¹ The components of a constant-quality house reflect the kinds of new single-family homes sold in 2005. The average price of a constant-quality house is derived from a set of statistical models relating sales price to selected standard physical characteristics of new single-family homes sold in 2005.

² Effective with the December 2007 New Home Sales Release in January 2008, the Census Bureau began publishing the Constant Quality (Laspeyres) Price Index with 2005 as the base year. (The previous base year was 1996.) "Constant-Quality House" data are computed for this table from price indexes published by the Census Bureau.

*The composite affordability index is the ratio of median family income to qualifying income. Values over 100 indicate that the typical (median) family has more than sufficient income to purchase the median-priced home.

¹ The Federal Housing Finance Board's monthly effective rate (points are amortized over 10 years) combines fixed-rate and adjustable-rate loans. Entries under Annual Data are averages of the monthly rates.

*Mortgage insurance written—initial endorsements. Mortgage amounts are in millions of dollars.

¹ Includes both new construction and substantial rehabilitation under Sections 207, 220, and 221(d).

² Includes purchase or refinance of existing rental housing under Section 223.

³ Includes congregate rental housing for the elderly under Section 231 and nursing homes, board and care homes, assisted-living facilities, and intermediate-care facilities under Section 232. Includes both new construction or substantial rehabilitation and purchase or refinance of existing projects. Number of units shown includes beds and housing units.

NA = Not applicable.

Note: Table 18 has been reformatted to include data on subprime loans in the three major categories of Total Past Due, 90 Days Past Due, and Foreclosures Started. The data for All Conventional Loans in these three major categories have been eliminated since they are no longer collected by the Mortgage Bankers Association.

¹ Maintenance and repairs are incidental costs that keep a property in ordinary working condition.

² Additions and alterations to a property outside the structure include walks, driveways, walls, fences, pools, garages, and sheds.

³ Additions refer to actual enlargements of the structure.

⁴ Alterations refer to changes or improvements made within or on the structure.

⁵ Major replacements are relatively expensive and are not considered repairs; they include furnaces, boilers, roof replacement, and central air conditioning. Effective with the first quarter of 2004, this survey no longer tabulates major replacements separately from other types of improvements. As a result, data previously tabulated as Major Replacements are now included in the columns of "Additions and Alterations."

NA = Data available only annually. Blank cells appear in the table because of a change in the survey.

Note: The Census Bureau has discontinued the Survey of Residential Alterations and Repairs; therefore, this table is no longer being updated. These fourth quarter 2007 data are the last available. <http://www.census.gov/const/www/c50index.html>

NA = Data available only annually.

*Effective with the May 2008 data, expenditures on private residential improvements to rental, vacant, and seasonal properties are not included in the construction spending data. To allow comparable time series analysis, these expenditures have been removed from historic data back to January 1993.

*Components may not add to totals because of rounding. Units in thousands.

¹ Decennial Census of Housing.

² American Housing Survey estimates are available in odd-numbered years only after 1981.

³ Annual Housing Survey estimates through 1981 based on 1970 decennial census weights; 1983 to 1989 estimates based on 1980 decennial census weights; 1991 and 1995 estimates based on 1990 decennial census weights. No reduction in nation's housing inventory has ever occurred; apparent reductions are due to changes in bases used for weighting sample data.

NA = Not available.

^r Implementation of new March CPS processing system.

¹ CPS data from 1983 to 1992 weighted based on the 1980 decennial census.

² Beginning in 1993, CPS data weighted based on the 1990 decennial census.

³ Beginning in 2002, CPS data weighted based on the 2000 decennial census data and housing unit controls.

⁴ Beginning in 2003, the CPS respondents were able to answer more than one race.

NA = Not available.

Source: Current Population Survey, Census Bureau, Department of Commerce (The annual data come from two sources: for years 1983 to 1993, the source is the Current Population Survey March Supplement; for years 1994 and later, the data are the average of the 12 monthly Current Population Surveys/Housing Vacancy Surveys. The quarterly data source is the monthly Current Population Survey/Housing Vacancy Survey.)
