3. Definitions of Cost Items	38

FOREWORD

"What did it cost?" is a question of primary importance asked of every building program, whether private or public. The average costs of developing the public housing constructed under Public Laws 412 and 671, and currently administered under the United States Housing Act Program, are presented in this bulletin through statistical tables. Included are costs incurred in acquiring the site to completion of the dwelling units for occupancy, together with such items as are chargeable to development cost during the first fiscal year of operation. The developments are classified in several ways to show the effect on costs of differences in location, dwelling unit size, design type, etc. The cost data are limited to those developments which were reported as completed for occupancy by June 30, 1944, and are based on the figures available as of that date. A survey of the revisions in costs effected after that date indicate only a slight overall increase in average unit cost.

The bulletin is the second in a series based on the survey made during the latter part of 1944 of public projects designed to serve low-income families. Comprehensive background material on the general characteristics of the United States Housing Act Program, and sources of data, are contained in Report S-800, issued in September 1946.

LIST OF TABLES

Urban Continental PL 412 and PL 671 Developments
Completed for Occupancy

<u>Table number</u>		<u>Page number</u>
<u>Unit tables</u>		
1.	Number of developments and dwelling units, by region, and size of metropolitan district.....	4
2.	Average total development cost per dwelling unit, by region, size of metropolitan district, and index number.....	4
3.	Average development cost per dwelling unit, by cost classification, region, and percent of total development cost.....	5
4.	Average development cost per dwelling unit, by cost classification, region, and percent of total development cost (PL 412 only).	6
5.	Average development cost per dwelling unit, by cost classification, region, and percent of total development cost (PL 671 only).	7
6.	Average development cost per dwelling unit, by cost classification, size of metropolitan district, and percent of total development cost.....	8
7.	Average development cost per dwelling unit, by cost classification and size of metropolitan district (by public law).....	9
8.	Average development cost per dwelling unit, by cost classification, and by year of construction contract award.....	10
9.	Average total development cost per dwelling unit, by region, predominant design type, and index number.....	11
10.	Average new housing cost per dwelling unit, by region, size of metropolitan district, and index number.....	12
11.	Average new housing cost per dwelling unit, by average number of rooms per unit, and by region.....	13
12.	Average dwelling facilities cost per unit, by region, size of metropolitan district, and index number.....	14
13.	Average dwelling facilities cost per unit, by region, size of metropolitan district, predominant design type, and index number..	15

1/ Tables 1 through 31 cover only urban continental developments completed for occupancy under Public Laws 412 and 671; where coverage is limited to only one public law, individual tables so specify.

2/ Includes developments not in a metropolitan district.

3/ Ohio 3-F, with average total development cost of \$4,264 per unit, excluded from this and subsequent tables because detailed cost items were not available.

Table 2. Average total development cost per dwelling unit, by region, size of metropolitan district, and index number

As of June 30, 1944

Public law and region	Total development cost per unit				Index number (\$4,649 = 100)				
	All urban areas	By size of metropolitan district			All urban areas	By size of metropolitan district			100,000 1/

VII.....	4,305	---	4,481	3,935	93	---	96	85	
VIII.....	4,991	5,312	4,770	4,351	107	114	103	94	
GFC.....	5,206	5,206	---	---	112	112	---	---	

1/ Includes developments not in a metropolitan district.

2/ In preparing data for this bulletin, metropolitan district classifications for all developments were reviewed; several revisions were made which affected slightly the average costs by metropolitan districts. Thus Chart 12 of the Senate Hearings on S. 1592 (November 27 - December 5, 1945) shows an average cost of \$3,884 for developments in areas of under 100,000 persons.

1/ For description of each design type, see Report S-800 (September 1946), Appendix 2, page 28.
A development containing two or more design types is here classified by the design type
which typifies over half the dwelling units in that development. Developments with no one
design type representing over half the units are unclassified.

2/ Three developments or less.

^{1/} Covers family accommodations only; one PWA dormitory development (104 units) is excluded from this and subsequent tables.

^{2/} Twelve developments (ten PL 412, two PL 671), each counted as one development, have dwelling units built under two separate construction contracts. Two of the ten PL 412 developments with added portions under construction are treated here as completed for occupancy.

^{3/} Thirteen rural developments, having active as well as deferred portions, have been counted in the deferred category.

APPENDIX 2

Explanatory Notes on Tables

Coverage. The tables deal exclusively with the urban continental developments constructed under Public Laws 412 and 671, and completed for occupancy on or before June 30, 1944, except for two tables on developments in Puerto Rico.

