## Home Sales\*

Sales of new single-family homes totaled 358,000 (SAAR) units in the first quarter of 2010, down 4 percent from the previous quarter but up 6 percent from the first quarter of 2009; both changes are statistically insignificant. The average monthly inventory of new homes for sale during the first quarter was 231,000 units, a statistically insignificant 2 percent below the previous quarter and 29 percent below the first quarter of last year. The months' supply of unsold homes based on monthly inventories and sales rates for the first quarter of 2010 was 7.8 months, a statistically insignificant 2 percent above the fourth quarter of 2009 but 32 percent below the first quarter of last year.

Sales of existing homes—including single-family homes, townhomes, condominiums, and cooperatives—as reported by the NATIONAL ASSOCIATION OF REALTORS® totaled 5,137,000 (SAAR) in the first quarter of 2010, down 14 percent from the previous quarter but up 11 percent from the first quarter of 2009. The average monthly inventory of units for sale during the first quarter of 2010 was 3,464,000, virtually the same as the previous quarter but down 6 percent from the first quarter of 2009. The average months' supply of unsold units for the first quarter of 2010 was 8.1 months, up 16 percent from the fourth quarter of 2009 but down 16 percent from the first quarter of last year.

## Home Prices

The median price of new homes sold during the first quarter of 2010 was \$217,800, down 1 percent from the fourth quarter of 2009 but up 5 percent from the first quarter of 2009. The average price of new homes sold during the first quarter was \$276,700, up 1 percent from the previous quarter and up 8 percent from the first quarter of 2009. The estimated price of a constant-quality house during the first quarter of 2010 is \$282,200, 1 percent lower than the previous quarter but up 3 percent from the first quarter of 2009. All changes are statistically insignificant with the exception of the year-to-year change in average prices. The set of physical characteristics used to represent a constant-quality house is based on the kinds of houses sold in 2005.

The median price of existing homes—including single-family homes, townhomes, condominiums, and cooperatives—that sold in the first quarter of 2010 was \$166,700 down 2 percent from the previous quarter and down 1 percent from the first quarter of 2009, according to the NATIONAL ASSOCIATION OF REALTORS®. The average price of existing homes sold, \$212,100, was 2 percent lower than the fourth quarter of 2009 but 1 percent higher than the first quarter of last year.

<sup>1</sup> Effective with the December 2007 New Residential Sales release in January 2008, the Census Bureau began publishing the Constant Quality (Laspeyres) Price Index with 2005 as the base year. (The previous base year was 1996.) "Constant-Quality House" data are no longer published as a series but are computed for this table from price indexes published by the Census Bureau.

## Repeat Sales Price Index

The Federal Housing Finance Agency's (FHFA's) purchase-only House Price Index (HPI) stood at 197.6 on a seasonally adjusted (SA) basis in the fourth quarter of 2009, 0.1 percent above the previous quarter and 1.2 percent above the fourth quarter of 2008. The national Case-Shiller® Home Price Index (HPI) was 136.4 (SA) in the fourth quarter of 2009, down 0.4 percent from the previous quarter but up 2.4 percent year-over-year.

The FHFA annual index stood at 198.6 in 2009, down 4.6 percent from 2008. The Case-Shiller® annual index fell 11.5 percent, to 134.1.

## Housing Affordability

Housing affordability is the ratio of median family income to the income needed to purchase the median-priced home based on current interest rates and underwriting standards, expressed as an index. The NATIONAL ASSOCIATION OF REALTORS® composite index of housing affordability for the first quarter of 2010 shows that families earning the median income have 174.9 percent of the income needed to purchase the median-priced existing single-family home. This figure is 3 percent higher than the fourth quarter of 2009 but 3 percent lower than the first quarter of 2009.

The increase in the housing affordability index in the first quarter of 2010 reflects changes in the market place. Median family income rose 0.4 percent from the previous quarter to \$60,498. The median sales price of existing single-family homes in the first quarter of 2010 declined to \$166,133 which was 2 percent lower than the previous quarter. The national average home mortgage interest rate of 5.09 in the first quarter of 2010 is 3 basis points higher than the previous quarter. The decline in the median sales price of existing single-family homes and the rise in median family income caused housing affordability to increase and more than offset the negative impact of a rise in home mortgage interest rates.

## Absorption of New Multifamily Units

In the fourth quarter of 2009, 40,800 new, unsubsidized, unfurnished, multifamily (five or more units in structure) rental apartments were completed, down 14 percent from the previous quarter and down a statistically insignificant 6 percent from the fourth quarter of 2008. Of the apartments completed in the fourth quarter of 2009, 51 percent were rented within 3 months. The absorption rate for the fourth quarter of 2009 is a statistically insignificant 1 percentage point lower than last quarter but is up 6 percentage points from the fourth quarter of 2008. The median asking rent for apartments completed in the fourth quarter of 2009 was \$1,034, a statistically insignificant decrease of 1 percent from the previous quarter and a statistically insignificant decrease of 5 percent over the fourth quarter of 2008.

