A Study of  
**Community Facilities and  
Programs Serving Residents of  
Low Rent Public Housing**

U. S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
RENEWAL AND HOUSING ASSISTANCE  
HOUSING ASSISTANCE ADMINISTRATION,  
MANAGEMENT DIVISION

“Our conscience tells us that the wealthiest nation on Earth must help its elderly, its handicapped, and its poor to live with decency, and dignity, and hope—not with a handout but with a helping hand.”

Lyndon B. Johnson

# Necessary Appurtenances To Low Rent Public Housing

The Housing Act of 1937, as amended, authorizes the Department of Housing and Urban Development, through the Housing Assistance Administration, to give financial and technical assistance to Local Housing Authorities to provide decent, safe, and sanitary housing and all necessary appurtenances thereto for low-income families. The Housing Assistance Administration is part of the organization of the Assistant Secretary for Renewal and Housing Assistance. As of December 31, 1965, more than 588,300 families comprised of 2,218,200 persons lived in approximately 4,000 low-rent public housing projects. Over 49 percent of the dwelling units were occupied by non-white families and 29 percent by the elderly. Over 51 percent of the families were receiving assistance or benefits. Well over half of the 2,218,200 persons were minors, and over 26 percent of the families were one-parent families, the parent usually being the mother. The median total annual income was \$1,468 for elderly families and \$3,132 for nonelderly families.

These families in many cases need assistance in addition to adequate housing in order to overcome the handicaps of inadequate income as well as the handicaps which in many cases are the cause of their low incomes. Assistance for these families is not limited to providing for their current welfare but, more importantly, to helping and encouraging them to become self-sustaining members of the community. The Housing Assistance Administration believes that adequate community facilities and programs are necessary to the successful operation of low-rent public housing. These facilities and programs combined with good housing and a socially oriented management, provide project residents with means to improve their family and community living standards.

Toward these goals, the Housing Assistance Administration (HAA), and its predecessor agencies through the years, has maintained liaison with national public and private social services agencies. Oral and written agreements have been secured with many of these agencies, indicating ways in which they are willing to assist in meeting local needs through affiliates. The Regional Housing Assistance Offices are kept informed of these agreements and of the availability of new services initiated by the agencies to meet special community needs. In turn, the Regional staffs assist those Local Authorities who have not succeeded in getting normal support from community agencies by interpreting the problems to the regional representatives of these national agencies, and by enlisting their cooperation in improving local participation in resolving any specific problems which may arise.

Local Authorities are encouraged to realize their potential as major community resources, and as partners with other local agencies concerned with the provision of health, education, recreation, welfare, and employment services. It is on the local level, of course, that the War on Poverty must be won and it is only through the coordination of persons dedicated to the alleviation and eradication of poverty that social aids will begin to mesh and gear, and a better standard of living will begin to be a reality for all Americans.

The material that follows is the result of a survey of Local Authorities to determine, among other things, the number and kind of community facilities and programs being operated for the benefit of low-rent public housing residents, as necessary appurtenances to decent, safe, and sanitary housing.

## Scope and Method of Survey

This study, designed to develop information on community facilities and programs in low-rent public housing projects, utilized data from questionnaires completed and returned to the Housing Assistance Administration by Local Housing Authorities.

### Characteristics of the Universe

All Local Authorities with dwelling units in the management stage as of December 31, 1965 were requested to complete a questionnaire for each Federally assisted project in management. Approximately 90 percent of the Local Authorities returned the completed forms, covering 3,000 projects, or 76 percent of all projects in management. These forms provided the source data for the tables, charts, and narrative statements in this report.

**Definitions:** As used herein, the following definitions apply:

- **Local Housing Authority.** A Local Housing Authority (or Local Authority or LHA) is a local public body created under State law to provide decent homes and a suitable living environment for inadequately housed low-income people.

- **Project.** A project consists of two or more dwelling units or apartments operated under an official project number by a Local Housing Authority.

- **Program Activities.** This term refers to the health, education, recreation, welfare, and employment programs or services in operation in public housing projects, primarily for the benefit of public housing occupants. It also includes offsite programs in which the occupants of public housing participate.

## Community Facilities and Programs Serving the Residents of Low Rent Public Housing

### Summary

As of December 31, 1965, there were 1,277 Local Authorities with dwelling units in the management stage. Each of these Local Authorities was sent a questionnaire on Community Facilities and Programs serving the residents of their projects. Ninety percent responded.

They reported that there were over 37,100 community service programs in operation during the calendar year 1965. Varied in nature, the programs (over 60 types) included health, family life education, child care, recreation, Boy Scouts, elderly, welfare, and employment activities. Nearly 2,400 of the programs were receiving funds from the Office of Economic Opportunity.

