Housing Market Indicators Monthly Update

June 2023

National housing market indicators available as of June showed overall activity in housing markets improved. Trends in some of the top indicators for this month include:

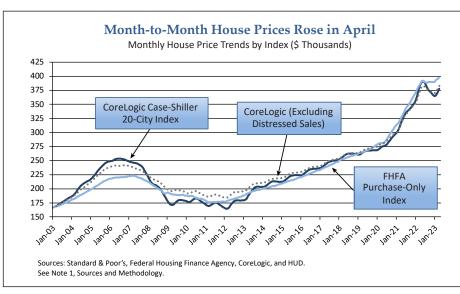

- Purchases of new homes rose for the third consecutive month in May, reaching their fastest pace since February 2022. New single-family home sales rose 12.2 percent to 763,000 units (SAAR) in May from a pace of 680,000 in April and were 20.0 percent higher year-over-year (y/y). Home sales rose in all four Census regions. Note that monthly data on new home sales tend to be volatile. New home sales are based on a purchase agreement, unlike existing home sales which are based on a closing. (Sources: HUD and Census Bureau)
- Existing home sales rose marginally. The National Association of REALTORS® (NAR) reported that May sales of existing homes (including single-family homes, townhomes, condominiums, and cooperatives) increased 0.2 percent to 4.30 million units (SAAR) from an upwardly revised pace of 4.29 million in April but were 20.4 percent lower y/y. Home sales rose in the South and the West Census regions but fell in the Northeast and Midwest. Because existing home sales are based on a closing, May sales reflect contract signings in March and April. Mortgage rates have trended down from previous highs and have been hovering in the mid-six percent range, and month-to-month (m/m) house prices have fluctuated modestly in the last several months. Inventories of existing homes for sale are still lean, however.
- Construction of new homes rose to the highest level since April 2022. Total housing starts increased 21.7 percent to 1.631 million units (SAAR) in May from a pace of 1.340 million in April and were up 5.7 percent y/y. Single-family housing starts, at 997,000 units (SAAR), increased 18.5 percent m/m from 841,000 units but were still 6.6 percent lower y/y. Multifamily housing starts (5+ units in a structure), at 624,000 units (SAAR), rose 28.1 percent m/m from 487,000 units and were 39.6 percent higher y/y. Note that m/m changes in multifamily starts are often volatile. (Sources: HUD, Census Bureau)
- Annual house price appreciation continued to slow in April, with annual gains ranging from a 1.7-percent drop to a 3.1-percent rise. The Federal Housing Finance Agency (FHFA) seasonally adjusted (SA) purchase-only house price index for April estimated that home values rose 0.7 percent m/m and 3.1 percent y/y, down from an annual gain of 3.7 percent in March. The non-SA CoreLogic Case-Shiller® 20-City Home Price Index, posted a 1.7 percent m/m increase (0.9 percent SA) in home values in April and a 1.7 percent y/y decline, which was greater than the 1.1-percent annual decline in March. Mortgage financing has become more expensive as the Federal Reserve raises interest rates, a process that began in April 2022. House prices peaked in June 2022 and began to decline modestly but

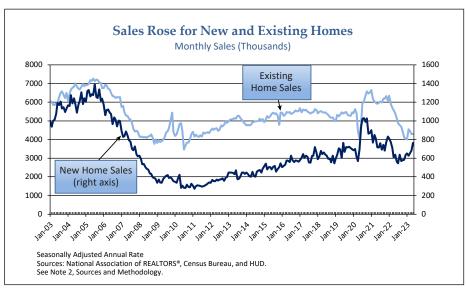

have begun to reverse that trend recently. The FHFA (SA) index now stands at 1.6 percent above its previous June 2022 peak. (Both price indices are released with a 2-month lag.)

