compiled into a single volume that can be readily shared with others, this guide addresses standards and frequently asked questions concerning various areas of the PD&R style guide and publication standards.

It goes through a typical report section by section, providing explanations, tips, and dos and don'ts. It provides suggestions for making publications ready for timely web posting and offers helpful hints for those asked to prepare material based on research findings.

RUD ensures that PD&R's publications reflect HUD's graphic and industry standards, are appropriately formatted for print, and are accessible online as quickly as possible after completion. RUD's goal is to make this guide useful to HUD staff and contractors.

As technology and publication policies change, RUD will update the contents and will welcome suggestions from the guide's users.

I. Where and How to Begin

Creating a publication is a joint endeavor between the author and support staff, which includes writers, editors, graphic artists, layout and design specialists, and printers. In the U.S. Department of Housing and Urban Development (HUD) Office of Policy Development and Research (PD&R), the Research Utilization Division (RUD) serves as the resource for the authors and contractors who have publication questions. Because RUD's primary function is to disseminate the results of PD&R research, its staff members are highly experienced in packaging research to make it appealing to readers and to market it to interested constituents.

Contracting Officers' Technical Representatives (COTRs) are responsible for the accuracy and completeness of research studies that contractors, grantees, and holders of cooperative agreements produce. When the product is the result of inhouse research, the author is the

responsible party. The COTR or inhouse author is responsible for arranging staff-level technical reviews and developing a draft into a technically acceptable final product ready for publication.

RUD staff are available to assist the COTR, author, or any member of the support staff with issues such as formatting, professional editing and proofing, publishing, and dissemination of the document (see Section III, Preparing a Report, and Section IV, Publishing a Report).

When the COTR or author has a substantively satisfactory draft, RUD organizes a Research Utilization Committee (RUC) meeting that involves all interested parties. The RUC meeting attendees discuss dissemination issues and agree on a dissemination plan. RUD staff document the dissemination agreement, review the final draft for publication readiness, have (as appropriate) the covers and pages designed, and oversee the clearance and publication process.

II. Elements of a Report

Covers

HUD assumes responsibility for designing and printing the final covers. Covers submitted with research material from outside organizations will not be used in print or on huduser.gov.

Front Matter

Front matter includes everything before the body of the report, such as letter from the Secretary, title page, acknowledgments, disclaimer, foreword, table of contents, list of exhibits, and executive summary. The elements of the front matter appear in the following order.

Letter from the Secretary

HUD assumes responsibility for providing the letter from the Secretary if the Office of Public Affairs determines that one should appear in the publication.

Major publications, however, deserve the author's recommendation for a letter from the Secretary or Deputy Secretary.

Disclaimer

Contractors who produce independently written reports that HUD chooses to publish will place the following disclaimer at the bottom of the acknowledgments page for online publications and at the bottom of the inside front cover for printed publications.

"The contents of this report are the views of the contractor and do not necessarily reflect the views or policies of the U.S. Department of Housing and Urban Development or the U.S. Government."

Title Page

The title page includes the exact, accurate title of the publication. The title page might also include the date of publication (month and year with no comma between); the organization name (do not include the street address); and the names of author(s) or program sponsor(s). The organization logo may not be included. HUD employees may appear as authors only if they are solely

responsible for the text (that is, if they have personally performed the research and written the report). HUD policy does not permit COTR names on title pages. Example 1 depicts a sample title page based on this publication.

Example 1

Acknowledgments

The acknowledgments appear on the reverse of the title page. In this section, the author references or thanks COTRs or other helpful contributors.

Foreword

HUD assumes responsibility for providing the foreword, when appropriate. forewords are reserved for signed policy messages, usually from an Assistant Secretary. Major publications deserve the author's recommendation for a foreword.

Table of Contents

The table of contents page lists the main sections of the text and clearly indicates the hierarchy of headings using indentation (see "Headings" in Section III, Preparing a Report). If using the automated Table of Contents feature in Word, the hierarchy may be indicated by larger and/or bolded fonts for the main sections. The contents page also lists page numbers for any appendixes and references sections. Items that precede the contents page in the document (letter from the Secretary, acknowledgments, disclaimer, or foreword) are not included on this page.

List of Exhibits

A list of exhibits immediately follows the contents list when the publication includes five or more tables, illustrations, graphs, figures, or charts within the text. The list of exhibits immediately follows the table of contents. Exhibits are listed in the order in which they appear.

Executive Summary

An executive summary is strongly recommended for reports longer than 50 pages. **The executive summary should be no longer than five single-spaced pages** and include only what readers must know to understand the thesis of the report.

Note that the executive summary is a summary of the report and, as such, should be an original section; it should not repeat sentences and paragraphs verbatim from the report.

Body of the Report

The body of the report is the main text. Chapters and sections within a chapter are designated with different heading levels, which help illustrate how the report is organized. (See Section III, Preparing a Report, for full details.)

End Matter

End matter includes everything that follows the body of the report, such as the appendixes and references. Elements of the end matter may be listed in the table of contents.

Appendixes

When relevant information is either too long or too detailed to be included in the main text of the report, it is presented in one or more appendixes. Charts or graphs may also be included in appendixes. Note that the spelling of “appendixes” (not “appendices”) conforms to Government Publishing Office (GPO) style (see Section V, Style Guide for PD&R Reports). The word “appendix” is lowercase when referred to in the report.

Example: “See appendix A,” not “See Appendix A,” unless the reference is to the complete title—see Appendix A, Glossary.”

Note: Appendixes are lettered (Appendix A, Appendix B), not numbered (Appendix I, Appendix II).

References or Works Cited

The references and/or works cited list is placed after the appendixes because the appendixes might contain citations that appear in the references list. A discussion of the proper styling of references entries appears in Section VI, Citations and References for PD&R Reports.

III. Preparing a Report

For Authors

Software Recommendations

Use Microsoft Word for text. For spreadsheets or charts, use Microsoft Excel or check with the COTR. Graphic elements, such as maps or high-resolution photos, to be used in reports that are slated for full graphic design or formatting are required in a JPG, PNG, EPS, or PDF file format. Check with the COTR to confirm proper file type.

Draft Preparation

When writing a draft for reviewers and editors, keep the format simple and prepare the text file in Word. **Do not use internal links** (including contents page or references), text boxes, or outline formatting. Do not automatically number heading levels. Do not link data in the document to outside source files that might update.

Be aware when creating a draft that HUD reports must comply with federal accessibility standards (Section 508; www.section508.gov). Set up the document using header and paragraph styles. Avoid inserting manual line breaks.

When sending Microsoft Excel files with graphics to reviewers and editors, remove all macros and worksheet links before sending. When possible, **submit all elements of the draft in an editable format**; do not submit picture files or screen captures.

Grammar and Syntax

GPO guidelines (see Section V, Style Guide for PD&R Reports) call for authors to use “standard English grammar” and to “avoid wordiness.” The following list addresses several common pitfalls among authors of PD&R reports. Avoiding these common mistakes will make a report more readable.