### Sponsoring Agencies and Groups

Community service programs were made possible by both public and private sponsors, with public or tax-supported agencies sponsoring over 55 percent of the programs.

### Community Buildings and Facilities

Over 1,800 projects were reported as having on-site indoor community facilities. This represents 45 percent of the projects with units in the management stage. An additional 1,200 projects reported off-site indoor facilities available to project occupants (see Table 8).

On-site outdoor recreational facilities were reported by over 900 projects, and off-site outdoor recreational facilities were reported as being accessible to the residents of nearly 500 projects.

### Unmet Needs

In spite of increased facilities, programs, and efforts, Local Housing Authorities continue to report unmet needs. Paramount among these are expressed needs for initial or additional recreation programs, community space, social service and welfare programs, and day care facilities and programs.

## Program Activities

### Number and Type of Programs

Local Authorities reported that there were over 37,100 community service programs in operation during calendar year 1965. These programs were of 60 types, ranging from 188 Legal Services programs to 1,695 Social Activities under recreational programs.

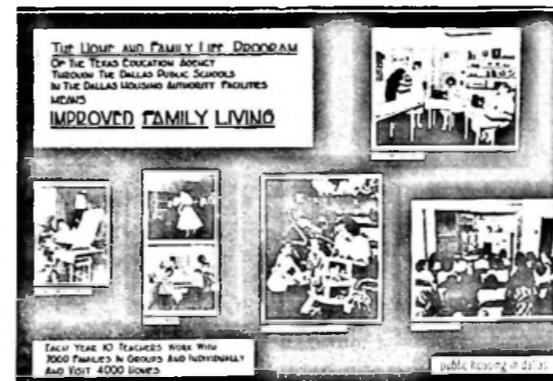

Table 1 shows programs by type, location, age groups served, and participation. Over 54 percent of the programs were reported as on-site or on another project.

The low-rent public housing program is part of the national effort to reduce the effects of poverty and help families to develop their potential and become more independent economically and socially. Office of Economic Opportunity (OEO) funds were reported as being involved in approximately 2,400 of the programs in operation. The broad classes of Education, Welfare, Employment, and Children's programs, together with the individual program of tutoring, are aimed directly at this goal, and constitute over 42 percent of the program activities reported.

There is an ever increasing need for child care facilities and programs in low-rent housing neighborhoods. Traditionally, the care of young children has rested with their mothers, but more

and more women are finding it necessary to go outside their homes to work. Many are broken families with the mother carrying the responsibility of both parents, while others are supplementing their husbands' incomes to raise their meager living standards. Local Authorities are cooperating with community agencies to meet this need, and report that there were 2,096 child care programs in operation primarily for the benefit of families in low-income housing.

A review of correspondence and other material from LHA's indicates at least 12 major social problems as being of recurrent concern regarding residents of low-rent housing. These problems were identified as

- Poor housekeeping practices
- Debts and money management
- Family discord and conflict
- Care and supervision of children of working mothers
- Problems of youth (school drop-outs, idleness, irresponsible behavior, and employment)
- Insufficient income
- Adult illiteracy or meager education
- Unemployment of youth and adults
- Children and youth with special problems (adjustment and behavior; neglected or abused; physically or mentally disabled)
- Problems of older persons
- Special needs of disabled youth and adults
- Health needs and problems

In cooperation with community agencies, LHA's are grappling with these problems, and

it is interesting to note the relationship of the majority of programs in progress to the problems presented. The top ten individual programs are:

### Top Ten Programs

Social Activities.....	1,695
Athletic Programs.....	1,543
Boy Scouts.....	1,321
Arts and Crafts.....	1,257
Family Service Programs.....	1,251
Supervised Playground Activities.....	1,220
Visiting Nurses Programs.....	1,188
Child Service Programs.....	1,053
Golden Age Clubs.....	986
Immunization Service.....	978

Community agencies and others arrange a variety of programs for children and youth to guide young interests and activities in positive constructive channels. They allow children to work off steam—happy youngsters intent on recreation and other activities, editing their own newspaper, building model airplanes, shaping metalwork, molding pottery or ceramics, or working with wood are busy youngsters. Optimism is high for achieving success under these circumstances. With their time occupied and their minds directed to creative recreation, there is less likelihood of their drifting into idleness and juvenile delinquency.

