FOREWORD

This telephone directory is an interim one to reflect recent organizational changes. Names listed in the Alphabetical Section now appear exactly as they do in cc:Mail and in "Locator" on the LAN. Locator is listed under "Office Systems" on the LAN Main Menu. Please check Locator periodically to ensure that you are listed correctly. While looking at an employee name in Locator, you may press the F8 key to view additional information, including the employee's cc:Mail post office address. Report changes to Locator and/or the HUD Telephone Directory as indicated below:

HOW TO REPORT CHANGES TO THIS DIRECTORY

Alphabetical Section:

- Correspondence Code, Room Number, and Telephone Number - Send cc:Mail message addressed to "Locator" or phone 401-0388.
- Name changes - Contact your Office Technology Coordinator.

- Headquarters Organizational Section - Contact the appropriate Administrative Officer (see Administrative Officer listing in this directory).

- Field Office Section - Contact the Communications Management Branch at 708-3614.

TDD ACCESS

All telephone numbers listed in this directory may be accessed via TDD by calling the **Federal Information Relay Service** at (202) 708-9300 or 1-800-877-TDDY (1-800-877-8339). The Department is also making every effort to provide direct access via TDD to all HUD locations throughout the nation. The TDD number for each HUD Field Office is listed within the Office address in the Field Office Section of this directory. Those few Field Offices that do not list a TDD number are in the process of obtaining equipment. Within Headquarters several TDD numbers are listed in the General Information Section including the TDD number for general information, (202) 708-1455.

If you have any questions, comments, or suggestions regarding TDD accessibility, please contact the Communications Management Branch at (202) 708-3614 (voice) or (202) 619-8330 (TDD).

INSPECTOR GENERAL HOTLINE

- Inspector General Hotline (202) 708-4200
- (TDD) (202) 708-2451
- (Commercial Toll-Free) 1-800-347-3735

It is the responsibility of each employee to report promptly any indications of fraud, waste, or mismanagement to his/her supervisor or directly to the Office of Inspector General in Headquarters or the Field. To expedite action, the employee is urged to assemble facts before the call as to the who, how, why, what, when, and where of the reported information.

The "hotline" is not to be used to report complaints for which other reporting systems are already in place, such as consumer and fair housing problems, personnel, or equal opportunity complaints.

FTS LONG DISTANCE INSTRUCTIONS

- **Headquarters FTS (long distance) access:** Dial 9 + 1
- **All FTS and other official long distance calls from Headquarters:** Dial 9 + 1 and the ten digit number (which includes the area code).
- All calls are timed and charges are based on call length. The FTS should only be used for official long-distance calls. Call length must be limited to the time necessary to conduct official business.
- The FTS is used for all official, long-distance calls except international calls.

CALLS OUTSIDE THE CONTINENTAL UNITED STATES:

- **International calls:** Official calls may be placed to international locations only on special, unrestricted telephone lines. Consult your Administrative Officer for information regarding the availability of unrestricted telephone lines within your organization.
- **Direct dialing of international calls:** International calls should be dialed direct whenever possible. Unrestricted telephone lines must be used to place direct dial international calls by dialing:

9 + 011 + (country code) + (city code) + (local number)

