OUR HOMES ARE MORE THAN WHERE WE LIVE

Owning or renting your own place is a milestone for many. Our homes may be investments, or sometimes financial burdens. Whether it's a gathering place

for friends and family or a sanctuary where you relax, our homes are important. That is why the American Housing Survey (AHS) is a valuable survey, allowing us to learn more about the types of homes in which we live and the size and composition of the housing inventory.

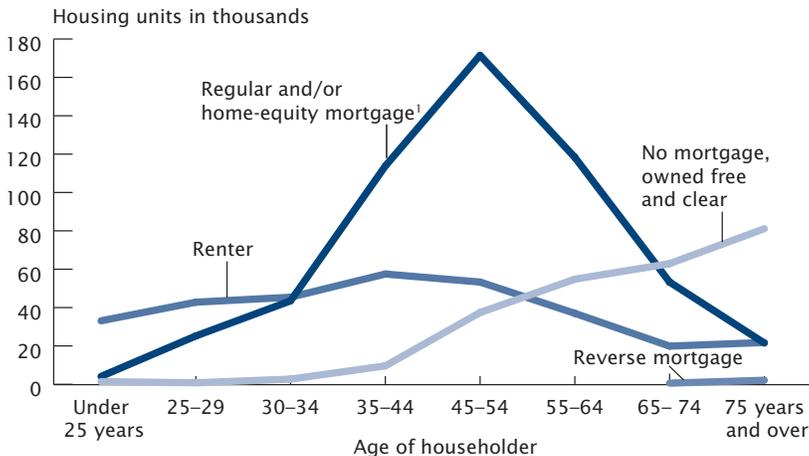

Number of housing units interviewed: 3,791

In the AHS, every housing unit represents itself and about 329 other units.

The AHS coverage of the **St. Louis Metro Area** matches the 2009 Office of Management and Budget definition.

WHO RENTS OR PAYS A MORTGAGE?

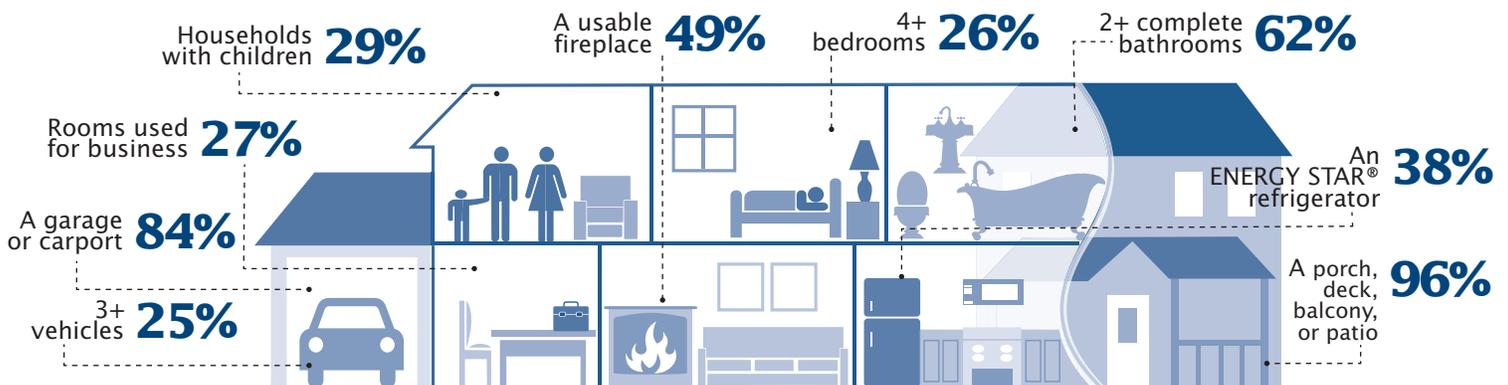

¹ Regular mortgages include all mortgages not classified as home-equity credit lines or reverse annuity mortgages.

WHAT IS THE AHS?

The AHS is the most comprehensive housing survey in the United States. The same units have been interviewed since 1985, with new construction, demolitions, and conversions taken into account. National data are collected every other year and metropolitan area data are collected on a rotating basis.

People in nearly every field use information from the AHS to evaluate and study the physical and financial characteristics of the nation's housing stock. In addition to the indicators presented in Tables 1 and 2, the AHS provides data on multi-family and single-family homes, manufactured/mobile homes, equipment and appliances, characteristics of the occupants, and more.

SOURCE AND ACCURACY

The AHS is sponsored by the Department of Housing and Urban Development (HUD) and conducted by the U.S. Census Bureau. Data presented are based on the sample of units that responded to the 2011 AHS, using weighting consistent with Census 2010. The resulting estimates are representative of the entire population. For information on sampling and estimation methods, see <www.census.gov/housing/ahs/methodology>.