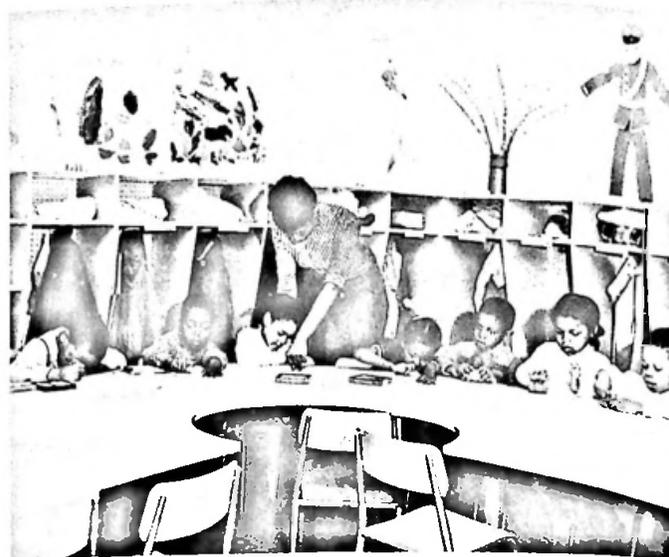

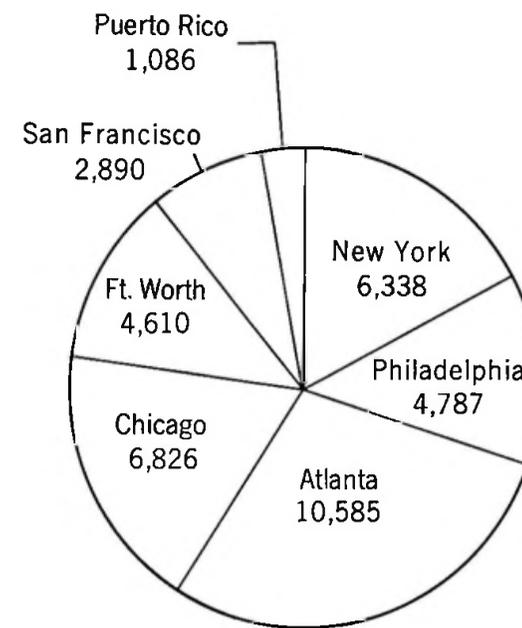

Table 2 shows the distribution of community services programs in operation with public or private sponsors by Regional Housing Assistance Offices. Region III, Atlanta, led with 10,585 programs, followed by Region IV, Chicago, with 6,826 programs.

## COMMUNITY SERVICE PROGRAMS BY REGION

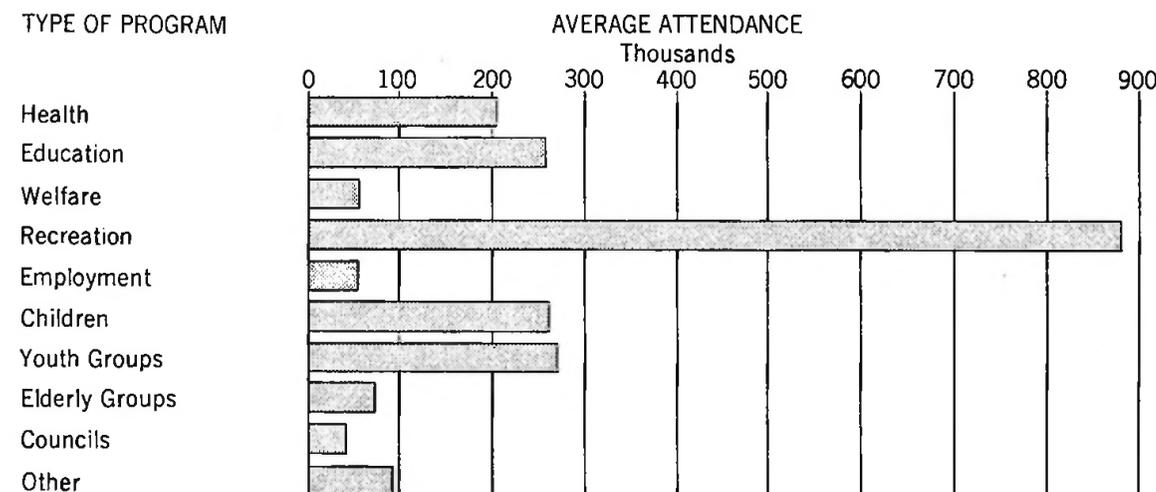

### Attendance

Many LHA's were unable to obtain attendance data from sponsoring agencies, but those reporting indicated an attendance record of nearly 2.2 million for community service programs each month. This means that on the average, each program had a monthly attendance of approximately 63.

