PREFACE .....	xvii
ACKNOWLEDGMENTS .....	xix
CHAPTER 1: INTRODUCTION .....	1-1
Study Overview .....	1-2
Limitations of NSHAPC Findings .....	1-5
The Study Is Descriptive .....	1-6
The People in the Study Come from Homeless Assistance Programs .....	1-6
NSHAPC Was Designed to Collect Data on Clients Who Use Homeless Assistance Services .....	1-7
All Client Information Comes from the Clients Themselves .....	1-7
What the Study Does Not Do .....	1-7
The Structure of This Technical Report .....	1-8
Other NSHAPC Products .....	1-9
CHAPTER 2: NSHAPC DESIGN AND DATA COLLECTION .....	2-1
The Design of NSHAPC .....	2-2
Data Collection .....	2-2
Data Collection from Programs .....	2-2
Surveying Clients of Homeless Assistance Programs .....	2-4
Basic Analytic Categories .....	2-5
Defining Homelessness Status .....	2-5
Specifying Time Frames .....	2-8
Defining Family and Single Status .....	2-8
Defining Alcohol/Drug/Mental Health Status .....	2-8
Describing Urban/Rural Location .....	2-9
Weighting .....	2-10
Treatment of Statistical Significance .....	2-10
Confidence Intervals .....	2-10
Statistical Significance of Comparisons .....	2-11
Design Effect Used for Statistical Tests .....	2-11
Risk of False Positives .....	2-12
Where Clients Were Identified for Interview, by Frame, Homeless Status, and Urban/Rural Location .....	2-12
CHAPTER 3: DEMOGRAPHIC CHARACTERISTICS .....	3-1
Introduction .....	3-2
Homeless Clients .....	3-2
Sex, Race/Ethnicity, and Age .....	3-3
Urban/Rural and Veteran Status .....	3-3

Marital Status, Children, and Pregnancy .....	3-3
Education .....	3-6
Differences by Family Status .....	3-6
Differences by Alcohol, Drug, or Mental Health Problems .....	3-6
Differences by Race/Ethnicity .....	3-10
Differences by Sex .....	3-10
Currently and Formerly Homeless Clients and Other Service Users Compared .....	3-12

## PREFACE

### 1996 NATIONAL SURVEY OF HOMELESS ASSISTANCE PROVIDERS AND CLIENTS

The **1996 National Survey of Homeless Assistance Providers and Clients** is a landmark study. It was designed to provide updated information about the providers of homeless assistance and the characteristics of homeless persons who use services. The survey is based on a statistical sample of 76 metropolitan and nonmetropolitan areas, including small cities and rural areas. Data for the survey were collected between October 1995 and November 1996.

The survey is a response to the fact that homelessness remains one of America's most important social issues. Chronic poverty, coupled with physical and other disabilities, have combined with rapid changes in society, the workplace, and local housing markets to make many people vulnerable to its effects. With the enactment of the Stewart B. McKinney Homeless Assistance Act of 1987, Congress recognized the need to supplement "mainstream" federally funded housing and human services programs with funding that was specifically targeted to assist homeless people. Over \$11 billion in McKinney funds have been appropriated since then, and billions more have been provided through other federal, state, and local programs and benefits.

Those who provide assistance—the government agencies, the thousands of non-profit organizations, and countless private individuals—have learned a great deal about effective ways to meet the needs of homeless people through improved supportive services, increased housing options and cooperative ventures among agencies providing assistance. Although substantial progress has been made in obtaining funding and learning about effective approaches, much more remains to be done.

Despite significant increases in funding, program administrators had to manage their programs without current and reliable data on the characteristics of the people they were serving and the newly emerging networks of services and service providers. Indeed, the last national study was conducted by the Urban Institute in 1987. In 1991 Federal agencies began initial planning for a new national survey to fill this gap.

The new survey was designed and funded by 12 federal agencies<sup>1</sup> in a collaborative venture under the auspices of the Interagency Council on the Homeless, a working group of the White House Domestic Policy Council. The U.S. Bureau of the Census collected the data, and the Urban Institute analyzed it. A panel comprised of public interest groups, nationally recognized researchers, and other experts on issues related to homelessness reviewed and commented on the

analysis plan and draft reports. All of the draft survey instruments were published in the Federal Register for public review and comment.

It is important to note that the survey was *not* designed to produce a national count of the number of homeless people, nor does it include information on client characteristics at the regional or local levels. The survey *was* designed to provide up-to-date information about the providers of assistance to homeless people, the characteristics of those who use services that focus on homeless people, and how this population has changed in metropolitan areas since 1987. The analyses of the provider data examine factors such as geographic level (e.g., national, central city, communities outside of central cities but still within metropolitan statistical areas, and rural areas), program type, and the types and levels of services delivered. The data received from service users identifies patterns based on a number of characteristics including, but not limited to, such factors as age, race/ethnicity, sex, family status, history of homelessness, employment, education, veteran status, and use of services and benefits.

