

Acknowledgment of Extraordinary Obligations

Nancy Gebler
Lisa A. Gennetian
Jens Ludwig
Lisa Sanbonmatsu

The guest editor and authors of the second, fourth, and fifth articles in this symposium (Gebler et al., Sanbonmatsu et al., and Gennetian et al.) have extraordinary obligations to acknowledge the following organizations and individuals for their contributions to the Moving to Opportunity (MTO) for Fair Housing demonstration.

The U.S. Department of Housing and Urban Development (HUD) provided the MTO data. Support for the long-term (10- to 15-year) MTO followup study came from the HUD Contract C–CHI–00808 to the National Bureau of Economic Research (NBER) and funding from the National Science Foundation (SES–0527615), the National Institute of Child Health and Human Development (NICHD) (R01–HD040404; R01–HD040444), the Centers for Disease Control and Prevention (R49–CE000906), the National Institute of Mental Health (R01–MH077026), the National Institute on Aging (P20–AG012180; R56–AG031259; P01–AG005842–22S1), the National Opinion Research Center’s Population Research Center (R24–HD051152–04 from NICHD), the University of Chicago Center for Health Administration Studies, the U.S. Department of Education Institute of Education Sciences (R305U070006), the John D. and Catherine T. MacArthur Foundation, the Smith Richardson Foundation, the Spencer Foundation, the Bill & Melinda Gates Foundation, the Russell Sage Foundation, and a grant from the Annie E. Casey Foundation to the Urban Institute.

The authors thank Todd M. Richardson, Mark D. Shroder, Kevin J. Neary, Erika Poethig, and Raphael Bostic at HUD for their support, advice, and openmindedness about the study design; Larry L. Orr for feedback on the 10- to 15-year MTO evaluation; and Jeffrey R. Kling for his sage advice. J. Lawrence Aber, Jeanne Brooks-Gunn, Charles Brown, Thomas D. Cook, Kenneth Dodge, Felton Earls, Ronald Ferguson, John Goering, Christopher Jencks, Kathleen Mullan Harris, Edgar O. Olsen, Robert Sampson, Eldar Shafir, Laurence Steinberg, and Jane Waldfogel comprised the MTO study’s Technical Review Panel.

The authors also thank numerous other collaborators who assisted with a variety of substantive and methodological components of the MTO study. Conversations with Robert Whitaker of Temple University and James Meigs of Harvard University provided important insights about the analysis and interpretation of the medical findings in the long-term MTO data. Nancy Sampson and her research team at the Harvard Medical School constructed the mental health outcomes. Nicholas

Potter, Fanghua Yang, Jordan Marvakov, Matthew Sciandra, and former research assistants and analysts Alessandra Del Conte Dickovick, Santhi Hariprasad, Plamen Nikolov, Magali Fassiotto, Ijun Lai, Joe Amick, Ryan Gillette, Michael A. Zabek, and Sabrina Yusuf assisted with survey instrument development, data preparation, and analysis. Janet Stein at NBER, Michael Weis at Northwestern University, and Kari Beardsley, Sabrina Fisher, and Aida Cavalic at The Brookings Institution helped manage the numerous grants that supported this study.

The authors thank Dan Feenberg for his technical advice, Mohan Ramanujan and Len McCain for their help in supporting the technological needs of the project, and Korland Simmons for his administrative support of the project. The efforts of Nancy Gebler and the field team at the University of Michigan's Survey Research Center ensured a high-quality administration of the survey interview. Jerry Yeo and Christine Lee at the University of Chicago assisted in carrying out separate analyses that helped validate dried blood spot measures for health outcomes among MTO participants. Heidi Guyer at the Health and Retirement Study provided the dried blood spot protocols. Maryann Chandler at Flexsite Laboratories and Eric Whitsel, leader of the biology core of the National Longitudinal Study of Adolescent Health, provided guidance on dried blood spot measurement and assay.