- Use active voice (“Congress requires HUD to...”), which is nearly always preferable to passive voice (“HUD is required by Congress to...”).
- Do not begin sentences with conjunctions, such as “and,” “but,”

“nor,” “or,” “so,” and “yet.”

- Avoid using the word “There” to begin a sentence. Such sentences usually are weak. The sentence “There are many HUD programs to help families find housing” is stronger when written as “Many HUD programs help families find housing.”
- Avoid unclear antecedents by including a noun after the pronouns “such,” “that,” “these,” “this,” and “those.” The sentence “That is important” is clearer as “That rule is important.”
- Avoid unnecessary verbiage. The common phrases “a total of,” “as well as,” “in order to,” and “located in” are unnecessary and can be replaced by nothing, “and,” “to,” and “in,” respectively. Likewise, “upon” and “utilize” are unnecessary synonyms for “on” and “use.”
- Be clear about the meanings of “since” and “while.” “Since” refers to elapsed time; using it as a synonym for “because” is a common mistake. “While” refers to a concurrent event; using it as a synonym for “although,” “and,” “but,” or “whereas” is a common mistake.
- Do not end sentences with prepositions such as “with” or “to.”
- Choose prepositions carefully. Prepositions such as “over” and “under,” “higher” and “lower,” and “above” and “below” refer to physical locations. When discussing orders of magnitude, “more” and “less” or “greater than” and “less than” are more accurate. **Exceptions:** “High” and “low” are acceptable in discussions of levels, prices, and rates; “above” and “below” are acceptable in discussions of peaks

and valleys.

- Do not begin sentences with words such as “Additionally,” “Clearly,” “Generally,” “Historically,” or “Of course.”
- Avoid referring to populations as “the poor,” “the elderly,” or “the disabled.” Use “poor (or low-income) people,” “seniors,” and “people with disabilities.” When unavoidable and defined at first use, the use of “the elderly” and “the disabled” will be acceptable if the distinction of the group being referred to is made clear.

Headings

Use different heading levels to organize text and separate sections (example 2). Most reports (including this style guide) use two or three heading levels differentiated by distinct type sizes and effects, such as bold or italic. Using all uppercase letters is acceptable for short headings but becomes difficult to read for longer headings. In such instances, consider using a larger font size in Title Case instead. Set-up heading levels as set styles in Microsoft Word so that an automated Table of Contents can be generated based on the applied styles. (Preset styles can be found in the Styles menu in Word.)

Example 2. Heading Styles

Title Case Heading 1

Heading 1 is a bold, sans serif font that is larger than the body text, which starts on a new line.

Title Case Heading 2

Heading 2 is a bold, sans serif font that is the same point size as the body text, which starts on a new line.

Sentence case heading 3. Heading 3 is bold and is the same font and size as the body text, which continues the same line as the heading. The period after the heading is also bold.

- The number and levels of heading in a document can vary, but consistency in the hierarchy of

headings is important.

- Do not use subheadings excessively; using three levels of headings is most common.
- Use every subheading level that appears in a section at least twice; if only one subsection corresponds to a given level, do not give that subsection a heading.

Footnotes

PD&R prefers footnotes, which appear at the bottom of each page, to endnotes, which appear at the end of the report. Use footnotes for additional comments, clarification, or asides that are not directly relevant to the flow of the main text. Use numbers, instead of letters or asterisks, as footnote reference markers, and number footnotes continuously throughout the document. In the narrative, place the footnote marker after, not before, punctuation such as periods, commas, or close parentheses.

Block Quotes

If the report includes long quotes or quotes from prominent people, such as the President, the Vice President, or the Secretary, set the quote apart from the text. Indent lengthy quoted passages farther from the left and right margins than the main body text is indented. If the quote is by a prominent person, place the person’s name, along with his or her title and/or organization, after the quote (example 3).

Example 3. Block Quote

Set the text of a block quote indented from both margins but otherwise with the same treatment as the body text. Do not use quotation marks before or after the quoted material.

**—Name of person quoted
Professional affiliation on a new
line**

Interior Exhibits: Graphs, Tables, and Illustrations

Use simple, clear graphics that readers can easily understand. To make the document cohesive, use

a consistent style for all graphics. Set-up exhibit titles using a set style in Microsoft Word so that an automated List of Exhibits can be generated based on the applied style. (Preset styles can be found in the Styles menu in Word.)

Example: If data in one table are in thousands, present similar data in similar tables in thousands also.

For simplicity, classify all types of tables, charts, graphs, text boxes, and illustrations under the generic label of “exhibit.” If this label is not appropriate in a given report, use separate labels but keep the categorizing consistent.

Provide graphics in their original (editable) format as separate/native files and include instructions on their placement in the text. Original graphics will be only manipulated in the event a change or edit is required, otherwise graphics will be left as they are placed in the report by the authoring group. Unless the report is being fully designed or formatted by HUD or their designers, graphics should be placed in the report in their proper location by the authoring group. Original (editable) files can be Microsoft Excel files (for charts, graphs, tables, or exhibits) or Adobe Illustrator files (for drawings or illustrations; be sure to outline fonts and embed art). If the Adobe Illustrator files are not available, please use a medium- to high-resolution JPG or PNG file.

Send photographs at a resolution of at least 300 dpi (dots per inch) when the image is at printed size.

Number and title each exhibit. Include footnotes as appropriate to identify sources of statistical data, explain acronyms and abbreviations, and provide information that supports the exhibit. Use solid colors and lines to indicate various patterns (example 4). Use fill patterns in the following order—black, white, horizontal lines, vertical lines, diagonal left, diagonal right, checkered. Avoid shading in exhibits that require more than three shades because, in the event the report is printed in gray scale, variations of gray are difficult to differentiate from each other

(example 5).

Place the exhibit as close as possible to its text citation, usually immediately after the paragraph with the citation.

Place the exhibit on the same page as its text citation if at all possible. In the event of a large exhibit or a citation very near the end of a page, ensure the exhibit appears on the page (or pages) that immediately follows. In the text, describe an exhibit by its title or number, not “the preceding chart” or “the following table.” Number exhibits in the order in which they appear in the text and make the citation format consistent throughout.

Photographs of people must illustrate diverse groups, including people of varied ethnicity and, when relevant, people with physical limitations. Photographs must be accompanied by a noted source and, when applicable, a caption.

Headers and Footers

Insert headers and, if appropriate, footers on all pages except the title page and reverse title page. If the final page of a printed report is a blank even-numbered (left-hand) page, do not include a header or footer on that page.