Listed below is the average attendance per program each month in the ten states with the highest number of programs. The State of New York, second in the number of programs, is first in average attendance per program.

State	Average Attendance Per Program Per Month	Number of Programs
New York	97.5	2,653
Illinois	92.7	2,556
California	78.8	1,704
Pennsylvania	74.9	1,907
Alabama	65.6	2,064
Ohio	63.8	1,804
Texas	57.8	1,836
Virginia	44.6	1,599
Georgia	40.4	2,689
New Jersey	37.5	1,519

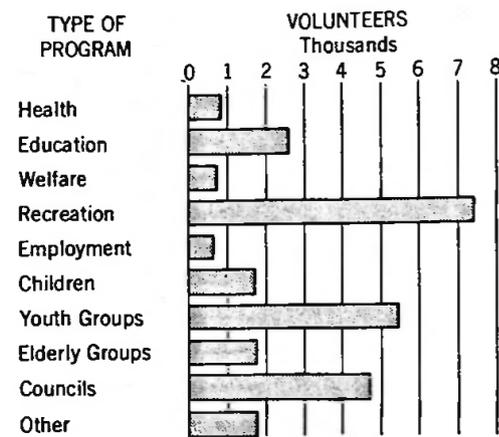

## AVERAGE MONTHLY ATTENDANCE BY BROAD CLASS OF PROGRAM

## Tenant Leaders and Aides

The Housing Assistance Administration encourages Local Authorities and community agencies to involve public housing tenants as leaders, assistants, or aides in community service programs. The survey indicated that over 27,300 such volunteers were working in community services programs, or an average of approximately one volunteer per program.

### VOLUNTEERS BY BROAD CLASS OF PROGRAM

## Non-Tenant Participation

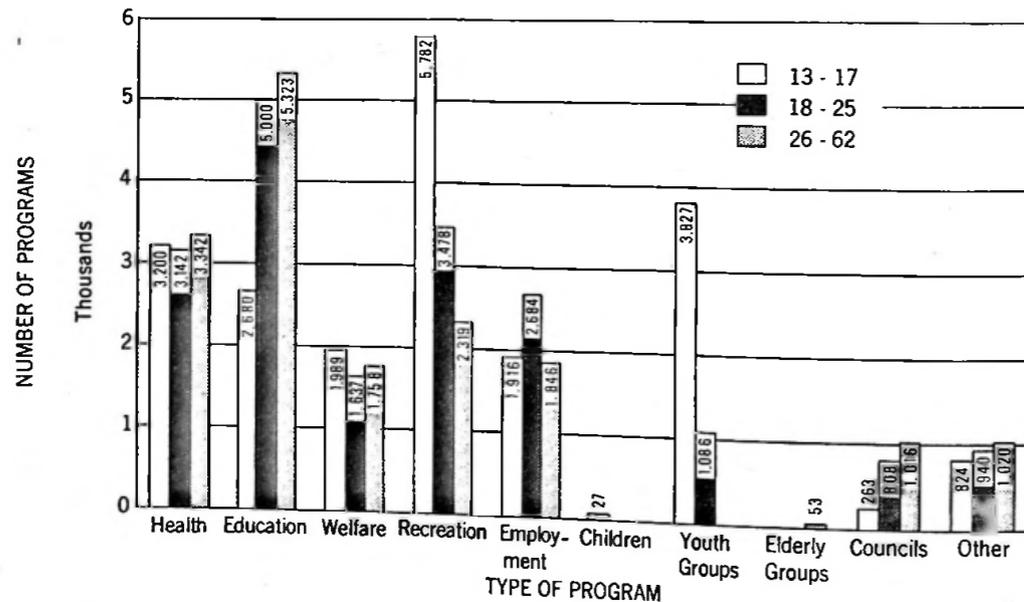

It has been a long established policy of the Department of Housing and Urban Development that low-rent housing and all activities connected therewith should dovetail with housing and activities of the surrounding community. Accordingly, programs on the sites of LHA properties are open to nonresidents, and their participation is solicited.

Local Authorities were requested to report "Significant Non-Tenant Participation," if 10 percent or more of the participants in the overall program or use of the project facilities were other than tenants of the Local Authority. Table 7A shows that over 700 or 32 percent of the 2,200 projects with facilities report significant non-tenant participation.