- The inventory of homes for sale fell for new homes but rose for existing homes. The listed inventory of new homes for sale, at 428,000 units at the end of May, was down 0.9 percent m/m and 2.9 percent y/y. That inventory would support 6.7 months of sales at the current sales pace, down from 7.6 months in April. Available existing homes for sale, at 1.080 million units in May, increased 3.8 percent m/m but were down 6.1 percent y/y. That inventory represents a 3.0-month supply, up from 2.9 months in April. The long-term average for months' supply of homes on the market is 6.0 months.
- In the first quarter of 2023, homeowners' equity declined for the third consecutive quarter; the number of underwater borrowers also declined. The Federal Reserve estimated that homeowners' equity (total property value less mortgage debt outstanding) decreased 2.2 percent, or \$653 billion, from the fourth quarter of 2022 and now stands at \$28.7 trillion. Owners' equity peaked in the second quarter of 2022 at \$31.8 trillion and declined \$1.490 trillion in the subsequent quarter for the first time since 2012. Changes in home prices are the primary driver of gains or losses in equity. For the first quarter of 2023, CoreLogic estimated the number of underwater borrowers (those who owe more on their mortgage than the value of their home) decreased by 3,000 from the fourth quarter to 1.182 million, or 2.1 percent of residential properties with a mortgage but were 45,000 greater than one year ago. The number of underwater borrowers rose by 53,000 q/q (quarter-over-quarter) in the third quarter of 2022 for the first time since 2018.
- Forbearance on mortgage loans continued to decline. The MBA Forbearance Survey indicates the share of homeowners with mortgages in forbearance was 0.49 percent (244,000 households) in May, down from 0.51 percent in April and 0.85 percent (425,000 households) one year ago. The forbearance rate was only 0.25 percent of all home loans in the beginning of March 2020, before the economic effects of the COVID pandemic began to be felt.
- The 30-year fixed-rate mortgage (FRM) averaged 6.71 percent in June and remains elevated year-over-year. The average weekly 30-year FRM was 6.71 percent the week ending June 29, up from 6.67 percent the previous week and 5.70 percent one year ago. The mortgage rate rose steadily in 2022 as the Fed increased interest rates, reaching a high of 7.08 percent in November 2022 and then trended down to a low of 6.09 percent in February 2023 as inflation appeared to be retreating. Changes in inflation expectations and financial market concerns have caused mortgage rates to fluctuate recently. (Source: Freddie Mac)