Headers contain the title of the report or the chapter or section heading. Footers contain the page number. Include additional information (for example, the authors’ names if each chapter of a larger publication has a different author) as appropriate. Footers are unnecessary if all the needed information, including the page number, fits comfortably in the header. Do not put a contractor’s name in the header or the footer. The first page of a section does not have a header if it would have the same text as the title of the

Example 4. Graphic with Lines

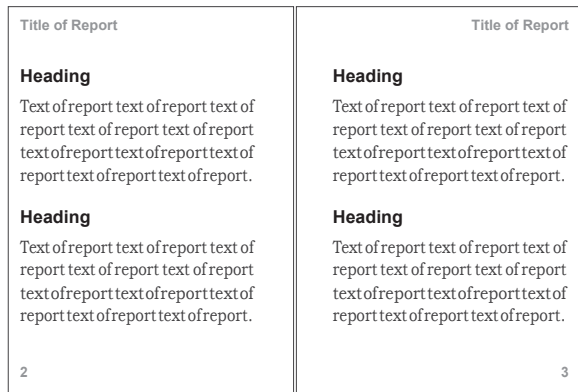

Example 5. Graphic with Gray Shading

section.

Pay attention to the placement of headers and footers when producing a bound document. Place the focus of the header on the outside of the page rather than on the inside. Right-hand (odd-numbered) pages have page numbers and headers toward the right margin of the page. Left-hand (even-numbered) pages have page numbers and headers toward the left margin of the page. Facing pages (even numbers on the left and odd numbers on the right) appear as mirror images (example 6).

Example 6. Bound Document with Headers and Footers on the Outside Margins of Facing Pages

For online reports, center the focus of the header and footer on the page, because odd- and even-numbered pages are not treated differently, as they are in a bound document (see the previous section, "Pagination").

Page Numbering

Include all the pages of a document (including blank pages) when counting page numbers. Do not print numbers on the title and acknowledgment/ disclaimer pages or on a blank final page of a report. Use lowercase Roman numerals to number the front matter in the following order (example 7).

- Disclaimer (reverse of the cover, opposite the title page)
- Title page (count but do not print the page number).
- Acknowledgments page (the reverse of the

title page; count but do not print the page number).

- Foreword or preface (print Roman numerals).
- Contents (print Roman numerals).
- List of exhibits (print Roman numerals).
- Executive summary (print Roman numerals).

The first page of the body of the report is a right-hand page (in a bound report) and is Arabic numeral 1. Continually number, with Arabic numerals (2, 3, 4, and so on), every subsequent page in the body of the report, including blank pages.

When including appendixes to the report, number the pages A-1, A-2, A-3; B-1, B-2, B-3; and so on. If appendixes are included, the References or Works Cited list is the last appendix and is numbered as such. In the absence of other appendixes, however, the pages of the References or Works Cited section are numbered with Arabic numerals, continuing from the main body of the report.

For consistency, adhere to the basic order outlined in this section. Not all HUD and PD&R publications contain every section in the preceding list, however.

Page Orientation

Printing from left to right across the short side of

Example 7. Page Numbering

the page is called portrait (or vertical) orientation. Printing across the long side of the page is called land-Portrait orientation is appropriate for most documents. For special documents, including those that have wide tables, charts, or graphs, a landscape orientation may be more suitable. Portrait and landscape orientations can also be mixed, such as in a document that is primarily text but has several wide illustrations.

Justification, Spacing, and Line Length

Left-aligned (flush left) text with ragged-right text is preferred to fully justified (flush left and flush right) text, which can result in uneven spacing between words in a line and is generally considered more difficult to read. Use only single spacing after the end punctuation of a sentence throughout the document; double spacing between sentences is a carryover from the days of the typewriter and is not the modern industry-standard for publications.

This paragraph is the only fully justified text in this document. All other text is left justified. Note how the number of spaces between words and sentences varies, making it more difficult to read.

Fonts

In thinking about the design of the publication, remember to limit the number of fonts, sizes, and styles (such as bold or italic) in a document. Inconsistently mixing fonts, sizes, and styles can overwhelm the reader; RUD recommends using no more than three different styles on a page. A serif font, such as Times New Roman, is the industry's most popular for running text. Typographers believe that serifs encourage the horizontal flow of the reader's eyes. A sans serif font, such as Arial, is the industry's most popular for headlines, titles, and visual elements such as tables (example 8).

The most commonly used serif typefaces for the body of a report are Book Antiqua, Cambria, Garamond, and Times New Roman. The most common font sizes are 10 and 12 point. PD&R prefers that its authors deliver reports with 12-point Times New Roman body text.

For headings, titles, and visual elements, a sans

serif typeface is suggested. The most commonly used typefaces for headings and titles are Arial, Calibri, Century Gothic, and **Impact**. PD&R prefers that its authors deliver tables in 10-point Arial.

Example 8. Common Fonts and Styles

Serif fonts such as this 10-point Bookman Oldstyle have small lines at the ends of elements that embellish a basic letter.

Sans serif fonts such as this 10-point Helvetica Neue Light are straight.

Because italic text is difficult to read, use it sparingly for contrast and impact but not for large blocks of text.

Bold-Faced Text Is Usually Reserved for Headings and Chapter Titles.

Use no more than two different typefaces and no more than three different font sizes to indicate various heading levels in the same report. Style the different levels consistently throughout the report. Headings can also include boldface type and/ or small capital letters. PD&R recommends using standard fonts, unless absolutely necessary, for ease of printing (see "Complex Documents" in Section IV, Publishing a Report).

For Designers

Pagination

When preparing a document for printing, begin each major section (contents, appendixes, references, and so on) or chapter on an odd-numbered, or right-hand, page.

The only exception to this rule is the acknowledgments and disclaimer page, which appears on the reverse of the title page. Insert blank pages in appropriate places to ensure that the first page of each chapter or major section begins on an odd-numbered page. If a document is to be folded and stapled (see "Binding Options" in Section IV, Publishing a Report), make sure the number of pages in the document is divisible by four.

To account for binding, allow a wider margin on the inside of the page; that is, the wider margin

would be on the left of odd-numbered pages and on the right of even-numbered pages (example 6).

Most word-processing programs have a “mirror margins” function that will create a wider margin on the inside of the document (also called the “gutter”).

When preparing an online publication, do not account for left-hand and right-hand pages. The reader will scroll through a document one page at a time instead of seeing two facing pages at a time. Do not insert blank pages; start chapters or sections on both even-numbered and odd-numbered pages.

IV. Publishing a Report

Report Finalizing

All content/reports, once submitted in final form, will be edited by a professional editor using track changes, reviewed and approved by the author and the COR. All content will then be reviewed during HUD's internal clearance process. After clearance, select reports will be formatted or designed by a professional design team. All reports will be made 508 compliant by HUD-approved contractors after final approval.

Online Posting

If the report will be posted on the web directly, create an electronic version (usually PDF, or Portable Document Format) of the document that includes all elements of the report, including the front (and, if appropriate, back) covers and graphics. Do not insert blank pages. Center the focus of headers and footers.

Center the printed material on the pages; do not account for gutters. (See "Pagination" and "Headers and Footers" in Section III, Preparing a Report.) Use a lower resolution than is necessary for print publications to minimize the size of the electronic file.

