

**Design and Disaster: Higher Education Responds to Hurricane Katrina**

In the Lower 9th community of New Orleans, 17 members of the construction team prepare to build houses that they complete in February 2007.

A pre-Katrina aerial photograph shows the project location in the upper right area of the image. The Mississippi River is at the bottom of the image with the Holy Cross neighborhood immediately adjacent. The Industrial Canal is on the left and the Jackson Barracks to the right. Aerial photograph acquired from Google Earth: <http://earth.google.com/>.

**Design and Disaster: Higher Education Responds to Hurricane Katrina**

Looking north on Delery Street in 1940, with Jackson Barracks on the right. WPA workmen are constructing gutters near the entrance to the barracks.

Louisiana State University students and Louisiana Delta Corps volunteers pose with Mrs. Guice in a nearby lot adjacent to her new home on Delery Street.

**Design and Disaster: Higher Education Responds to Hurricane Katrina**

These images indicate the project site showing the damage to the project area after the storm. Note the photo showing the area while flooded. The large building with a white roof is the neighborhood elementary school. Aerial photographs acquired from Google Earth: <http://earth.google.com/>.