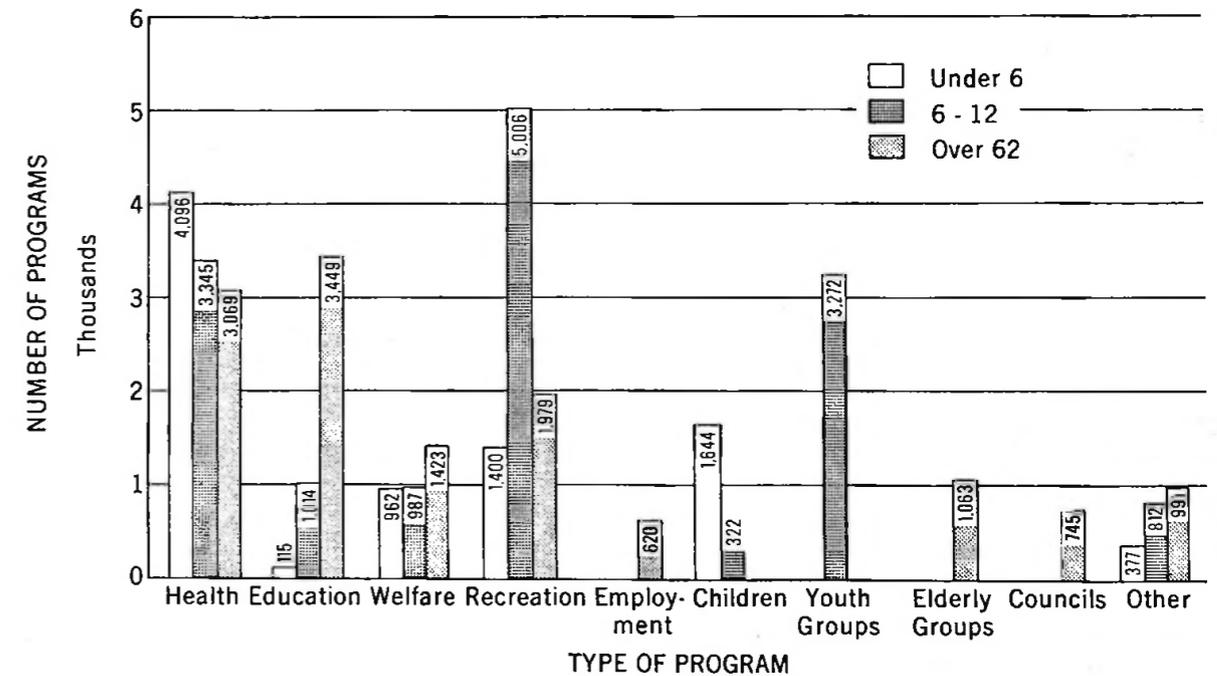

## Age Groups Served

Local Authorities were requested to indicate which age groups were being served by each program. The survey indicated that the 13-17 age group was served by more programs than any other group. The 18-25 age group was second, followed by the 26-62 age group. Next in order were the 6-12 age group, the Over 62 age group, and the Under 6 group.

### AGE GROUPS SERVED, BY BROAD CLASSES OF PROGRAM

### AGE GROUPS SERVED, BY BROAD CLASSES OF PROGRAM

## Sponsoring Agencies and Groups

The HAA maintains a continuing liaison with both public and private agencies to enlist their cooperation in sponsoring community service programs and activities for the residents of low-rent housing. The photograph on this page shows representatives of one of these agencies, the Girl Scouts of the U.S.A., calling on Marie C. McGuire, Acting Deputy Assistant Secretary for Housing Assistance.

### Public Agencies

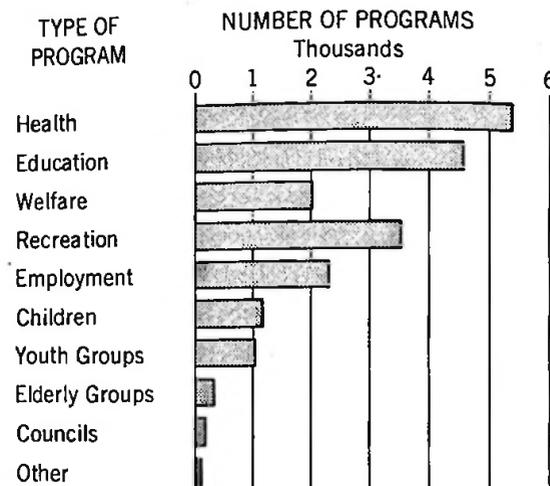

Public agencies, including city and state departments of health, education, recreation, welfare, and employment, sponsor about 55 percent of the community service programs for low-income families in public housing. The percentage of programs sponsored by these agencies ranges from 13 percent of tenant or advisory council programs to 87 percent of health programs.