Note that federal law requires all web-based government publications to be accessible to people with disabilities, including those with vision impairments. Before you deliver the electronic version, ensure that all elements of the report are Section 508 compliant (see www.section508.gov). Ensure the accuracy and completeness of all document tags and bookmarks. Ensure that the page structure is correct and that the 508 reader will read document elements in the correct order. Ensure the accuracy and completeness of the alternate text used to describe visual elements.

If the end product will be a web page, please refer to the HUD web publication standards at <http://portal.hud.gov/hudportal/documents/huddoc?id=WebPubStandards.pdf>.

Complex Documents

If the report is going to a printer for hard-copy dissemination, it is important to include all fonts in the packaged files because printers may not have the same fonts or font versions in their collection. If you do not send the fonts, the printer may choose substitute fonts that could adversely affect the look of the document.

If applicable, package all InDesign files when submitting for print (for a checklist, see the next section, "Professional Versus Inhouse Printing"). Files may be loaded onto a flash drive or uploaded to a secured file share site for submittal.

Professional Versus Inhouse Printing

For reports that are marked to be printed, high-profile, high-priority, and especially long documents require professional printing (through GPO). If a report is short or is for a small audience (100 or fewer copies), PD&R will print the report in house. Report deadlines also influence the production method. Professionally printed documents require more time to produce than those printed in house and are more expensive to create.

Submit documents to HUD in a manner appropriate to the chosen method of reproduction. Submit a report for in-house printing in hardcopy and electronic formats, as discussed previously in the "Hardcopy Versions" section.

For more sophisticated documents produced in layout software, provide a complete (printed and electronic) desktop publishing package. Include the following items—

- Correctly labeled, high-resolution electronic file with crop marks.
- Printout with crop marks.
- GPO Form 952 (Desktop Publishing Disk Information).

Consult the COTR with any questions about this list if a camera-ready package is required.

Binding Options

Documents printed in house can be mechanically bound using spirals, loose-leaf rings, post, or combs. Short documents can be stapled down the left margin or printed on 11-by-17-inch paper, folded, and stapled in the gutter between two pages (ensure the page count is divisible by four). Longer documents—generally of 100 or more pages—are professionally printed and perfect bound (glued at the left edge, creating a spine). For more information, consult the COTR.

Legal Issues

Permission To Publish HUD Publications

Works published without copyright (for example, all government publications) are in the public domain and may be reprinted without charge or permission. Any copyrighted material in the report, however, remains protected. HUD requests that, if a commercial publisher wishes to reprint portions from a HUD report, the publisher makes no changes to the material. HUD also requests that the publisher include a citation or credit line that identifies HUD as the author and identifies the title of the publication as the source of the material.

Publication of Reports by Contractors

Standard contract provisions state that, unless a research report has already been cleared for publication and made available to the public by the government, the contractor that prepared it may not disclose its contents to the public or publish it for 3 months after the acceptance of the final report unless the contracting officer has given written permission. Include the following notice in the contractor's publications.

Research was performed under contract with the U.S. Department of Housing and Urban Development, Office of Policy Development and Research.

If the report was prepared with HUD funds, the contractor may copyright the layout and design but not the substantive language, which remains

in the public domain.

Publication of Reports by Those in Cooperative Relationships

Unless the government has already made the report available to the public, those in a cooperative relationship (grantees and holders of cooperative agreements) cannot publish the report for 60 days after the acceptance of the full report unless the grant or cooperative-agreement officer has given written permission. In such a case, the publication must contain one of the following two notices.

The work that provided the basis for this publication was supported by funding under a grant from (or cooperative agreement with) the U.S. Department of Housing and Urban Development. The substance and findings of that work are dedicated to the public. The author and publisher are solely responsible for the accuracy of the statements and interpretations contained in this publication. Such interpretations do not necessarily reflect the views of the government.

or

The contents of this report are the views of the [contractor, grantee, or holder of this cooperative agreement] and do not necessarily reflect the views or policies of the U.S. Department of Housing and Urban Development or the U.S. Government.

Place either paragraph at the bottom of the title page or of a blank page immediately following the title page. Like contractors, those in cooperative relationships may copyright the layout and design of a report but not its substantive language.

Inhouse Publications

For an inhouse study, place the following notice on the front or back of the title page.

The research forming the basis of this report was conducted by the [Division] in the U.S. Department of Housing and Urban Development, Office of Policy Development and Research.

Copyrights, Patents, and Trademarks

The U.S. Government can be held liable for damages if it is found to have infringed on a

copyright, patent, or trademark. The author of a report must obtain and present to PD&R written permission to use such material from the holder of the rights. This rule applies to all publications prepared for internal or external use.

The rights holder might dictate the wording and placement of the credit. If so, follow his or her guidelines. If not, place the following notice on the back of the title page.

Material on page [x] reprinted from [title of publication] by [author] by permission of [holder of copyright], [year of publication].

Trade and Manufacturers' Names

Avoid the appearance of endorsing or favoring commercial products. If the report will not be meaningful without referring to the products, mention them only with approval. After receiving approval, include the following notice on the back of the title page.

The U.S. government does not endorse products or manufacturers. Trade or manufacturers' names appear herein solely because they are considered essential to the object of this report.

V. Style Guide for PD&R Reports

As a federal government agency, HUD uses a modified version of the *U.S. Government Publishing Office Style Manual*. This section includes an overview of GPO style that provides guidance about the elements of language and style that are appropriate for all government publications.

There are certain exceptions where PD&R's preferences for certain elements are more specific than or vary slightly from GPO style. Appendix A. Specific Usage lists terms commonly used in PD&R publications, including some usage that varies from GPO style.

When neither this guide nor the *GPO Style Manual* provides an answer, turn to *The Elements of Style* (Strunk and White) or the most recent edition of *The Chicago Manual of Style*.

Make sure that any publication submitted to HUD is free of obvious spelling and grammatical errors. Use Microsoft Word's spell check feature as you work, and run spell check after making any changes to the document. Remember, however, that a spell check is not fool-proof. Review the document after each round of editing.

General Guidelines

- Follow the GPO Style Manual except where noted in this guide.
- Write reports in the third-person, objective point of view. Avoid using the second person (you, your).
- Avoid wordiness.
- Use standard English grammar.
- Use active voice wherever possible.
- Use politically sensitive vocabulary.
- Use footnotes for additional comments, clarification, or asides that are not directly relevant to the main text flow.
- Use "report," not "paper," when referring to the text.

- For verb forms ending in -ed or -ing, use single final consonants. Examples: focused not focussed, labeled not labelled, benefiting not benefitting.
- Use italic text when a term is defined for the first time in the report. Example: "*Originations* is a term used in mortgage lending."

Abbreviations, Acronyms, and Initialisms

Define abbreviations, acronyms, and initialisms (including HUD and PD&R) the first time they are used and use the acronym thereafter. Except in certain cases, spell out the full term and place the acronym in parentheses immediately following. Redefine acronyms at the beginning of each chapter or major section. If at least 10 pages occur after the previous use of the acronym, spell out the full term again (but do not redefine in parentheses).