The information in this report is critical to discussions about effective public policy responses needed to break the cycle of homelessness. It encompasses a wealth of data that weaves a unique snapshot of homelessness in the United States.

As such, it provides an important baseline and foundation for future assessments of the nature and extent of homelessness. It also provides a valuable overview that will improve our understanding of the characteristics of homeless people who use services, the nature of homelessness, and how best to address it.<sup>2</sup>

<sup>2</sup> Two other items related to the survey are currently available. *Lists* containing the names, addresses and telephone numbers of the homeless assistance providers in each of the 76 survey areas who reported in 1996 that they met the criteria for inclusion in the survey are available from the Interagency Council on the Homeless, HUD, 451 7th Street, S.W., Washington, DC 20410, Room 7274, or [survey\\_results@hud.gov](mailto:survey_results@hud.gov). *Public Use Data Files* and all relevant documentation are available through two sources. You may download the files at no charge from [www.census.gov](http://www.census.gov), select "Subjects A to Z," and then select "N" for "NSHAPC." (Copies of the Summary and Technical Reports will also be found at this website.) Alternatively, you may purchase the data files on CD by calling Census Bureau Customer Service at 301-457-4100.

## ACKNOWLEDGEMENTS

Many people played a role in bringing this report to fruition. James Hoben of the Department of Housing and Urban Development, Mary Ellen O’Connell of the Department of Health and Human Services, and George Ferguson of the Interagency Council on the Homeless spearheaded the efforts of a Federal Working Group under the auspices of the Interagency Council. They had the responsibility for supervising all phases of the study; their counsel has greatly improved the report’s structure, focus, and readability.

Other members of the Federal Working Group who contributed ideas, comments, comparison data, and support include Katherine Meredith of the Office of Management and Budget; Nancy Gordon, Cynthia Taeuber, Annetta Smith, Denise Smith, Marjorie Corlett, Charles Alexander, Dave Hubble, and Steve Tourkin of the Bureau of the Census; Fred Karnas, Marge Martin, Mark Johnston, and Michael Roanhouse of the Department of Housing and Urban Development; Marsha Martin, Pete Delany, and Michael Shoag of the Department of Health and Human Services; Pete Dougherty, Scott Steins, Gay Koerber, and Josephine Hawkins of the Department of Veterans Affairs; Joanne Wiggins, James Parker, Robin Boukris, Mari Margil, and Wei-min Wang of the Department of Education; Kate Hine, Gary Bickel, John Pentecost, and Amy Donoghue of the Department of Agriculture; John Heinberg and Raymond Higgins, of the Department of Labor; Carol Coleman and Yolanda Jones of the Federal Emergency Management Agency; Patricia Betch, Cassandra Wilkins, Christine Garcia, and Paul Davies of the Social Security Administration; Patricia Rose of the Department of Energy; Betty Jackson of the Department of Transportation; and Molly Brostrom, Jeremy BenAmi, and Mary Smith of the Domestic Policy Council. In addition, Sharon Fondelier, Dave Hornick, Tracy Mattingly and other Census Bureau staff have remained polite and forthcoming under the provocation of what must have seemed like never-ending requests for additional data, additional interpretation of methods, additional reviews of draft method sections, and additional hand-holding.

We were also assisted greatly by a devoted panel of experts on research and policy related to homelessness. These included Dennis Culhane of the University of Pennsylvania, Michael L. Dennis of Chestnut Health Systems, Linda Fosburg of Abt Associates, Howard Goldman of the University of Maryland—Baltimore, Kim Hopper of the Nathan Kline Institute, Gerry Hotaling of the University of Massachusetts—Lowell, Paul Koegel of the RAND Corporation, Norweeta Milburn of Hofstra University, Nan Roman of the National Alliance to End Homelessness, Robert Rosenheck of the Department of Veterans Affairs, Northeast Program Evaluation Center, James Stronge of the College of William and Mary, Beverly Toomey of Ohio State University, Sue Watlov-Phillips of Elim Transitional Housing, Inc., Laurel Weir of the National Law Center on Homelessness and Poverty, and Beth Weitzman of New York University.

Finally, Martin Frankel and K.P. Srinath of Abt Associates and Fritz Scheuren, John Marcotte, and Douglas Wissoker of the Urban Institute assisted with weighting and other statistical issues.