SOURCES AND METHODOLOGY						
A. Items in Table						
Description	Frequency	Sources	Notes on Methodology			
Mortgage Rates (30-Yr FRM)	Weekly	Freddie Mac	As reported for 30-year fixed rate mortgages (FRM). See note in Section C for basis of rates as of November 2022.			
Homeownership Affordability	Monthly	National Association of REALTORS®	NAR's Housing Affordability (Fixed Rate) Index as reported. A value of 100 means that a family with the median income has exactly enough income to qualify for a mortgage on a median-priced home. An indeabove 100 signifies that a family earning the median income has more than enough income to qualify.			
Rental Affordability	Quarterly	HUD	HUD's Rental Affordability Index measures whether a typical renter household has enough income to qualify for a lease on a typical rental home at the national level based on the most recent price and income data. A typical renter household is one that earns median income and a typical rental home is a median-priced rental unit. It is assumed that a renter household can qualify for a lease if the annual rent is not greater than 30 percent of the renter household's annual income. A value of 100 means tha a renter household with median income has exactly enough income to qualify for a lease on a median-priced rental home. An index value above 100 signifies that a household earning the median income of renter households has more than enough income to qualify. For more information on HUD's rental affordability index and methodology, see the Second Quarter 2016 issue of HUD's National Housing Market Summary on their U.S. Housing Market Conditions website: http://www.huduser.gov/portal/ushmc/home.html.			
Home Prices						
CoreLogic Case-Shiller (NSA)	Monthly	Standard and Poor's	Case-Shiller 20-metro composite index, January 2000 = 100. Standard and Poor's recommends use of non-seasonally adjusted (NSA) index when making monthly comparisons.			
FHFA (SA)	Monthly	Federal Housing Finance Agency	FHFA monthly (purchase-only) index for U.S., January 1991 = 100.			
CoreLogic - Excluding Distressed Sales (NSA)	Monthly	CoreLogic	CoreLogic national combined index, distressed sales excluded, January 2000 = 100. (Only available as NSA). Also see additional note in Section C below on the CoreLogic HPI.			
Home Sales (SAAR)						
New	Monthly	HUD and Census Bureau	Seasonally adjusted annual rates. A newly constructed house is considered sold when either a sales contract has been signed or a deposit accepted, even if this occurs before construction has actually started.			
Existing	Monthly	National Association of REALTORS®	Seasonally adjusted annual rates. Existing-home sales—which include single-family, townhomes, condominiums and co-ops—are based on transaction closings. This differs from the U.S. Census Bureau's series on new single-family home sales, which are based on contracts or the acceptance of a deposit.			
First-Time Buyers	Monthly	NAR, Census Bureau, and HUD	Sum of seasonally adjusted new and existing home sales (above) multiplied by National Association of REALTORS® annual estimate of first-time buyer share of existing home sales.			
Distressed Sales (NSA)	Monthly	CoreLogic	Short sales and REO (Real Estate Owned) sales as a percentage of total existing home sales (current month subject to revision).			
Housing Starts Total (SAAR)	Monthly	HUD and Census Bureau	Housing starts are divided into three components: single-family, multifamily, and two-to-four unit structures. Start of construction occurs when excavation begins for the footings or foundation of a building. As of September 1992, housing starts include units being totally rebuilt on an existing foundation.			
Single-Family (SAAR)	Monthly	HUD and Census Bureau	Single-family housing includes fully detached, semi-detached (semi-attached, side-by-side), townhouses, and row houses. For attached units, each must be separated from the adjacent unit by a ground-to-roof firewall to be classified as a single-family structure. Also, these units must not share common facilities (i.e., heating/air-conditioning systems, plumbing, attic, or basement). Units built one on top of another and those built side-by-side that do not have a ground-to-roof firewall or have common facilities are not considered single-family units.			
Multifamily (SAAR)	Monthly	HUD and Census Bureau	Multifamily housing has five or more units in a structure.			
Housing Supply						
New Homes for Sale (SA)	Monthly	HUD and Census Bureau	As reported.			
New Homes for Sale - Months' Supply (SA)	Monthly	HUD and Census Bureau	As reported.			
Existing Homes for Sale (NSA)	Monthly	National Association of REALTORS®	As reported.			
Existing Homes - Months' Supply	Monthly	National Association of REALTORS®	As reported.			
Vacant Units Held off Market	Quarterly	Census Bureau	As reported in Census CPS/HPS Table 4. Estimates of Housing Inventory, line item "Year-round vacant, held off market for reasons other than occasional use, or usually reside elsewhere." Vacant units can be held off the market for a variety of reasons.			
Mortgage Originations						
Refinance Originations	Quarterly	Mortgage Bankers Association and HUD	HUD estimate of the number of refinance originations based on MBA estimate of dollar volume of refinance originations.			
Purchase Originations	Quarterly	Mortgage Bankers Association and HUD	HUD estimate of the number of home purchase originations based on MBA estimate of dollar volume of home purchase originations.			
FHA Originations						
Refinance Originations	Monthly	HUD	FHA originations reported as of date of loan closing. Estimate for current month scaled upward due			
Purchase Originations	Monthly	HUD	to normal reporting lag and shown as preliminary.			
Purchases by First-Time Buyers	Monthly	HUD				