- Spell out the term in question at first use, followed by the abbreviation or acronym in parentheses. For subsequent occurrences, use only the acronym. Example: "The U.S. Department of Housing and Urban Development (HUD) researched a project on low-income housing. HUD found..."
- Do not use an article in front of an acronym that is used as a noun. Example: "GPO provides guidance" is correct; "the GPO provides guidance" is incorrect.
- If an abbreviation or acronym is repeated in subsequent chapters, spell out the term at first use in each chapter followed by the abbreviation or acronym in parentheses. **Exception:** Do not redefine HUD in each chapter.
- If an acronym has not appeared for 10 or more pages, repeat the full version before using the acronym again, but reusing the acronym in parentheses is not necessary. **Exception:** HUD.

- Spell out state names in text unless part of a mailing address, metropolitan statistical area, or publishing location in a literature citation.
- Spell out state names and acronyms in the titles of reports, chapters, tables, and charts.
- Do not use a period after the abbreviation for area locations in an address.
Examples: SW, NE
- To indicate the plural of an acronym, simply add s (CDBGs, GSEs). Use an apostrophe only to indicate possession (HUD’s field offices, HMDA’s database).

Agency Address Hierarchy

U.S. Department of Housing and Urban Development
Office of Policy Development and Research
Room 8126
451 Seventh Street SW Washington, DC
20410

Bulleted and Numbered Lists

- Introduce bulleted and numbered lists with a colon, an em dash, or a period.
- Use a colon or a period if the introduction is a complete sentence.
Examples: These items are in this list: The following list includes several items.
- Use an em dash if the introduction is a sentence fragment.
Example: The items in this list are—
- Capitalize the first word of each bulleted or numbered item, and end each item with a period, not with a comma, semicolon, or the word “and.”
- Use Arabic, not Roman, numerals followed by a period, not a parenthesis.
Example:
 1. Red.
 2. White.
 3. Blue.
- Be consistent throughout the document in the formatting and indentation of lists.
- Begin each entry in a bulleted list with a

capital letter and end it with a period.

- Use no line spacing between entries when each entry requires one line; use one line of space between entries if any entry requires more than one line.

Capitalization

- In titles and headings, capitalize all words except prepositions, conjunctions, and articles with three or fewer letters.
Examples: With, Through, Above, for, on, to (prepositions); and, but, Because, Either... or (conjunctions); a, an, the (articles).
- In tables, charts, and exhibits, words in boxheads, table stubs, and graphics labels follow capitalization rules for titles (title case).
- Use lowercase for a descriptive term that denotes direction or position (northern Vermont, south Dade County), but capitalize terms denoting regions in the United States (Northwestern United States, the Northwest).
- Do not capitalize the word “program,” as in Community Development Block Grant (CDBG) program, unless the word is part of the acronym, as in Experimental Housing Allowance Program (EHAP).

Compounding and Unit Modifiers

- Close up the words database, followup (noun or adjective, but “follow up” as a verb), hotline, indepth (adjective), online and onsite (adjective, but “on line” and “on site” as prepositional phrases), policymaker/-ing, decisionmaker/-ing, nationwide, regionwide, statewide, systemwide, and workplace. (See Appendix A, Specific Usage, for other examples.)
- Use a hyphen between words (high-level decision) or abbreviations of words (HUD-sponsored study) that are combined to form a unit modifier immediately preceding the word modified, unless the meaning is clear and readability is not aided by using the hyphen (high school student). Do not hyphenate predicate adjective or adverb phrases (“full-time employee,” but “employed full time”).

- Do not hyphenate a two-word unit modifier when the first word is an adverb that ends in -ly (congressionally chartered group).
- Hyphenate numerical compounds that are unit modifiers (5-year program, three-story building, 20th-century progress).
- Relating to age, hyphenate unit modifiers and noun phrases (18-year-old offender, an 18-year-old) but not predicate adjectives (the offender is 18 years old).

Hyphens and Dashes

- Use a hyphen (-) to connect the elements of certain compound words.
Example: The unit modifier “low-income.”
- Use an en dash (–) in a range of numbers, capital letters, or numbers and capital letters.
Examples: 1989–99, AFL–CIO, exhibit 6–A, pages 239–274.
- Use an em dash (—) in text to indicate a sudden break or abrupt change in thought or to set off matter closely related to the main statement.
Example: HUD focused on larger states—California and Texas—for this report.
- Do not use spaces on either side of a hyphen, en dash, or em dash.
Examples: Low-income housing, 1992–94.
Exception: In tables and figures, the en dash is followed by a space to indicate a negative sign before a numeral, making it easier to read in print.
Example: – 33.
- In text, a hyphen closed-up against the number that follows indicates a negative sign.
Example: -33.
- In tables and figures, follow the en dash by a space to indicate a negative sign before a numeral.
Example: – 33.
- GPO and PD&R style generally call for compound unit modifiers to be hyphenated (for example, “low-income housing”). Omit the hyphen if the first word of the compound

ends in “ly” (for example, congressionally chartered group). For common exceptions, see “Commonly Used Terms” in Appendix A, Specific Usage.

- Do not overuse em dashes and parentheses. They set off matter that is not intended to be part of the main statement but that is important enough to be included.
- Never use an en dash in a “from... to” or “between... and” construction in document text; always use “to,” “and,” or “through.” Be clear about the use of “to” and “through”: “1999 to 2001” covers a span of 2 years and “1999 through 2001” covers a span of 3 years.
Examples: between 1999 and 2001, from 1999 to 2001, from 1999 through 2001.
- Use en dashes for numerical ranges (page numbers, dates, phone numbers, ZIP Codes, and so forth) in tables, figures, and reference lists. Set them solid (no space on either side).
Examples: 623–655 (page range, as in reference entry), 10–11–12 (date), 555–555–5555 (phone number), 22222–2222 (ZIP Code).

Italics

- For emphasis, *italicize* rather than underscore.
- Do not italicize foreign words commonly used in English, but do italicize foreign words not found in Webster’s dictionary.
Examples: “per se,” “et al.”

Numbers

- Spell out cardinal numbers one through nine—except for units of measurement, money, time, and percent—and spell out ordinal numbers first through ninth.
Examples: one unit, first floor, Seventh Street.
- Use a numeral for a single number of 10 or more, unless it is the first word of a sentence.
Example: “Twelve of the 15 researchers attended ...”