### Private Agencies and Groups

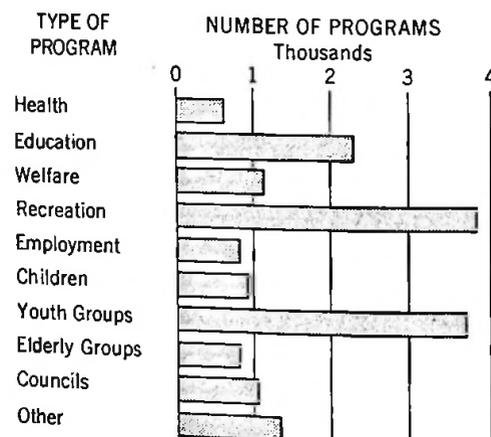

This group of sponsors, including such Health and Welfare Council agencies as Family Services, Salvation Army, Settlement Houses, YWCA and YMCA, is responsible for 45 percent of all programs. It is interesting to note that nearly 10 percent of all programs are sponsored by the tenants themselves, with the assistance and cooperation of management.

### PROGRAMS SPONSORED BY PUBLIC AGENCIES

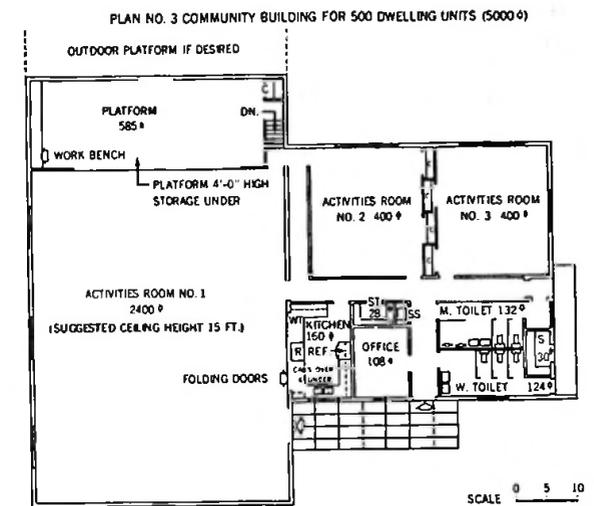

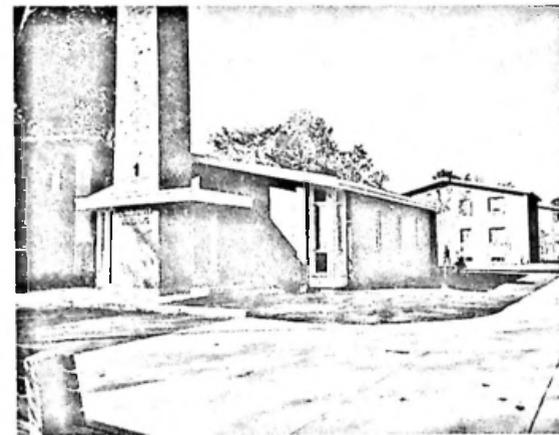

Another significant finding regarding private sponsors is that they trailed in the well-known programs of health, education, welfare, and employment; but they were operating 70 to 93 percent of the programs for the elderly and youth, tenant and neighborhood councils, legal services, and "other programs."

### PROGRAMS OF PRIVATE SPONSORS

## Community Buildings and Facilities

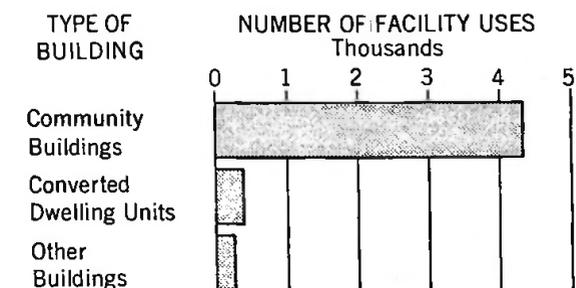

Overall family needs are a major consideration in planning and developing low-rent public housing projects. In order to assist community agencies in meeting the special needs of low-income families, LHA's may provide a modest amount of indoor community space and outdoor recreational areas where there is a need which is not being met by existing or planned neighborhood facilities.

### On-Site, Indoor Spaces

Table 4 shows the types of buildings being used for on-site, indoor spaces. A total of 523 LHA's (or 46 percent of the 1,144 reporting) indicate available on-site facilities serving over 431,500 families. These facilities are comprised of community buildings, vacant converted dwelling units, and other spaces, usually management and maintenance buildings. Also see Table 5.