In the fourth quarter of 2009, 7,000 new condominium or cooperative units were completed, down 21 percent from the previous quarter and down 60 percent from units completed in the fourth quarter of 2008. Of these, 36 percent were sold within 3 months. This absorption rate for the fourth quarter of 2009 is 10 percentage points lower than in the previous quarter and a statistically insignificant 3 percentage points lower than in the fourth quarter of 2008.

In 2009, 164,300 rental apartments were completed, and 51 percent were absorbed within 3 months. This is a 12-percent increase in completions but a 1-percentage-point decrease in absorptions compared with 2008. The median asking rent of apartments completed in 2009 was \$1,067, a decrease of 2.6 percent from the previous year.

Also in 2009, 38,400 condominium or cooperative units were completed, a decrease of 45 percent from 2008. Of these, 40 percent were sold within 3 months. This absorption rate for 2009 is 9 percent lower than in the previous year.

## Builders' Views of Housing Market Activity

The National Association of Home Builders (NAHB)/ Wells Fargo conducts a monthly survey focusing on builders' views of the level of sales activity and their expectations for the near future. NAHB uses these survey responses to construct indices of housing market activity. (The index values range from 0 to 100.) For the first quarter of 2010, the current market activity index for single-family detached houses stood at 16, down from the previous quarter but up 9 points from the first quarter of 2009. The index for future sales expectations, at 26, declined 1 point from the fourth quarter of 2009 but rose 10 points above the first quarter of the previous year. For the first quarter of 2010, prospective buyer traffic had an index value of 11, which is down 2 points from the previous quarter but up 2 points from the first quarter of 2009. NAHB combines these separate indices into a single housing market index that mirrors the three components quite closely. For the first quarter of 2010, this index fell to 16, which is 1 point lower than for the fourth quarter of 2009 but 7 points above the first quarter of 2009.

<sup>1</sup> The components of a constant-quality house reflect the kinds of new single-family homes sold in 2005. The average price of a constant-quality house is derived from a set of statistical models relating sales price to selected standard physical characteristics of new single-family homes sold in 2005.

<sup>2</sup> Effective with the December 2007 New Home Sales Release in January 2008, the Census Bureau began publishing the Constant Quality (Laspeyres) Price Index with 2005 as the base year. (The previous base year was 1996.) "Constant-Quality House" data are computed for this table from price indexes published by the Census Bureau.

\*The composite affordability index is the ratio of median family income to qualifying income. Values over 100 indicate that the typical (median) family has more than sufficient income to purchase the median-priced home.

ARM = adjustable-rate mortgage. NA = data are not available.

<sup>1</sup> The Federal Housing Finance Agency's monthly effective mortgage rate (points are amortized over 10 years) combines fixed- and adjustable-rate loans. Entries under Annual Data are averages of the monthly rates.

<sup>2</sup> Beginning in December 2008, fixed- and/or adjustable-rate mortgage affordability indexes could not be derived because the mortgage rates were not available.

<sup>1</sup> Decennial Census of Housing.

<sup>2</sup> American Housing Survey (AHS) estimates are available in odd-numbered years only after 1981.

<sup>3</sup> AHS estimates through 1981 based on 1970 decennial census weights; 1983 to 1989 estimates based on 1980 decennial census weights; 1991 and 1995 estimates based on 1990 decennial census weights. No reduction in nation's housing inventory has ever occurred; apparent reductions are due to changes in bases used for weighting sample data.

<sup>4</sup> Beginning in 2009, Current Population Survey data weighted based on vintage 2008 housing estimates.

<sup>1</sup> Data from 1983 to 1992 weighted based on the 1980 decennial census.

<sup>2</sup> Beginning in 1993, Current Population Survey (CPS) data weighted based on the 1990 decennial census.

<sup>3</sup> From 1983 and 1984, the metropolitan data reflect 1970 definitions. From 1985 to 1994, the metropolitan data reflect 1980 definitions. Beginning in 1995, the metropolitan data reflect 1990 definitions.

<sup>4</sup> Beginning in 2002, CPS data weighted based on the 2000 decennial census data and housing unit controls.

<sup>5</sup> The Census Bureau has changed to the Office of Management and Budget's new designation of metropolitan areas as core-based statistical areas effective January 2005. The new statistical area definitions and data are not comparable with the previous ones.