- Use numerals for all units of measurement, time, money, and percent.
Examples: 3 inches, 4 hours, \$5.00, 7 percent.
- If a paragraph includes a discussion with more than one number, and one of the numbers is 10 or more, use figures for all numbers that relate to the same subject.
Examples: “The speaker listed 5 universities and 12 community-based organizations in the collaboration,” but, “The five universities in the collaboration cited 12 separate studies.”
- A unit of measure, time, or money that is always expressed in figures does not affect the use of figures for other numerical expressions within a sentence.
Example: “Each of the five girls earned 75 cents an hour.”
- For figures in the millions, billions, etc., not all numerals should be written out unless absolutely necessary. It should be rounded and written as “1.42 million” or “1.2 billion,” etc. for readability.
- Do not hyphenate monetary amounts, and do not write out the word “dollars” when a dollar sign is used (\$4 billion investment, NOT \$4-billion investment or \$4 billion dollar investment).
- Write multiyear periods in the same century as 2011–14, not 2011–2014, except in the case of triple numbers.
Example: use 2000–2001, NOT 2000–01.

Punctuation

- Use commas after each item in a series of three or more words, phrases, letters, or figures when the words “and” or “or” are included.
Example: a, b, and c; red, white, or blue.
- Use a comma before and after explanatory phrases, appositives, and identifiers; after a state when using a city and state name (Newark, New Jersey,) except as a modifier (Newark, New Jersey area); and in a complete date within a sentence (On May 1, 1995,) except as a modifier (The May 1, 1995 data). Do not use a comma for only the month and year (June 1994).
- Use commas sparingly, but use them according to rules of syntax and to aid understanding.
- Use a comma before the “and” or “or” in series of three or more words or phrases (the “serial” or “Oxford” comma).
- Do not use a comma before dependent clauses such as, “The vacancy rate was up from last year but down from 2010.” Use a comma before independent clauses such as, “The vacancy rate was up from last year, but it was down from 2010.”
- Use a semicolon to separate a series of phrases containing commas, to separate statements too closely related in meaning to be written as separate sentences, and for statements of contrast. Minimize the use of the semicolon to join two independent clauses that could stand as separate sentences.
- Place periods and commas inside quotation marks. Place colons, semicolons, question marks, and exclamation points outside quotation marks unless they are part of the material being quoted.
- Do not use an apostrophe with the plural form of an acronym.
Example: “HUD released NOFAs,” not “HUD released NOFA’s.”
- PD&R style generally prefers to omit hyphens in common compound words; that is, “policymaker” instead of “policy-maker,” “preexisting” instead of “pre-existing,” “socioeconomic” instead of “socio-economic,” and so on.
- Place punctuation marks outside parentheses.
Exception: Place periods inside parentheses that enclose a complete sentence.
- Place commas and periods inside quotation marks. Place other punctuation marks outside quotation marks (unless they are part of the quoted material).

- Punctuation immediately following **boldface** or *italic* is also **bold** or *italic*.

General Guidelines for Editing Reports

Read the report word for word to ensure correct grammar, spelling, punctuation, and sentence structure; consistency in style and usage; clarity in meaning and logic; conciseness in verbiage; and adherence to the standards of written English.

Generate a list of acronyms. Search on open parentheses to find defined acronyms. Do a visual search for acronyms not defined parenthetically. Search on each acronym to ensure it is defined on first use (and not on subsequent uses). Search on the full term to ensure the acronym is spelled out on first use and that the full term does not appear again within 10 pages of that chapter/major section.

Check off footnotes as they appear in the text. Check to see if the wording in the footnote fits within the context of the text in which it is found. Also double-check the numbering of the notes, both in the text and in the footnotes.

Confirm that exhibits appear in the correct numerical order and in the order in which they are called out in the text. Confirm that each exhibit is called out in the text before it appears.

After editing the References section and printing the pages in that section, search on open parentheses in the text to find works cited. Check each author-date citation against the corresponding entry in the References section. If the work is not in the References section, include a note—on the page with the author-date citation and in the correct location in the References section—for the author to add it. Search (by first author's last name) for any works in the References section not found by searching on open parentheses. Move any References entries that have no corresponding author-date citation in the text to the Additional Reading section, which follows the References section.

Create a style sheet showing capitalization, hyphenation, and so forth of terms not listed in this guide.

Confirm that all referenced web addresses are

correct. Search for “http” and follow links to confirm they are active. Search for “www” to find any web addresses that do not begin with “http” and do the same.

Search for the pronouns *such*, *that*, *this*, *these*, and *those* to make sure a noun follows these pronouns. Avoid using such pronouns alone to refer to an idea developed in the preceding sentence. Example: “... a HUD program called Choice Neighborhoods. *This program* is ...,” NOT “... a HUD program called Choice Neighborhoods. *This* is ...,”

Editing Charts, Tables, and Graphs

Compare the narrative with the information contained in charts, tables, and graphs to ensure accuracy and consistency. If the author has not included a callout, place an in-text callout before and as close as possible to the placement of the chart, table, or graph.

Correct obvious errors.

Example: A chart lists five states, but the text says that the chart shows only two states.

Query ambiguous discrepancies.

Example: A bar on a graph shows 50 diplomats, but the text refers to the 80 diplomats shown in the graph.

Pay special attention to table and column titles, making certain that the text uses the same language to refer to these items.

Example: A stubhead says, “Growth of cities,” but the text refers to the row in the chart called “Growth in cities.”

Check charts, tables, and graphs as follows.

Charts and Tables

Check overall appearance for—

- A logical reason for any unfilled cells.
- An immediate sense of logical sequential order.
- Consistency within and among all charts and tables in the report.
- Alignment of numbers in columns by ones or by decimals, as appropriate.

Check labeling for—

- Title.
- Vertical and horizontal headings.
- Absence of symbols, unless their lack may cause confusion.
- Avoidance of abbreviations, where appropriate.
- Consistency and parallelism of wording. Check symbols (for example, \$, %) for—
- Appropriateness of use.
- Absence in columns after initial entry.
Note: If every number in a column is a percent or a dollar amount, use the percent or dollar symbol in parentheses in the boxhead above the column and delete the symbols next to the numerals, as needed.

Check number form for—

- Consistent number of places beyond the decimal point within a category.
- Use of 0 (zero) preceding a decimal number less than 1.
Example: 0.1 is correct; .1 is incorrect.
- Use of words for large-number endings.
Examples: 1 million, 2 trillion.
- Use of Roman numerals only in cases in which Arabic numerals could cause confusion.

Check mathematical calculations as follows.

- Spot-check each category (for example, addition, mean, percent) by estimating for reasonableness.
- If one or more entries in a category appear unreasonable, check for correctness by performing the actual calculations, as necessary.
- Cross-check among dependent categories.
Example: If a row of added figures is incorrect, a row of percentages derived from those added figures will probably be incorrect.

The correct order for footnotes in tables is—

- Acronyms (in alphabetical order separated by periods).
Example: HUD = U.S. Department of Housing and Urban Development. PD&R = Office of Policy Development and Research.
- ^aFootnotes. (Table footnote markers are letters, not numbers; no space between marker and note.)
- * Asterisks (separated by periods). Used to indicate, for example, statistical significance.
- Notes: Separated by periods.
- Sources: Separated by semicolons; no end punctuation

Graphs

Check bar graphs, histograms, line graphs, and scattergrams, in general, for—

- Title.
- A vertical axis divided into appropriate, equal intervals and labeled.
- A horizontal axis divided into appropriate, equal intervals and labeled.
- A match between any number label and its graphic representation. Example: A number atop a bar matches the bar's height on the appropriate scale.

