

FY 2004 ESTIMATES OF MEDIAN FAMILY INCOME BASED ON NEW OFFICE OF MANAGEMENT AND BUDGET CORE-BASED STATISTICAL AREA (CBSA) METROPOLITAN AREA DEFINITIONS

(Not Applicable to HUD Programs in FY 2004)

This document contains revised FY 2004 estimates of median family. These estimates differ from previously issued FY 2004 income estimates in that they use the new Office of Management and Budget (OMB) metropolitan area definitions and a somewhat different estimation methodology. The estimates are informational, and should not be used in HUD programs to replace the FY 2004 median family income estimates developed using older OMB metropolitan area definitions. HUD plans to utilize the new metropolitan area definitions starting with its publication of FY 2005 median family income estimates.

As part of the 2000 Census process, the OMB released new metropolitan area definitions on June 6, 2003, and updated them on February 18, 2004. The new 2000 Census-based metropolitan area standards use somewhat different terminology and concepts than previously in use. The 1980 and 1990 Census-based standards identified two types of metropolitan areas: (1) Metropolitan Statistical Areas (MSAs) and (2) Consolidated Metropolitan Statistical Areas (CMSAs). CMSAs were further divided into Primary Metropolitan Statistical Areas (PMSAs). MSAs and PMSAs were used to define metropolitan areas for HUD programs. Counties were the building blocks for most MSA/PMSA areas, but townships were used in New England. The terms "Consolidated Metropolitan Statistical Area" and "Primary Metropolitan Statistical Area" are now obsolete.

Under the new OMB standards, the term "Metropolitan Statistical Area" is still used, but it refers to what are known as Core-Based Statistical Areas (CBSAs). Similar to what was done with CMSAs, a MSA that has a population of at least 2.5 million may be divided into "Metropolitan Divisions" that consist of a county or group of counties within a Metropolitan Statistical Area. The Metropolitan Division can be thought of as the replacement for the now obsolete Primary Metropolitan Statistical Area concept. Special note should be made of the fact that the new metropolitan area definitions are entirely county-based, which has especially significant impacts in New England.

The revised OMB definitions identify two types of nonmetropolitan areas. A "Micropolitan Area" consists of one or more counties that meet population size and other criteria. Remaining nonmetropolitan areas consist of individual nonmetropolitan counties that lack the "Micropolitan Area" designation.

In addition to the metropolitan area definitional differences, the methodology used to estimate FY 2004 CBSA-based median family incomes differs somewhat from that used to produce the FY 2004 and previous year MSA/PMSA estimates. Based on analysis of income changes in the 1990-2000 period, the new estimates rely more heavily on Census American Community Survey (ACS) data and no longer use Bureau of Labor Statistics (BLS) average wage data.

1999 & ESTIMATED 2004 DECILE DISTRIBUTIONS OF FAMILY INCOME BY METROPOLITAN STATISTICAL AREAS AND NONMETROPOLITAN COUNTIES 1