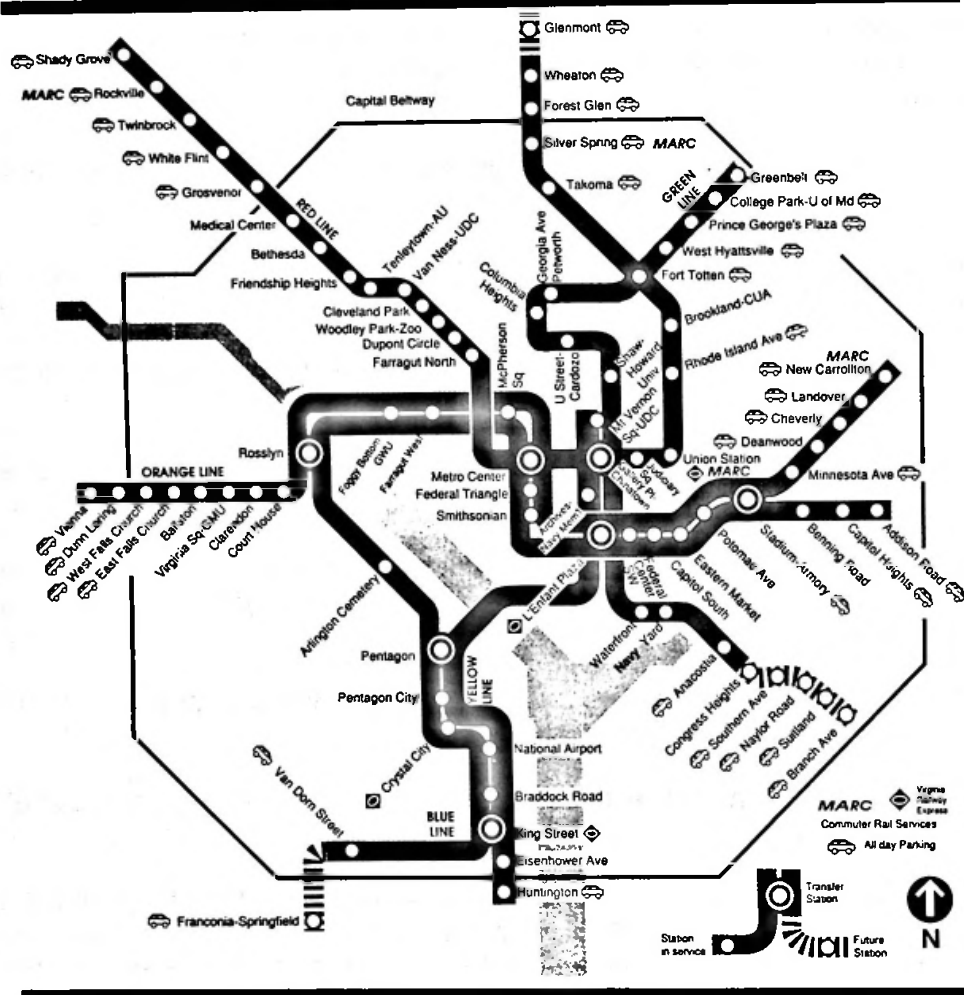

NOTE: Consult your local commercial telephone directory for a listing of country and city codes or call 1-800-874-4000 for AT&T International Information Service.

- **Calls to Canada:** Calls to Canada are dialed the same as all other FTS (long distance) calls, 9 + 1 and the ten digit number.

TIPS FOR REDUCING TELEPHONE COSTS

GSA is now charging executive agencies on a time-sensitive basis for all FTS long-distance calls. Call length can be shortened and government spending reduced by adhering to the following tips:

- Plan your long-distance calls; have all documents and reference materials on hand.
- Determine differences in time zones and duty hours; avoid calls during luncheon periods and non-duty hours.
- Do not make long-distance calls to obtain hotel reservations or arrange for travel. Most hotels and transportation companies have local facilities or toll free "800" numbers for making reservations.
- Check your list of frequently called numbers, the HUD Telephone Directory or other telephone directories for the correct number. Wrong numbers waste time and money.
- **Do not request secretaries** to complete your call unless you are not in a position to do so. Do your own dialing.
- When your long-distance call is answered, always give your name, the point of origin of your call, and the name of the person you are calling.
- Keep the conversation as short as possible; make every effort to complete your call within five minutes; avoid unnecessary personal discussions.
- Do not permit your call to be placed on "hold" for longer than a few seconds. If the person called or the information requested is not available immediately, arrange for a fixed time when your call may be returned.
- Accept incoming FTS long-distance calls immediately, even though busy with other matters. Break off local calls if necessary.
- Do not accept collect calls, except for calls from employees in official travel status who do not have FTS available.
- FTS is only for official government business except as noted in HUD Notice 89-0006 ADM, issued June 27, 1989. Any other use of the system is prohibited by law (43 comp. Gen. 163). Detailed call information, much like the records provided on your home telephone, is now being monitored to control unofficial FTS usage.
- Review of new telecommunications service requests should be accomplished to eliminate unnecessary phones, ensure all telephones have the correct level of service, deny unneeded system features, and restrict relocation of instruments.