Check bar graphs for—

- Equal space between bars.
- When needed for clarity, especially in pictographs and double bar graphs, a legend to symbols, values, or both.

A histogram is a bar graph that shows the number of times data occur within a certain range or interval, usually time. Check histograms for—

- Bars tangential to one another so that each bar shows equal intervals and all bars, taken together, show the complete interval.

A line graph should be used only to show changes and variations over time. This type of graph is the most misused. If a line graph does not show changes over time, query the author and suggest

a change to a bar graph, which is more appropriate. Check line graphs for—

- One axis that shows equal intervals of time.
- Another axis that shows what is occurring over time.
- A line or lines on which all points are connected.
- When needed for clarity, a legend identifying what each line represents, such as in a double or multiple line graph.

A scattergram shows two variables as a set of points. Check scattergrams for—

- A set of points scattered on the plane between the two axes at appropriate places (if those places can be determined).

A circle graph (also called a pie chart) shows the relationship of parts to one another and to the whole. Check circle graphs for—

- Title.
- Labels clearly identifying each section. If the title gives a clear explanation, axis titles may not be necessary.
- Appropriately sized sections, please verify that the numbers of the slices add up to 100.

VI. Citations and References for PD&R Reports

References

Compile a complete list of cited works in the References section at the end of each chapter or at the end of the document. The following style for various types of publications is common but not required. It is important, however, to provide enough information so the reader can locate the cited work. For each cited work, include all authors' first and last names (use initials only when authors are identified by initials in the original work), the year of publication, the complete title, the location of the publisher, the name of the publisher (or the publication in which the work appears), and the page range (if the work is part of a larger publication).

Style. Follow the author-date citations and references list style in *The Chicago Manual of Style*.

Footnotes versus references. Text that strictly references information should not be included in the footnotes; move it to the references list. In the footnote or parenthetical citation, include only the author(s) and year.

Public documents (laws and so on). Cite in footnotes; do not include as full entries in the references list.

References not cited in text. Do not include in the references list. Create a separate list titled "Additional Reading." If the document does not include any references cited in the text but does cite works at the end, the title of the section should be "Selected Reading."

Authors

It is acceptable for an author's name to appear as follows: "Seward, J. Allen." We do not need to spell out the first name and change the second name to an initial. Some authors use their middle name as their dominant name.

Alphabetical Issues

Single-author references come before multiple-author citations that begin with the same name.

- Foster, Daniel R. 1992.
- Foster, Daniel R., and Ernest C. Boose. 1988.

If the reference section includes multiple entries by the same principal author with different "junior" authors, use the last name of the second author to decide who comes first. If the names of the first and second authors are the same, use the name of the third author, etc. For example,

- Burby, Raymond J., Peter J. May, and Robert C. Paterson.
- Burby, Raymond J., David Salvesen, and Mike Creed.

Single Author

Allison, Paul D. 1995. *Survival Analysis Using the SAS System: A Practical Guide*. Cary, NC: SAS Institute, Inc.

Two Authors

Hartman, Chester W.J., and Gregory D. Squires. 2006. *There Is No Such Thing As a Natural Disaster: Race, Class, and Hurricane Katrina*. New York: Rutledge.

- There is no space between initials in an author's name.
- Note the comma that separates the two authors' names.

Three Authors

Cuomo, Andrew M., Susan K. Wachter, and William P. Apgar. 1994. "Urban Sprawl in America: New Approaches," *The Economist* 49 (3): 123–129.

- Note the commas that separate each of the authors' names.

More Than Three Authors

Orr, Larry, Judith D. Feins, Robin Jacob, Erik Beecroft, Lisa Sanbonmatsu, Lawrence F. Katz, Jeffrey B. Leibman, and Jeffrey R. Kling. 2003.

Moving to Opportunity for Fair Housing Demonstration Program: Interim Impacts Evaluation. Washington, DC: U.S. Department of Housing and Urban Development, Office of Policy and Research.

- If a reference entry includes more than three authors, list them all (unless the article author uses “et al.”)
- Author-date citation: Orr et al., 2003 or Orr et al. (2003)

Editors Listed Instead of Authors

Haas, J. Eugene, Robert W. Kates, and Martyn J. Bowden, eds. 1977b. *Reconstruction Following Disaster*. Cambridge, MA: MIT Press.

- Note that “eds.” is lowercased and is set off from the last editor’s name with a comma.

Organization Listed as Author

The Brookings Institution. 1997. *Reconstruction Following Disaster*. Washington, DC: The Brookings Institution Press.

- Note that this entry would appear alphabetically in the “B” section, not in the “T” section.

Suffixes (Jr., Sr., II, III, Etc.)

Frech, Herman E., III, and Ronald N. Lafferty. 1984. “The Effect of the California Coastal Commission on Housing Prices,” *Journal of Urban Economics* 16: 105–123.

- Jr., “II,” and similar elements come after the first name or initials, separated with commas.

Same Author for Multiple References

List all works attributed to one author together in chronological order (**Exception:** In *Cityscape*, use reverse chronology). Use a 3-em dash followed by a period (———.) instead of repeating the author’s name after the first reference.

Examples:

Ihlanfeldt, Keith R. 1991. “The Effect of Job Access on Black and White Youth Employment: A Cross-Section Analysis,” *Urban Studies* 28: 255–265.

———. 1992. *Job Accessibility and the Employment*

and School Enrollment of Teenagers. Kalamazoo, MI: W.E. Upjohn Institute for Employment Research.

Journal Article

LastName, FirstName. Year. “Title,” *JournalTitle* Vol# (Issue#): pg#s.

Example:

Coulton, Claudia, Brett Theodos, and Margery A. Turner. 2012. “Residential Mobility and Neighborhood Change: Real Neighborhoods Under the Microscope,” *Cityscape* 14 (3): 55–90.

Book

LastName, FirstName. Year. *BookTitle*. PublishingCity, ST/Country: Name of Publishing Company.

Examples:

Wang, Jichuan, and Xiaoqian Wang. 2012. *Structural Equation Modeling: Applications Using Mplus*. West Sussex, United Kingdom: John Wiley & Sons.

Winston, Pamela, Ronald J. Angel, Linda M. Burton, P. Lindsay Chase-Lansdale, Andrew Cherlin, Robert A. Moffitt, and William Julius Wilson. 1999. *Welfare, Children, and Families: A Three-City Study Overview and Design Report*. Baltimore: Johns Hopkins University Press.

Chapter in a Larger Work

LastName, FirstName. Year. “Chapter Title.” In *BookTitle*, edited by FirstName Last Name. PublishingCity, ST/Country: Name of Publishing Company.