### ON-SITE INDOOR FACILITY USES BY TYPE OF BUILDING USED

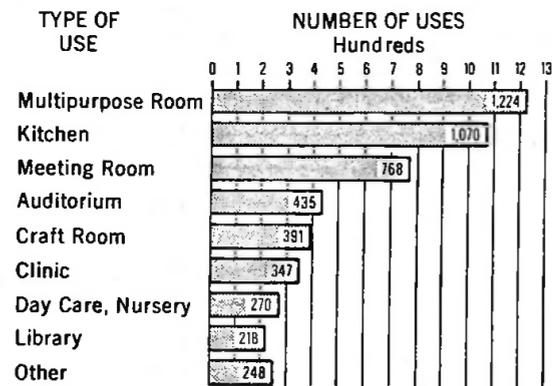

The HAA looks forward to increased activity in the involvement of other agencies, city governments, and private organizations in the joint planning, financing, and operation of community facilities and programs in low-rent housing neighborhoods. With each plan custom-tailored to the needs, financial ability, and foresight of the community concerned—taking into account the prescribed limits to which housing funds are available—a more efficient, economical, and flexible facility is possible.

Many community buildings are patterned after the suggested floor plan shown below. The final plan utilized, of course, is one that has been rearranged by the architect to fit the site, reflects the advice and counsel of operating agencies, and is designed to meet the needs of the prospective occupants of the project.

In the interest of economy, LHA's are encouraged to make multiple use of community spaces as much as possible, without reducing the effectiveness of programs. A single room, for example, may be used for a pre-school age program in the morning and for teen-age or adult activities in the afternoon or evening. In view of these circumstances, LHA's were requested to report facilities by their use.

Table 5 shows the number and types of on-site indoor facility uses by region and State. Over 1,200 of nearly 5,000 onsite indoor facility uses are identified as multipurpose rooms; and over 87 percent of the facility uses are in community buildings.

### ON-SITE INDOOR FACILITY USES BY TYPE OF USE

### On-Site, Outdoor spaces

Limited on-site outdoor recreation spaces and equipment considered necessary appurtenances to the dwelling units were reported available by 921 or 23 percent of the housing projects. On-site outdoor spaces consisted of

Pre-school or tot lot areas.....	858
School age areas.....	819
Adult areas.....	278
Senior citizen areas.....	312
Multi-use areas.....	786
Other areas.....	166
<b>Total.....</b>	<b>3,219</b>

These areas were available to 311,400 families with an estimated 623,000 children.

### Off-Site Community Spaces

Table 6 shows over 5,000 offsite community spaces in terms of facility uses, i.e., the number and type of uses made of a space, rather than the physical number of spaces. The Table also shows the distance of these facilities from the projects. There were 1,342 or 40 percent of the indoor facility uses located less than one-fourth mile from projects, while 444 or 13 percent of these indoor uses were reported as located one mile or more from projects.

Outdoor facility uses totaled 1,734 with 910 or 52 percent of them located less than one-fourth mile from projects.

In addition to the type of on-site spaces shown earlier, offsite facilities not provided by LHA's

included supervised playgrounds, swimming pools, and parks. However, 1,338 or 26 percent of the offsite facilities are located one-half mile or more from project sites, and it is questionable as to how useful they are to project residents.

## Unmet Needs

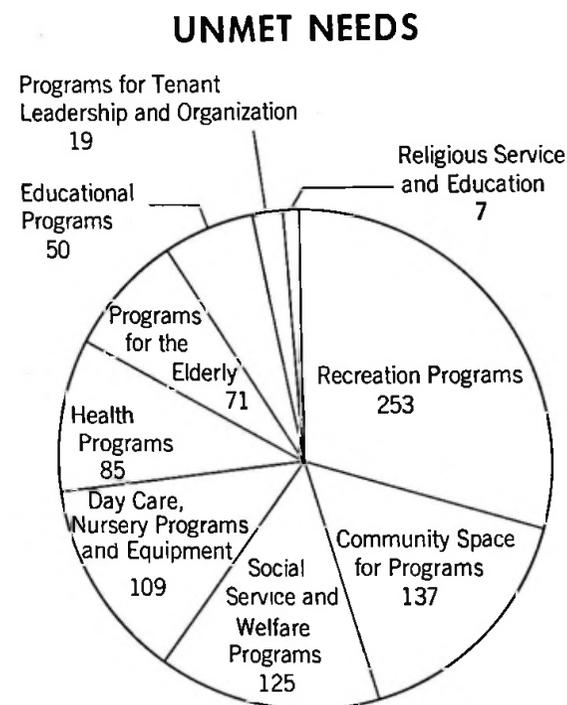

Local Housing Authorities were requested to attach to the questionnaire a statement listing any programs believed to be needed by the tenants, showing the reason(s) such programs are not available, e.g., space inadequate in size or not available, lack of leadership, program not offered in the community, service-providing agency lacks funds or interest, etc. They were also requested to state whether action to obtain needed programs was planned or underway.