SOURCES AND METHODOLOGY A. Items in Table (continued) Mortgage Loans in Mortgage Bankers Association Monthly Forbearance and Call Volume Survey, as reported for total number of loans in forbearance as a percent of number of servicing portfolio loans. Data are based on approximately 36.4 million loans, or 73 percent of the first mortgage servicing market. The survey was transformed from a weekly to a monthly survey beginning November 2021. Mortgage Delinquency Rates (NSA) Monthly Black Knight Financial Services Total conventional mortgages past due (30+ days) but not in foreclosure, divided by conventional mortgages actively serviced. Subprime Monthly Black Knight Financial Services Total conventional mortgages past due (30+ days) but not in foreclosure, divided by conventional mortgages actively serviced. FHA Monthly HUD Total FHA mortgages past due (30+ days) but not in foreclosure, divided by FHA's insurance in force. Seriously Delinquent Mortgages Prime Monthly LPS Applied Analytics, MBA, Conventional mortgages 90+ days delinquent or in foreclosure, scaled up to market. and HUD Subprime Monthly LPS Applied Analytics, MBA, Conventional mortgages 90+ days delinquent or in foreclosure, scaled up to market. and HUD Monthly HUD Mortgages 90+ days delinquent or in foreclosure. Renter Households -**Every Other** Census Bureau Household Data are collected over a 2-week period. The Survey began April 23, 2020. Data are weighted by Ability to Pay Rent 2 Weeks **Pulse Survey** number of households; data posted on the Census website are weighted by population. Behind on Rental Payments Census Household Pulse Survey Data weighted by # of households: 2021 AHS estimates 45.99 million U.S. renter households. and HUD Not at All Confident in Ability Census Household Pulse Survey Data weighted by # of households; 2021 AHS estimates 45.99 million U.S. renter households. to Pay Rent on Time Fearful of Imminent Eviction Census Household Pulse Survey Respondent answered "very likely" or "somewhat likely" to the question: How likely is it that your and HUD household will have to leave this home or apartment within the next two months because of eviction? Homeowner Households -**Every Other** Data are collected over a 2-week period. The Survey began April 23, 2020. Data are weighted by Census Household Pulse Survey Ability to Pay Mortgage 2 Weeks number of households; data posted on the Census website are weighted by population. Behind on Mortgage Census Household Pulse Survey Data weighted by # of households; 2021 AHS estimates 82.5 million U.S. homeowner households. **Payments** Not at All Confident in Ability Data weighted by # of households; 2021 AHS estimates 82.5 million U.S. homeowner households. Census Household Pulse Survey to Pay Mortgage on Time and HUD Fearful of Imminent Census Household Pulse Survey Respondent answered "very likely" or "somewhat likely" to the following question: How likely is it that and HUD Foreclosure your household will have to leave this home within the next two months because of foreclosure? Change in Aggregate Quarterly Federal Reserve Board Difference in aggregate household owners' equity in real estate as reported in the Federal Reserve Home Equity Board's Flow of Funds Accounts of the United States for stated time period. **Underwater Borrowers** Quarterly CoreLogic Homeownership in the U.S. as a percentage of all households. National Homeownership Rate Quarterly Census Bureau Foreclosure Actions **Foreclosure Starts** Monthly ATTOM Data Solutions Foreclosure starts are reported counts of notice of default or scheduled foreclosure auction, depending on which action starts the foreclosure process in a state. (Formerly RealtyTrac) ATTOM Data Solutions Foreclosure Completions Real Estate Owned (REO).

B. Notes on Charts

Short Sales

1. Monthly house price trends, shown as changes in respective house price indices applied to a common base price set equal to the median price of an existing home sold in January 2003, as reported by the National Association of REALTORS®. Indices shown: S&P/CoreLogic Case-Shiller 20-metro composite index (NSA), January 2000 = 100, FHFA monthly (purchase-only) index for U.S. (SA), January 1991 = 100, and CoreLogic-Distressed Sales Excluded (Monthly) for U.S. (NSA), January 2000 = 100. Also see additional note below in Section C on the CoreLogic HPI.

Count of Short Sales for the month as reported (current month subject to revision).

Count of REO (Real Estate Owned) Sales for the month as reported (current month subject to revision).