Example:

Bronfenbrenner, Urie, and Pamela Morris. 1998. “The Ecology of Developmental Process.” In *Handbook of Child Psychology. Vol. 1, Theoretical Models of Human Development*, edited by William Damon and Richard M. Lerner. New York: John Wiley & Sons: 993–1028.

Report

LastName, FirstName. Year. *ReportTitle*. PublishingCity, ST/Country: Name of Publishing Company.

Example:

Burt, Martha R., Dave Pollack, Abby Sosland, Kelly S. Mikelson, Elizabeth Drapa, Kristy Greenwalt, and Patrick Sharkey. 2002. *Evaluation of Continuums of Care for Homeless People: Final Report*. Prepared for the U.S. Department of Housing and Urban Development, Office of Policy Development and Research. Washington, DC: Government Printing Office.

Online Sources

Lastname, Firstname (or Organization Name).
Publication or Revision Year if available. "Title of Web Page." Name of Website. Publishing organization. URL .

Examples:

Bluestone, Barry, and Chase Billingham. 2011. *The Greater Boston Housing Report Card 2011: Housing's Role in the Ongoing Economic Crisis*. Boston: Dukakis Center Publications. www.bostonfoundation.org/uploadedFiles/Sub_Site/web_specials/New_CHTF/GBHRC_Final101411.pdf.

Emergency Shelter Commission. 2012. The 33rd Annual City of Boston Homeless Census. www.bphc.org/healthdata/other-reports/Documents/2012-2013%20Key%20Findings_ESC.pdf#search=annual%20city%20of%20boston%20homeless%20census.

Institute for Children, Poverty, & Homelessness. 2012. "Profiles of Risk: Maternal Health and Well-Being." www.icphusa.org/filelibrary/ICPH_ProfilesOfRisk_No.6_Maternity.pdf.

Author-Date Citations

Reference style is often a function of what is most appropriate for the report, but the most crucial

element is consistency.

PD&R style prefers author-date citations: (Johnson, 1995). Carefully cross-check author-date citations with corresponding reference entries to make sure the information in the citation and reference entry match.

One author. (Johnson, 1995).

Two or three authors. (Johnson, Jones, and Brown, 1995). Write out "and."

More than three authors. (Johnson et al., 1995)

Group, agency, or organization as author. (Federal Reserve Bank of Boston, 1976). If defined in the references, the acronym for a group, agency, or organization is acceptable: (HUD, 2018).

Page number in reference. (Johnson, 1995: 56). This treatment is for quoted material.

Two or more references by different authors. (Bryan et al., 1996 [for more than three authors]; Johnson, 1995; Ross and Jones, 1999). The order of the citations is alphabetical.

Two or more references by same author. (Johnson, 1995, 1997, 1999). **Exception:** In Cityscape, use reverse chronology: (Johnson, 1999, 1997, 1995).

Placement. In general, place references relating to the preceding text immediately before a mark of punctuation. If an author's name is cited within a sentence, place the reference date in parentheses immediately following the name: Carter (1980).

In press. Cite the year as "forthcoming" or "in press." [Sentence-cap in reference list.] Use these terms only for articles that have been accepted for imminent publication. If an article is not actually in press, cite it as though it were an unpublished manuscript.

Appendix A. Specific Usage

Official Names of HUD and HUD-Related Programs

Base Realignment and Closure (BRAC; a process), but Base Closure and Realignment (BRAC) Commission

Chicago Area Project (CAP)

Choice Neighborhoods Initiative (Choice)

Community Advantage Panel Survey (CAPS)

Community Building Initiative (CBI)

Community Development Block Grant (CDBG) program

Comprehensive Community Revitalization Project (CCRP)

Demonstration Pre-Development Grant (DPG) Program

Earned Income Tax Credit (EITC) program

Empowerment Zone/Enterprise Community (EZ/EC) program

Fair Housing Initiatives Program (FHIP)

Family Self-Sufficiency (FSS) program

Gautreaux program

Grey Areas Project (not program)

Home Affordable Modification Program (HAMP)

Home Affordable Refinance Program (HARP)

HOME Investment Partnerships Program (HOME program; HOME)

Homelessness Prevention and Rapid Re-Housing Program (HPRP)

Homeowner Affordability and Stability Plan (HASP)

HOPE VI Program (Housing Opportunities for People Everywhere; do not spell out)

Housing Allowance Demand Experiment (HADE)

Housing Allowance Supply Experiment (HASE)

Housing Assistance Plan (HAP)

Housing Choice Voucher (HCV) program (formerly Section 8)

Housing Development Action Grant (HoDAG) program

Housing Discrimination Study (HDS)

Housing Opportunities for Persons with AIDS (HOPWA) program

low-income housing tax credit (LIHTC)

Low-Income Housing Tax Credit (LIHTC) program

Making Home Affordable Program (MHAP)

Model Cities program

Moderately Priced Dwelling Unit (MPDU) program
Moving to Opportunity (MTO) for Fair Housing demonstration program
Moving to Work (MTW) demonstration program
National Community Development Initiative (NCDI)
National Foreclosure Mitigation Counseling (NFMC) Program
Neighborhood and Family Initiative (NFI)
Neighborhood Development Demonstration Program (NDDP)
Neighborhood Self-Help Development (NSHD) program
Neighborhood Stabilization Program (NSP)
Plan for Transformation (a Chicago Housing Authority initiative)
Promise Zones
public housing
public housing agency (PHA)
Rental Assistance Demonstration (RAD)
Rental Rehabilitation Program
Section 8 Existing Housing Certificate Program
Section 8 New Construction Program
Small Area Fair Market Rent (SAFMR) demonstration program
Supplemental Nutrition Assistance Program (SNAP/food stamps)
Temporary Assistance for Needy Families (TANF)
Tenant Rental Assistance Certification System (TRACS)
Troubled Asset Relief Program (TARP)
Welfare-to-Work program
The Special Supplemental Nutrition Program for Women Infants and Children (WIC)

Commonly Used Terms

A

Abt Associates Inc.	no comma
acknowledgment	not “acknowledgement”
ad hoc	adjective and adverb (do not italicize)
add on; add-on	verb; noun and unit modifier
administration/Administration	initial cap only with proper names; for example, Obama Administration, the administration
African-American	GPO style prefers “Black”; HUD PD&R style prefers African-American (hyphenated)
afterschool	unit modifier
the Agency	when referring to an agency (e.g., CIA) that has “Agency” as part of its name.

air-condition	all forms
ALN Apartment Data, Inc.	
AmeriCorps	
annual average change	refers to change over a 12-month period
anticrime, antigrowth, etc.	follow GPO style
<i>Apartment Insights</i>	
Appalachia; Appalachian Mountains	
appendixes	not appendices
area	no comma when used with city and state; for example, Richmond, Virginia area
assisted	helped by grants or subsidies
assisted-living	unit modifier
Atlantic Coast	differs from GPO style
autumn	lowercase; the autumn of 2015, not autumn 2015