Description of data. The data given in the tables are average costs, either per dwelling unit or per room. The total dollar amounts expended in developing the United States Housing Act Program are available in Report S-800, September 1945, Appendix C. Like the aggregate costs given in Table C of that appendix, the averages are "anticipated" costs based on the most recent estimates available as of June 30, 1944. Although no final determination of development cost can be made for a housing development until the end of the first fiscal year of operation, the averages given for the developments completed for occupancy are fairly close representations of the final costs.

Arithmetic average. Unless otherwise specified, this average is used in the tables and is computed by (1) totaling the dollar aggregates for a given group of developments, and (2) dividing the sum obtained by the total number of dwelling units (or rooms) in that given group of developments.

Median average is used in those tables containing a distribution of developments by average unit (or room) costs. The median or "middle" average means that the number of developments with costs averaging above the median is equal to the number with costs below it. Medians were not computed for items containing fewer than four developments.

Index number. For comparative purposes, averages are shown in the form of indexes which were based on an overall average cost specified on the statistical tables as equal to 100. Each average was divided by the overall average to determine the percent by which a given average cost differs from the overall cost.

APPENDIX 3

Definitions of Cost Items

The following definitions describe the cost classifications used in the tables of this report, as compiled from the FPHA-1336-F schedule, after adjustment in some items on the schedule by the Central Office, Statistics Division:

Total development cost covers all expenditures incurred during the period of developing a low-rent housing project. Included are costs of land acquisition and improvement, slum clearance, construction and equipment of dwelling and non-dwelling facilities; the expenses of planning, financing, and administering the development up to the date the dwelling units are 95% occupied, or the end date, whichever is later; and sundry financing costs extending into the first fiscal year of operation.

Items excluded from development cost are (1) Land for public improvements (schools, parks, etc.) serving the public at large, (2) payments for vacated streets and alleys, and (3) land acquired off site for purposes of equivalent elimination, and the cost of off-site demolition.

New housing cost excludes certain development cost items not generally incurred by private living, i.e.:

1. Slum clearance on site (specified on the 1336-P schedule as "Existing structures", "Demolition and clearing", and "Relocation of tenants").
2. Land purchased for future development intended to be used for and charged to additional housing.

Dwelling facilities cost includes dwelling buildings; fixed and movable dwelling equipment; and the pro rata share of local housing authority architectural, administrative, and financing costs allocable to dwelling facilities.

Site acquisition cost includes (1) payments for land surveys and other expenses incident to acquiring a site, (2) land for present development, and, in some projects, land for future development, and (3) the amount paid for slum buildings on site and the expenses incurred in locating other dwellings for site occupants.

Site improvement cost includes rough grading of land, excess excavation and foundation costs, utility mains and connections up to but outside of dwelling walls, landscaping, and sundry improvements normally assessed against a site. It also includes streets, alleys, playgrounds, etc., and the cost of demolishing and clearing substandard structures on site.

Non-dwelling buildings covers the cost of buildings, spaces, equipment, and the allocable share of central or group heating systems serving administrative, maintenance, or community functions.

Dwelling structures (net construction cost) consists of the cost of dwelling buildings, fixed equipment, the allocable share of central or group heating systems, and all utilities within dwelling walls.

Movable dwelling equipment expense is the cost of providing dwelling structures with items such as ranges, portable space heaters, refrigerators, etc.

Architectural and engineering costs include fees paid to professional consultants for technical services and the various expenses incurred in connection with such services.

Local authority administration consists of direct administrative and all other related costs incurred by a local housing authority in developing the project.

Interest on advances (whether) includes the direct cost of selecting initial amounts of operating deficits (or income) up to a date one year after the project is considered ready for occupancy.

Carrying charges are the interest payments on development funds borrowed by the local authority up to the date of physical completion, or up to any earlier date which marks the beginning of the period for which annual contributions are paid.

Working capital is the operating fund advanced to a development in an amount equal to 1% of the total development cost.

Development credit consists of miscellaneous receipts by the local authority resulting from the use of development funds, such as sales of salvage and scrap and forfeited deposits.

Adjustments on FMA-1336-P schedule. In accordance with procedures to be applied in the event of a post-war low-rent housing program, the following revisions were made by the Central Office, Statistics Division, FPHA, in items reported on the FMA-1336-P schedule, Section 7, "Development Cost":

1. Item 2b(4) "Demolition and clearing" was deleted from item b, "Acquisition of site", and included in item c, "Site improvement". The remainder of item 2b(4) "Other misc." was deleted and added to item h, "Service charges".
2. The cost of the "FPHA Construction Advisor" was transferred from item g, "Local authority administration" to item f, "Architectural and engineering" expense.