2. Reported seasonally adjusted annual rates for new and existing home sales.

Monthly

Monthly

CoreLogic

CoreLogic

- 3. A comparison of the affordability of renting a home to purchasing a home. HUD's Quarterly Rental Affordability Index is compared to NAR's Composite Quarterly Affordability Index. See note in Section A on Rental Affordability.
- 4. Filings of a notice of default or scheduled foreclosure auction, depending on which action starts the foreclosure process in a state, are reported for foreclosure starts. Foreclosure completions are properties entering REO. Both as reported by ATTOM Data Solutions (formerly RealtyTrac).
- 5. FHA market shares are FHA purchase and refinance originations divided by HUD estimates of purchase and refinance mortgage originations, as noted in "Mortgage Originations" above. See additional note below on FHA market share.
- 6. See notes in Section A on renter and homeowner households' ability to make rental or mortgage payments. The results represent a "No" in response to the question, "Is this household currently caught up on their rent or mortgage payment?" Results prior to the two-week period ending August 31, 2020, are not presented because the survey question then was, "Did you pay your last month's rent or mortgage payment on time?"
- 7. See notes in Section A on renter and homeowner households fearful of eviction or foreclosure. For renter households, the results represent a "Very Likely" or "Somewhat Likely" response to the question, "How likely is it that your household will have to leave this home or apartment within the next two months because of eviction?") For homeowner households, the results represent a "Very Likely" or "Somewhat Likely" response to the question, "How likely is it that your household will have to leave this home within the next two months because of foreclosure?"

Housing Market Indicators Monthly Update | June 2023

SOURCES AND METHODOLOGY

C. Additional Notes

As of November 17, 2022, Freddie Mac no longer surveys lenders, but instead, bases its mortgage rate estimates on thousands of applications received from lenders and submitted to Freddie Mac when a borrower applies for a mortgage.

Beginning in May 2019, NAR replaced its Monthly Composite Housing Affordability Index (HAI), which was based on 30-year fixed rate mortgages (FRM) and adjustable rate mortgages (ARM), with a Fixed HAI based only on the 30-year fixed rate mortgage.

Black Knight enhanced their database as of December 2017 data, increasing their database coverage by nearly 1 million additional loans through several new contributors and improved coverage of certain types of data. In addition, HUD added filters to make sure all FHA and VA loans were excluded from the data to ensure reporting of only conventional loans. The November 2017 changes in reported data are mainly due to the additional filters.

FHA market share estimates were based on new methodology beginning with the October 2013 report; estimates were revised back through Q1 2011. See the FHA Market Share report on their website for an explanation of the new methodology: http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/rmra/oe/rpts/fhamktsh/fhamktqtrly.

The estimate for first-time buyers was 26 percent for 2022, based on NAR's 2022 annual report, A Profile of Home Buyers and Sellers. The estimate was down sharply from 34 percent for 2021 with the October 2021 release of findings from their annual survey and the lowest rate since NAR began tracking the data in 1981. The annual reporting of first-time buyers differs from NAR's monthly REALTORS® Confidence Index survey because the annual survey, for the most part, represents purchases of homes by owner-occupants and does not include purchases by investors, as in the monthly survey.

CoreLogic's House Price Index (HPI) estimates are based on new methodology beginning with their June 2016 report, which includes data through April 2016. A variety of modeling and other enhancements to their HPI and its forecast, including a 14-percent expansion in the number of transaction pairs, were made.

MBA switched to reporting monthly forbearance data in place of weekly data starting November 2021.

Data for Week 58, the first Pulse Survey of Phase 3.9, started June 7, 2023 and continues through August 7, 2023. During Phase 3.9, data collection will continue with the sequence of every other two weeks.

The BLS Consumer Population Survey/Housing Vacancy Survey (CPS/HVS) is conducted by the Census Bureau and collects data on indicators used in this report, including the homeownership rate, housing units held off market, and housing rental prices. The Bureau views the 2Q 2020 through 2Q 2021 period as a break in series because COVID-19 prevented normal data collection procedures. The Census Bureau suspended in-person interviews on March 20, 2020 and conducted the survey for the rest of the first quarter and the entirety of the second quarter solely by telephone interviews. In-person interviews were incrementally added back in the subsequent four quarters with respective rates of 63, 94, 98, and 99 percent of in-person interviews allowed. Normal data collection procedures resumed in Q3 2021 with less than one-half of one percent of in-person interviews restricted. As an example of the break in series, the national homeownership rate, at 65.3 percent in the first quarter of 2020, was estimated to have jumped to 67.9 in the second quarter of 2020 and decline to 65.4 percent by the second quarter of 2021. The changes in survey methods likely contributed to the sharp increase and following decline in the homeownership rate during that time period. See Source and Accuracy release https://www.census.gov/housing/hvs/index.html.