In spite of the increased facilities, programs, and efforts, Local Authorities continue to report unmet needs. If these were to be distinguished between those of material requirements, such as physical facilities or equipment, and those providing services of one kind or another, the needs of families comprising today's nationwide public housing program become very clear. More than any one single factor, these families require a large-scale involvement of the time and energy of persons who recognize that the availability of low-rent standard housing represents not an end in itself; rather, that it is an opportunity to help disadvantaged people advance socially and economically to the point where their residence in public housing can become the stepping-stone to full self-dependence which it is intended to be.

Questionnaires were examined for all localities reporting, approximately 20 percent of which noted unmet needs. They were grouped in the following broad categories:

1. Recreation programs.....	253
2. Community space for programs.....	137
3. Social service and welfare programs..	125
4. Day care, nursery programs and equipment.....	109
5. Health programs.....	85
6. Programs for the elderly.....	71
7. Educational programs.....	50
8. Programs for tenant leadership and organization.....	19
9. Religious service and education.....	7
Total.....	856

The chart below places these unmet needs in a clearer perspective, with the first four categories (recreation, space, welfare, and day care) accounting for over 72 percent of the expressed needs.

Under the category of "Recreation programs," Local Authorities expressed the need for such programs as supervised activities for children and adults, arts, crafts, and dramatics, and youth organizations.

The expressed need for community space included projects with no community space and those requesting additional space such as clinics, meeting or multi-purpose rooms, day care, senior citizen lounges, etc.

## A Challenge To Housing and Community Agencies

The "Social service and welfare programs" category included the expressed need for such programs as housekeeping and homemaker services, family counseling, and legal services. The need for housekeeping and homemaker services' programs leads in this category. It is listed 60 times, almost three times as often as the next highest subcategory.

The expressed need for child care programs and equipment represents 13 percent of the total expressed needs. This represents almost a 100 percent increase in this category over last year.

Basically, there are two types of services necessary, one directed at assisting tenants in making the initial adjustment to their new and oftentimes strange and complex environment, and the other providing a broad range of programs of a continuing nature especially designed to help the tenant make the most of his occupancy in low-rent housing. Many Local Authorities have on their staffs individuals whose task is to facilitate the transition of new tenants who in so many cases bring with them the practices and attitudes developed over a long period of living in substandard conditions. These tenants have had little exposure to the requirements and regulations needed in high density living to provide a good environment for all the residents. When the financial condition of a Local Housing Authority permits their employment, personnel such as Management Aides or Community and Tenant Relations Advisors can and do make available contributions in this area of social services, but they are necessarily limited to management-related activities.

As indicated earlier, the chances of public housing residents for continued independent and comfortable living in the community are greatly enhanced when supportive health, education, recreation, welfare, and employment services are supplied along with adequate housing. Low-rent public housing provides an excellent laboratory for "reaching-out" social services,

in that the locating of persons who have special needs and the identification of these needs are greatly simplified in housing developments where personal contacts can be readily maintained.

Social agencies that elect to provide services to low-income disadvantaged persons can find no better opportunity to reach this population than a low-rent housing development where all persons have low incomes. Such a setting offers unlimited possibilities in which to demonstrate and test an agency's ability to provide social services, and to measure the effectiveness of these services in terms of improvements in individual and family behavior and living standards. The HAA believes that from the standpoint of the welfare and happiness of public housing residents themselves, as well as from the standpoint of benefit to the community, the success of housing can be measured largely by the extent to which it helps the residents to maintain their social and economic independence.

One of the pressing needs of tenants in public housing is for day care programs. The large percentage (26%) of broken homes, where the

head of the household is almost always the mother, accentuates this need. In order to obtain employment, it is usually necessary that the mother arrange for the care of her children during her absence but, as often as not, she finds that either sitters are not available or the cost in relation to her income is prohibitive. In addition, many wives would be all too willing to go to work to supplement their husbands' incomes but are unable to do so because adequate child care facilities are lacking or are out of reach financially. Facilities themselves do not seem to present the major problem in fulfilling this need in many areas since many Local Authorities

already have the space, either in the form of a community building or in the conversion of a dwelling unit for such purposes. What is most needed are persons to staff such programs and provide capable supervision for the children. It appears therefore that this need could be met through cooperative arrangements between Local Authorities and community agencies.

The Housing Assistance Administration stands ready to help meet the challenge of providing more services to public housing residents as one more step in the creation of a higher standard of living for all Americans.
